APR 6 1956

REPOSITORY NARA - College Park  
COLLECTION RG-326, 51-58 Secretary  
BOX No. 193 (NN3-326 43-00)  
FOLDER NRA 7 Redwing V.I. II

Dear Mr. Pauley:

As you will remember, the first of the 1956 series of nuclear weapons tests at the Pacific Proving Ground is planned for detonation on May 1, 1956. Thereafter, five additional large yield and various low yield shots are scheduled with the large yield shots being separated one from the other by approximately two weeks. So that high Government officials and others who play key roles in our atomic preparedness program may have opportunity to witness one of the important and larger shots, six official observer trips to the Proving Ground are being scheduled. Each trip, of course, will include only a small number of individuals in view of the limited accommodations available at the Proving Ground. It is planned that a special observer aircraft will leave Washington approximately six days ahead of the scheduled date of each high yield shot. The aircraft will proceed via Travis Air Force Base and Hawaii to Eniwetok; will remain in the forward area approximately four days; and then reverse its course returning to Washington.

In view of the University's vital role in our atomic weapons program, it is our hope that you and some of the other Regents may participate in one of the observer trips. On behalf of the Commission I wish to extend an invitation to you and to them. I am reserving tentatively three spaces of our over-all allocation for such attendance.

Because of the limitation on space I would appreciate early advice as to who may be able to attend. With this information in hand a member of my staff can contact each for finalization of plans.

Sincerely yours,

Lewis L. Strauss
