Same letter sent to:
Dr. William Mills, EPA
Adm. Monroe, DNA
Mr. Kopaken, Covington & Burling

August 2, 1979

Mrs. Ruth Van Cleve
Director, Office of
Territorial Affairs
Department of Interior
Washington, D. C. 20240

Dear Mrs. Van Cleve:

Enclosed is the preliminary draft report of the Livermore Dose Assessment for Enewetak Atoll.

Please be aware that since it is a draft report the content is yet subject to change. Undoubtedly there may be some alteration of the text and of the organization of the document. While it is not expected that the calculated dose values will change in a significant manner, there may be some revisions as additional information becomes available or as a result of further analyses or review.

A considerable volume of appendices will accompany this document. At present some of these are being completed or revised for easier presentation. Complete sets of appendices will be sent to you as soon as possible, probably within the next day or two.

I hope that this draft material will be helpful and informative to you. Any comments which you may wish to make would be appreciated, preferably by August 15. Please feel free to contact William Robison directly at the Lawrence Livermore Laboratory, or, if you wish, provide any comments to me.

Please let me know if we can be of any further assistance.

Sincerely,

BEST COPY AVAILABLE

Bruce W. Wachholz, Ph.D.
