Dear Will:

The calculations and data on the Marshallese have been sitting on my desk for about six months and I have been unable to make head or tail of them.

I am scheduled to leave New York February 24th for my "annual vacation" in the Marshall Islands. Would it be possible for me to come to San Francisco a couple of days in advance to see you on either Saturday or Sunday and review these crazy numbers?

Please answer promptly (which will be unusual). I trust Jean and the children are fed up with your presence and that you are planning another trip. It will be nice to get together for a night in San Francisco, Sausalito, Berkeley, Oakland, San Mateo and any other place that has booze.

With kindest regards,

Sincerely yours,

  
Leo M. Meyer, M.D.
