MEMORANDUM TO: General Manager ✓ *B*  
Director of Military Application  
Director of Information Services  
Director of Biology and Medicine

It is of the utmost urgency that there be nothing publicly issued concerning the MIKE shot in the IVY series except in cases of life and death emergency or of great pressure in the psychological strategy field.

There has been no final Presidential determination on the public reporting program for the series. This will not come until after November 5th. Until that time, any of you who feel that a public statement may be warranted should report immediately to me so that I may take the matter up for a judgment by the Special Committee on Atomic Energy of the National Security Council.
