1. EVACUATION and RE-ENTRY:

Major Sill was queried concerning the possibility of not evacuating the Oboe camps for the MAPLE event. The question came up as a result of a telephone conversation between Cols Pinson and Lucke. Sill states that there is no intention at present of UCRL evacuating the Oboe camp for MAPLE. The blast and thermal values are predicted to be negligible and they will not evacuate the area unless a fallout problem comes up. (EAL)

2. MISCELLANEOUS:

A conference was held this morning to discuss support for TG 7.1 in the Hawaiian area. Those present were:

Col Coleman, TU-3	Jim Reeves, 7.5	R. Whitaker, J-1
D. Curry, D/A	Col Noseck, J-1	R. VanGemert, J-4
R. Newman, J-6	Col Mowery, TU-3	LCDR Smure, J-3
Col Robbins, 7.4	Col Pinson, DCTG 7.1	Maj Forsythe, TU-3
Col Jeffrey (JTF7, J-3)	CDR Rossell (JTF7, J-4)	

Col Jeffrey (JTF SEVEN) reported that Hanger #2 at Hickam Air Force Base meets all of the 7.1 requirements for space, (Office and Laboratory). Nose docks and like equipment are available for the WB-36s. Air conditioning for the office and work area will be provided by 7.5 on a rental basis from local (T.H.) sources.

Barber's Point will be used to support the P2Vs and will further provide limited office space for our use. Arrangements are being made to provide EG&G photo with support at that location also.

JTF SEVEN will make arrangements with the Coast Guard for Project 34.4s use of French Frigate Shoals for their Micro-Barograph instruments.

JTF SEVEN will also make arrangements with the CAA and T. H. Park Service for use of a suitable site on Maui for Project 6.6s radar installation.

For the units a Hickam Air Force Base, transportation will be furnished by the Motor Pool rather than checking out vehicles to various projects in order to provide more effective utilization of the limited number of vehicles available. (EAL)
