Call to Leonard American  
Servicemen on Kogerick

Called Howell & suggested exams. DOD didn't  
seem to be at all through. Proposed exams  
of people to be held at VA hospitals. Write letter to  
each serviceman, suggesting thyroid exams. Left  
Leonard's group out of it.

Report to Bob if any information is gained.  
Calculated thyroid dose later. May be comparable to  
Gilingjoral group.
