Radiation dosimetry x-ray facilities Ponape

Welcome to Brookhaven and I am sorry that I won't be here while you are.

Kindly contact Dr. Edward T. Lessard who will put together a package of thermal Luminescent dosimeter for us to use in measuring the x-ray escaping from the facilities in Ponape and to give estimates for the surface and transmitted dose for typical x-rays. It will not be necessary for us to carry Victoreen or other electronic measuring devices.

I hope that you, Bill Scott, Dr. Slatkin and Dr. Dobyms will be able to get the thyroid specimens in order and clearly indicate the missing material, so that I can initiate efforts to get it from the various hospitals that people have been operated in.

If you are inclined to play tennis speak to Marie Susa who will probably get you in on singles or doubles. If you don't have a tennis racket with you -- Betty can supply one for you.
