

STANDARD FORM NO. 64

Office Memorandum • UNITED STATES GOVERNMENT

TO : Dr. Dunham.

DATE: June 29, 1956

FROM : Dr. Shilling. *CWS*

SUBJECT: COORDINATION OF HUMAN EXPOSURE MATERIAL.

SYMBOL: BMD:CWS

Files

During the discussions on Friday at the Radiobiology Laboratory meeting at the University of Utah, there was quite a discussion of the very real need to obtain the maximum from all of the human exposure patients which we are following. As you will recall, there is one group being followed by Robley Evans. There are two groups being followed by the staff at the Argonne National Laboratory. Then there is another group being followed jointly by Drs. Louis Hempelmann and Wright Langham. The latter made quite a point of the fact that he and Dr. Hempelmann hadn't been coordinating their work as well as they should have and he felt that it was time that we got all of the interested parties together and worked out a very carefully planned and coordinated follow-up on all of the human patients available. This I agree with and hope we will be able to do something about it. I feel that part of the problem is that they are being administered from our standpoint by the Medical Branch in some cases, and by the Biophysics Branch in others.

*Let's feel Louis & Wright
Austin or Hatchek and Robley
in for a few weeks?
Can they manage it?*
