September 2, 1976

Dr. W. W. Burr, Jr.
Deputy Director
Division of Biomedical &
Environmental Research
U.S. Energy Research and
Development Administration
Washington, D.C. 20545

Dear Bill,

With regard to the plutonium problem on Bikini we would like to bring you up to date on (1) sample collections planned for Sept.-Oct. survey in the Marshalls; (2) samples still being analyzed from previous surveys, and (3) summary Tables of previous data comparing Rongelap and Utirik findings.

Samples for Sept.-Oct. 1976: Urines 1. Bikini: 5 gal. carboys on 5 individuals (carboys distributed last June); also 5 - 5 gal. pooled samples; 2. Rongelap: 5 - 5 gal pooled samples; 3. Utirik: 5 - 5 gal. pooled samples; 4. Wotje: 5 - 5 gal. pooled samples; 5. Ebeye: 5 - 5 gal. pooled samples; 6. Majuro: 5 - 5 gal. pooled samples and samples on 50 Bikini people planning to return in the near future. You will note we are collecting samples from a number of atolls not directly involved in the 1954 fallout.

Whole body gamma spectroscopy on Bikini people (for ¹³⁷Cs body burdens) originally planned for October are being delayed until April in hope that the advance group of Eniwetak people will have returned to their atoll and can also be counted during that operation.

N. Greenhouse, J. Naidu and V. Nelson plan on collecting soil and plant samples in Sept.-Oct. from Wotje, Ailuk, Utirik, Rongelap and Bikini.

Samples presently being analyzed are animal samples (pig, chickens, crabs from Rongelap and Bikini, water from Bikini cisterns, soil from Rongelap. Autoradiographs for alpha tracks of animal lung and liver tissues are being run.

The enclosed Tables have been compiled by N. Greenhouse, J. Naidu and me and include data from various sources. Many of the Tables are incomplete. We are attempting to pull together in one file all available data from personnel and environmental radiological surveys on Rongelap, Utirik and Bikini atolls. When this is accomplished we should be able to make more comprehensive comparative Tables on these atolls. We hope these data will be on hand for your planned meeting of the experts.

Sincerely,

Robert A. Conard, M.D.
