Dr. Paul Kruger
Nuclear Science and Engineering Corporation
P. O. Box 10901
Pittsburgh, Pennsylvania

Dear Paul:

Under separated package I am sending you ten (10) samples which were collected by the University of Washington in late 1955. Dr. W. R. Boss, Division of Biology and Medicine, has requested that we send these to you for Total Activity and Sr-90 analyses. For identification, please use the numbers in the packages and type of sample. Will you report the results in d/m/sample?

These are the total amounts of sample which are available. We have analyzed several of these same samples and therefore, this would make a very nice intercomparison between our laboratories.

Hoping to hear from you soon

Sincerely yours,

Ira B. Whitney
Assistant Chief
Analytical Branch
Health and Safety Laboratory
