NOTE TO DR. BURR

COMMENTS AND QUESTIONS ON S.B. NO. 7-109, CONGRESS OF MICRONESIA

- 1. I do not recommend that the examinations and treatment at Majuro or Ebeye be extended to nonexposed persons; these would produce no significant research information, and certainly are not required as a matter of responsibility of the U.S. *These are the non-exposed control and are part of the study*
- 2. It does not appear to be appropriate to specify the role of Brookhaven National Laboratory in an act of the Congress of Micronesia. *It is because BNL physicists identify those eligible for the study*
- 3. What is the estimated cost of the program? *150k*
- 4. This Act should also be reviewed by OGC. *yes*
