OFFICE OF THE CHAIRMAN

23 November 1957

MEMORANDUM TO: General A.J. Goodpaster

Dear Andy:

This is the customary letter upon which the President, by endorsement, indicates his approval of the expenditure of fissionable material for tests. The letter refers to the HARDTACK series to start in April, but the Presidential approval will authorize expenditure of fissionable material

for two safety tests to be held at the Nevada Test Site late in this calendar year. These shots will result in no fall-out as they will be contained within the ground. I will ask the President for approval of the expenditure of fissionable material for the HARDTACK series at a later date.
