Mr. Elmer B. Staats
Executive Secretary
Operations Coordinating Board
Washington 25, D. C.

Dear Mr. Staats:

Earlier this year I notified you of the forthcoming publication of two books carrying medical reports on the effects of the atomic bombing in Japan and on the Marshallese exposed by fallout in the course of a series of tests. The book carrying the report on medical effects of the atomic bomb in Japan has already appeared and I am enclosing a copy of it for your information.

Supplies of the volume were sent to some 100 technical and medical book outlets by McGraw-Hill, the publisher of the book, as part of a campaign other than the usual Government purchase program. This campaign is planned by the publisher.

The book on the Marshallese will probably be published by the Government Printing Office in the near future.

Very truly yours,
