Excerpt from "Clean Weapons"

MEMORANDUM FOR: Lewis L. Strauss, Chairman

Subject: National Policy on Clean Weapons

Dear Lewis:

You will recall that at the Commission meeting on June 24, 1956, you agreed to discuss the matter of clean weapons with the President. This I understand will be done on the occasion of your obtaining his approval to produce weapons during FY 1957 in the quantities proposed.

I recommend that the matter of clean weapons also be brought to the attention of the National Security Council. The NSC should develop a policy directive looking to the earliest possible integration of clean weapons into our stockpile and our defense planning.
