Dr. Hugh Bradner
University of California Radiation Laboratory
Berkeley, California

Dear Brad,

Please accept my personal congratulations on the heroic contribution made by the excellent group of scientists from the University of California Radiation Laboratory led jointly by you and Herb York. The facility with which your group plunged into the X-ray problem of Program 1, Operation Greenhouse and carried it to a most successful conclusion is all the more remarkable when one considers that the entire nonmetallic experiment was conceived and performed within little over one year.

The URM results will surely have a profound effect on the future of nuclear weapon development.

Your friend,

Frederick Seitz
Director, Program 1
Operation Greenhouse
