Dear Sir:

COORDINATION DRAFT ANNEX Y TO DNA OPLAN 600-77 (DEMobilIZATION)

2. Concepts

The subject of transition of law enforcement procedures from the present TTPI-DNA agreement to whatever arrangement is contemplated after April 15, 1980, needs to be addressed. There have already been preliminary discussions held between TTPI (Scott Stege) with the CJTG. In addition the Chief of Police of the Marshalls, H. Wally Watring and Judith Knape, MLSC Attorney, have initiated correspondence concerning the assignment of an additional TTPI police officer for Japtan (not an H&N employee).

What is needed is a time phased agreement between TTPI and DNA on how and when the TTPI will assume the functions of both the Court and Law Enforcement.

The law enforcement arrangement which existed during the pre-mobilization phase of Enewetak (with the H&N Resident Manager and the Safety Officer also serving as TTPI police captains) is not feasible for even the period 15 April 1980 to June 1, 1980. It would appear that one solution might be for the TTPI to agree to assume the Court and Law Enforcement functions full time on April 15, 1980, with a reasonable period of redundancy before that date during which time the H&N/PTD people now performing these functions could "phase in" the people assigned to these tasks by the TTPI.

Appendix 3 to Annex Y, Page Y-3-3

4. Responsibilities

- a. As communications capability is reduced during the final phases of demobilization the problem of "coordinating" all demobilization resources by FCDNA will increase as will the volume of decisions.

It would appear reasonable to assign some level of authority to the CJTG to authorize disposition of resources.

During the mobilization of Enewetak, the Director of Logistics, FCDNA cited economy as the driving force to retain all, decision making in Albuquerque. Accordingly, it would appear that the efficient and economic utilization of all retrograde transportation opportunities would lead to a decision to give some disposition authority to the CJTG.

- c. All cleanup project participants have understood from the beginning of the Enewetak project, that if DNA Milcon funds were not available for the retrograde of project participant assets, then the owning agency would have to pay for the cost of such retrograde. However, to "pair" the DOE with TTPI, in effect identifies the DOE as a non-project participant in the Cleanup project and in effect changes the demobilization funding planning concepts spelled out in OPLAN 600-77.

An FCDNA command review of the decision on this matter is requested.

Generally, Draft Annex Y is a fine job and in keeping with the manner in which Col. John Hemler does things.

Sincerely,

Original Signed By
W. J. STANLEY
