SUBJECT: Potential Funded research . . Brookhaven, (con't)

4. This appears to me to be a potential funded program of value to USC and ISSM as well as the Medical School. I have made no contact with any USC individual and will not until we have a chance to discuss this in more detail. The timing is right if USC could act rapidly as there has been no advertising of this requirement to date.

5. The first step would be for a representative, or representatives, to contact Dr. Pratt and set up a visit to Brookhaven to discuss the project.
