healthcare  
 current sys (\$3.10<sup>6</sup>/yr from TT)  
 2 hosp. 66 bed Majuro  
 40 bed Ebeye (Kirij)  
 run down, not up to any standard  
 60-70 dispensaries run by <sup>"health assistants"</sup> ~~local people~~  
 no organized tpt (depends on  
 irregular coconuts ships)  
~~cost~~ <sup>80%</sup> of the \$3M spent on health care  
 at Honshulu (ind. sec. care) →  
 better exp. at ~~TT~~ would avoid this  
 cost failure to have an effective, comprehensive  
 health care system meeting dev. obj. status  
 rather than sys. depending on outside  
 support

Would need 7M/yr to improve (espec. if the  
 sec and add tertiary care for the extend that  
 referrals → otherwise are minimized)
