DATS: Detober 33.1972

THEST THERITORY OF THE PACIFIC ISLANDS OFFICE of the District Administrator. Harshalls

: District Administrator, Earstalls

- 13 : District Director Fublic Affairs Thm
 - : Community Development Officer
- FION : Community Development Advisor

SUBJECT: Dr.Horvik's letter dtd li Uctobor 1972, attachad. By roply to above letter dtd 16 October 1972, altached.

Dr. Hervik asked no for specific information regarding the increatek People now on Ujilang Atoll. This information is required in order to properly evaluate the radiological data which will result from the present radiological survey of Snewstak Atoll.

I answered his questions to the bact of my ability with the information at hand at the time, However more specific data must come from the District Contor. It may be necessary to obtain those data from the Ujilang Community on Ulilang Atoll. I will altempt to gather as such data possible locally.

I recommend that ASC officials involved. and you and appropriate numbers of your staff visit the Ujilang Councily early in the program to aplain the survey, the overall program, including plans for rehabilitation and resottlegent to the people there. This will establish report with them, will dispel false remore, rectify erronsous information, will clarify the situation, and supply information. Such a mosting will make the people feel, and know, that their vishes are of utmost importance. The input of information by the knowstak Feeple, and thair comments will be of grant value and assistance to all concerned in the future of Snowstak Atoll and the Enewotak Poople.

I recommend frequent visits to Ujilang by those in charge of this work, accompanied by your representatives of course. I also recommend frequent visits, as depasd appropriate, to Encastak by leaders from Ujilang Atoll during the course of the work of reliabilitation of Anowetak to ensure maximum participation of the people who will return personantly to that stoll. This is both an equitable and practical approach.

Jack A.Tobin
