DR. JOHN LAWRENCE

Dear John:

The AEC and the National Bureau of Standards have a joint committee on trying to determine the standard RBK values to be used for humans for various radiations. The Chairman of this committee is Victor Bond. The Committee is working on another book of official rules for health protection. They were very anxious to have me at their meeting in late August; however, I told them that I could not go. Under the circumstances they would very much like to have Chuck Sondhaus substitute for me. Chuck has been at Bikini and knows quite a bit of the relevant data. The AEC contract would have to pay the travel expenses. Is this all right with you?

Sincerely yours,

Cornelius A. Tobias
