Dear Major Moore:

As per our previous discussions, we are arranging to get
, the Marshallese woman with cancer of the thyroid, back to Honolulu on
22 February. I will arrive the day before and contact you. Will it be
convenient to start the examinations on February 23? I will bring along
with me 3/10 unit vials of Thytropar (TSH), so that she can receive this
three days in a row along with her thyroid uptake study. I believe the
necessary concurrence from your Commanding Officer and the AEC in Honolulu
has been obtained for these examinations. Should there be any questions
you may direct them to Mr. W. A. Bonnet at the AEC Office in Honolulu.

I would appreciate hearing from you if these arrangements are
satisfactory.

Sincerely,

Robert A. Conard, M.D.
