Dear John:

* } I have forwarded the urine samples collected on our last re-survey trip. You will also find included the urine samples that were collected by Conard on his more recent medical re-survey trip. Conard's samples supposedly represent a 24-hour collection, but I suspect that they are aliquots of a pooled sample.

Zigman and his group are working on dividing the remaining field samples of food, water and soil, and will forward these very soon.

Best regards,

Stan
