Attention: Mr. C. L. Blue, Assistant Business Manager  
Subject: Sub contract #106

Dear Mr. Blue:

It has been my intent to write you sooner. However, it seemed advisable to await the return from EPO of certain hardware produced against the subject contract. This statement is made, as you are probably aware of the various conversations between our Mr. Timney and your Messrs. Betzel and Fleming relative to our possible use on another Government contract of some of these original hardware, and also in connection with the basic ASP meters, and such use would only be possible with the full approval of your office with a resultant amendment to the contract. Best regards used against sub contract #106.

The ASP meters are now in storage and I feel that I should be in accordance with you, though at the present time we have not fully agreed on the details of the use of the ASP meters. I will be glad to discuss this matter with you at any time. I will also be glad to discuss the details of the ASP meters, and the relative to our possible use of the ASP meters.

In the interim it would be desirable to have the ASP meters in the possession of the University of California, Livermore, California, and I will be glad to discuss the details of the ASP meters, and the relative to our possible use of the ASP meters.
