Mr. T. O. Jones
 Assistant Secretary to the Commission
 Haines Finley
 Division of Biology and Medicine
 CLASSIFICATION OF INFORMATION MEMO 89-90 AND OTHER MATERIAL
 ON THE RADIOBIOLOGICAL SURVEY OF THE BIKINI AND ENiwETOK
 LAGOONS.

1. This material was classified originally as TOP SECRET and SECRET when the project was planned as part of Operation Sandstone.
2. In transmitting later messages to the forward area a SECRET classification was maintained to assure appropriate handling.
3. As the result of recent releases on the Eniwetok Experiment and discussions with the Military Liaison Committee, the Division of Military Applications and the Navy Department, it is proposed to reduce the classification to RESTRICTED. The RESTRICTED classification will be maintained until such time as a joint release by the Navy Department and the AEC is made.
4. A letter from Dr. Warren to addressees and other recipients of correspondence on this project will be sent within a few days advising them that the classification has been lowered to RESTRICTED.
