

but I don't know how much he wants to be involved. HARC is interested in participating--primarily in assessing the effectiveness of an education program. I'd like to identify, as soon as possible, the person who will lead our effort so that he or she can attend the August 4 meeting. I'd like to get someone thinking about this by July 24-25 so that they can get prepared for the meeting.

DOD, the Marshallese Government, the lawyers who represent the Marshallese people and all other parties who want to provide input into the plan. In addition to working the political scene, the participants in this program will have to be knowledgeable about radiation biology, ecology and dosimetry and become familiar with the weapons testing effort in the Pacific and all activities since. Also, the skills in education, particularly in communicating technical information to nontechnical people, are necessary.

My involvement with this program will have to be limited. I will help the program get under way, provide guidance and monitor the program-- which will likely have high visibility. It is apt to be very political and sensitive. Ray Baalman is interested in participating in the program, but I don't know how much he wants to be involved. HARC is interested in participating--primarily in assessing the effectiveness of an education program.
