Col. [unclear] - 5-15-73

27 on list

28 military people

3 in service - [unclear] med. facility

All negative. Checked [unclear] with defects.

Recommend [unclear] follow-up [unclear]

2

3 on 4 dead. Nothing related to [unclear] exposure.

Sent letter to each of others. Advised that Leonard's work had shown thyroid lesions. Several could be treated via VA hospitals. Urged physicians to conduct further studies suggesting a link. In general, felt that project could be developed with DNA sponsorship.
