EXTRANEOUS MATERIAL DELETED

1. Biology and Medicine

Dr. Dunham said that Dr. ACHEM had informed him that the Rongelap natives had returned to the islands from which they were removed at the time of Operation CASTLE. Also, in view of the necessity of conducting various tests in the U.S., the Committee had recommended approval of the ten roentgen in ten parts per billion for all exposure to fallout. Dr. Dunham said the Committee believed that this amount of exposure will not create any appreciable genetic risk to the U.S. population. (Sec 2) (U) (S)

Mr. Murray then inquired about the status of a study being prepared for the Net Evaluation Subcommittee of the NSC concerning the biological consequences of nuclear warfare. He said he wished to receive a copy of this and all similar reports prepared by the NSC staff. Mr. Strauss said he had not yet seen this particular report, but that he would consider providing Mr. Murray a copy after he had seen it.
