WEST COAST DIRECTOR

**PROJECT HANDCLASP**

C/O Headquarters Eleventh Naval District  
San Diego, California 92132

714-235-3438

Ser 1G/682  
16 March 1978

From: West Coast Director, Project Handclasp  
To: Commanding Officer, USS MONTICELLO (LSD-35)

Subj: Project Handclasp material; accountability for

1. It is noted with pleasure that USS MONTICELLO has accepted:

(a) 33 pallets/21,455 pounds/1,625 cubic feet/41 measured tons of Handclasp material for delivery to Eniwetok.

(b) 116 pallets/96,105 pounds/5,750 cubic feet/144 measured tons of Handclasp material for delivery to Kwajalein.

2. The cooperation of all those involved in arranging space and loading of this material is sincerely appreciated. Of particular note was the efforts of Lieutenant Junior Grade J. R. Moore. It is this type of "can do" spirit that ensures the timely delivery of greatly needed Handclasp materials to major overseas commands for distribution to hospitals, clinics, universities, etc., where they can provide the greatest benefit.

3. The value of this combined shipment for Kwajalein and Eniwetok is estimated conservatively at \$208,000. No value can be placed on the efforts and goodwill of persons and/or companies who collected and donated this material. Inasmuch as this represents a trust in the Navy by persons donating this material, it is of utmost importance that all possible steps be taken to safeguard the shipment from damage, loss, or pilferage while in transit. Project Handclasp material is U. S. Government property. To ensure proper accountability of the material at the port of debarkation, it is requested that standard supply procedures be utilized in turning the material over to the proper representative of Eniwetok and Kwajalein. It is suggested that a copy of the documents received from the Project Handclasp representative in San Diego be signed by the Eniwetok and Kwajalein representatives and retained for your records. All Handclasp material requires covered/secure storage.

4. Please be assured that the efforts involved in handling this material are deeply appreciated and that you have contributed significantly to furthering the U. S. Navy's people-to-people program in the western Pacific.

M. C. TEVELSON

"If peace and freedom are to endure in the world, there is no task more urgent than lifting up the hungry and the helpless, and putting flesh on the dreams of those who yearn for a better life".....President Nixon, 10/31/69

# PROJECT HANDCLASP

WEST COAST DIRECTOR

**PROJECT HANDCLASP**

C/O Headquarters Eleventh Naval District  
San Diego, California 92132

714-235-3438

Ser 1G/679

16 March 1978

From: West Coast Director, Project Handclasp  
To: Colonel Edgar J. Mixan, USA, Commander, Joint Task Group  
Eniwetok Atoll, Marshall Islands, APO San Francisco 96333

Subj: Project Handclasp shipping documents; forwarding of

Encl: (1) Seven Transportation Control and Movement Documents (TCMD'S)  
ENI-053-78 thru ENI-058-78 and ENI-066-78  
(2) Description of medical supplies

1. Enclosure (1) contains copies of shipping documents for 33 pallets/  
21,455 pounds/1,625 cubic feet/41 measured tons of Project Handclasp  
(PH) material placed on board USS MONTICELLO (LSD-35) in San Diego in  
March 1978 for delivery to Eniwetok.

2. The value of this shipment is estimated conservatively at \$32,000.  
No value can be placed on the efforts and goodwill of persons and/or  
companies who collected and donated this material. Inasmuch as this  
represents a trust in the Navy by persons donating this material, it is  
of utmost importance that all possible steps be taken to safeguard the  
shipment from damage, loss, or pilferage. It is requested that close  
attention be paid to the documents during off-loading and distribution,  
and that the Transportation Control Number be compared on the documents  
and on the pallets. (Identifying information is marked on the top of  
each pallet.) In addition, it is important that the command representative  
is present when Handclasp material is off-loaded. Normal supply procedures  
should be used, including a physical inventory of the material, a signed  
receipt being retained whenever the material is turned over to another  
activity, etc. All Handclasp material requires covered/secure storage.

3. Background information concerning preparation and applicability of a  
few of the items listed in enclosure (1) follows:

(a) Three pallets medical supplies. Two pallets containing approx-  
imately \$2500 of assorted Johnson and Johnson (J&J) supplies. See item  
a, enclosure 2. One pallet consisting of two Phase I Medical Kit. See  
item b, enclosure 2.

(b) Two Project Handclasp Sewing Machine Workshops. Each triwall  
contains a new treadle sewing machine, 50 yards of material, scissors,  
assorted buttons, needles, thread, and other sewing notions as well as  
Band-Aids, Tang, diapers etc., used as fillers. This workshop is very  
valuable in that it gives an enterprising recipient the capability of

"If peace and freedom are to endure in the world, there is no task more urgent than lifting up the hungry and the helpless,  
and putting flesh on the dreams of those who yearn for a better life".....President Nixon, 10/31/69

beginning a self-sustaining profession as well as maintaining clothing for his own family. It is important that this workshop be given to a recipient who will put it to good use, and that feedback from the command and/or the recipient be forwarded to the donor listed on the document.

Note: Dental floss (although contained in medical kits) can be used for sewing purposes. PH has been advised that it makes an excellent thread substitute for jobs requiring a tough, strong, thread, such as sewing leather.

(c) Four pallets of used school desks. It is requested that these desks be assembled and renovated before distribution.

(d) Three pallets of water cans. Sufficient dual inserts are provided for use of these cans as water containers. If painted white, and provided with handles, these cans also make excellent disposal cans for use in hospitals and clinics. Other uses include food storage, waste receptacles, etc.

(e) Five pallets of chicken/crackers, four pallets of jam/crackers, five pallets of crackers, and one pallet Contadina tomato sauce. Each pallet of crackers contains approximately forty 15-pound hermetically sealed cans.

(f) Three pallets of sanitation kits. Each pallet contains 18 portable toilets.

(g) One pallet of mixed flower and vegetable seed. Contains approximately 15 boxes, 7,500 packages of seeds.

(h) Two pallets books. Each pallet contains approximately 800 elementary schoolbooks.

4. Two bolts of material, each containing 806 square yards of muslin fabric, were shipped to Kwajalein on TCMD #KWA-065-78. One bolt to be forwarded to Eniwetok by Mr. Robert E. Haley, phone Kwajalein 82103. TCMD #ENI-066-78 refers.

5. Project Handclasp provides material to those commands which have expressed the greatest interest, including maximum participation, effective distribution, and feedback. No donor, whether individual or corporate, will continue to provide material to Project Handclasp or any similar organization without being apprised of how their material has been utilized and the results obtained from this utilization. Therefore, it

Ser 1G/679

is important that feedback be forwarded. Correspondence concerning the distribution, value, acceptance, etc., of specific products is requested. In addition, correspondence discussing the command's observation of the impact of the program should be sent to West Coast Director, Project Handclasp. Pictures obtained during the distribution (both black and white, with negatives, and color slides) are also highly desired. It is through this type of feedback that Project Handclasp is able to obtain the materials available for overseas commands.

6. Please be assured that your efforts in handling this material are deeply appreciated and that your involvement will contribute significantly to furthering the U. S. Navy's people-to-people program in the western Pacific.
