RELEASE OF DOCUMENTS ON FALLOUT

SYMBOL: BMES:HH

US DOE ARCHIVES	
326 U.S. ATOMIC ENERGY COMMISSION	
RG	<u>DOE HISTORIAN (DBM)</u>
Collection	<u>1132</u>
Box	<u>3370</u>
Folder	<u>#12</u>

This is to confirm that the Division of Biology and Medicine has no objection to your making available for public sale the following reports, which we understand to be already unclassified:

1. Discussion of Radiological Safety Criteria and Procedures for Public Protection at NTS, Feb. 1955. Already printed in fallout hearings (1957).
2. Letter Reports #1 and #2, Armour Research Foundation Contract 80-(11-1)-626. Only question here is whether these aren't already covered by ARF Scientific Report #1.
3. M-6239, Report on Project Gabriel, July 1954.
4. WASH-1005, Selected list on radioactive fallout.
5. LA-1685, Some observations on air sampling techniques used at NRC.

This is also to confirm Mr. Hollister's request to Mr. Voress yesterday that TISE compile a bibliography of important items relating to fallout that have appeared in the literature since the 1957 fallout hearings. We would want to insert this into the record of the new hearings now scheduled to begin May 4. We are hoping you would also send us a brief confirming memo that you are starting on a comprehensive bibliography of fallout items, to be completed in several months. We would forward this to the JCAE when available.
