Radiation Intensity Readings
Rongerap Atoll 14 May through 6 July 1958

Background readings of 0.022 mR/hr have been subtracted
from readings plotted. Readings from 12 April through
13 May were at background.

Total accumulated dose from 12 April through 6 July 58
is calculated to be 193 mR.

NOTE: Times listed (dates) are given with time.
