4. Future Atomic Tests

General Nichols presented a draft memorandum to the JCS dated 28 February 1949 setting forth three proposed principles to be used in connection with planning for the next tests. After informal discussion of the draft memorandum, one copy was furnished to General McCormack for study by the AEC. General Nichols advised that if the AEC concurs in the draft, the MLC proposes to send the memorandum to the JCS. General McCormack pointed out that it would be appropriate for the AEC to insure that the President was acquainted with the proposed date for the next tests before a communication on the subject of organization of a Task Force is transmitted to the JCS.
