Honolulu, Ha waii, 96820

Dear Mr. Woltz:

May I introduce myself as the new BNL resident physician on Kwajalein, replacing Dr. Knudson. Having spent the greater part of last year as a T.T. physician on Ebeye, I am not exactly new to the area; however I am naturally a complete stranger to the DOE, Nevada and Honolulu inter-relationship, the various budgets of our operation, and just who does what. Therefore please bear with me during this introductory period.

Initially, I should like to inquire into our budget. Ted Murawski tells me that we began the November 1st fiscal year with \$55,000, of which ca. \$4000 remains. The lion's share of this apparently went for the out-islands medical trailer refurbishment and also for the recent Survey. Ted said that he was unable to give me a breakdown of either the exact total amount already spent, nor of the broad categories involved, and he suggested that I should write to you for this accounting. Further, would it be too much to ask to request a monthly statement?

On Tuesday last I mentioned this \$55000/4000 figure to Dr. Conard, who felt that it must be in error. If he has not already contacted you, could you also submit a copy of the account to him.

One final item is the \$10,000/yr. budget promised by Dr. Walter Weysen for the establishment and operation of a laboratory here on Ebeye. That was an oral committment, I have not seen it formalized in writing, nor do I know who handles the money. I would appreciate your looking into this for me. Thank you.

Yours very truly,
William J. Grant
