~~CONFIDENTIAL~~

Dear Wright,

These samples need both α B & L
constant account. If much α is present
The problem of taking the Certacet for
running ^{just} to Pearl even after painting
comes up.

Some standard procedure ~~must~~ be
worked out - any suggestions?
So far we have said that if γ is below
tolerance & only contamination is topside
then painting would keep contain. from
flying around & permit the ship to be
sailed to Pearl. Then she is put up &
the crew moved to barracks & she sits
until "people" from the MED can come
out & desert equip to survey her in
an uncontaminated site at least to
study the ? of permanent occupancy.
So far crew have been cleared, once contaminated
for perm. occ.

Hope you aren't overwhelmed
by the work. Will call you on arrival at SF
+ 29 Aug - Please write findings thru Bedding
then contact 4167 Oak, Army Base to Comdr Harris in
