

AEC space propulsion program of \$37 million, and in plant and capital equipment funds for the NAL project of \$12.9 million.

TESTIMONY ON AEC'S FOOD IRRADIATION PROGRAM WAS PRESENTED BY COMMISSIONER RAMEY and AEC staff before the JCAE on July 18. Army witnesses also testified. The Committee is planning an additional session on July 30 to hear from the Food and Drug Administration.

DATA FROM THE 1967 RADIOLOGICAL SURVEY OF BIKINI ATOLL have been evaluated by an ad hoc committee of expert consultants and their conclusions and recommendations have been approved by the Commission. The committee concluded that the exposures to radiation that would result from the repatriation of the Bikini people to their native islands would not offer a significant threat to their health and safety. These natives had been relocated to other Pacific islands at the time of the Bikini nuclear tests in 1946.

The committee also recommended a number of measures to be followed which would further reduce exposure to radiation. The Commission is forwarding these recommendations to the Secretary of the Interior for appropriate action.

THE SECOND PHASE OF THE SNAP-19/NIMBUS-B SEARCH AND DETECTION OPERATION WAS RESUMED ON JULY 22. The two nuclear detectors were repositioned and the search
