David L. Harver, Jr. Extension of Utilities

January 9, 1952

The following memorandum was received from Mr. C. L. East with regard to the extension of utilities for the Eninman Camp and is reproduced for your information and action:

"I wish to call your attention to the fact that in submitting current cost estimates for Eninman camp that the approved drawings nor the estimates covering these drawings include the extension of utilities beyond the camp area to serve the warehouse, shop, and dock area. Utility service for electrical, water, and possibly sewers will no doubt be required for this area. Without a drawing to substantiate an estimate for these facilities, current cost estimates will not be submitted. This is for your information and action."
