Ц

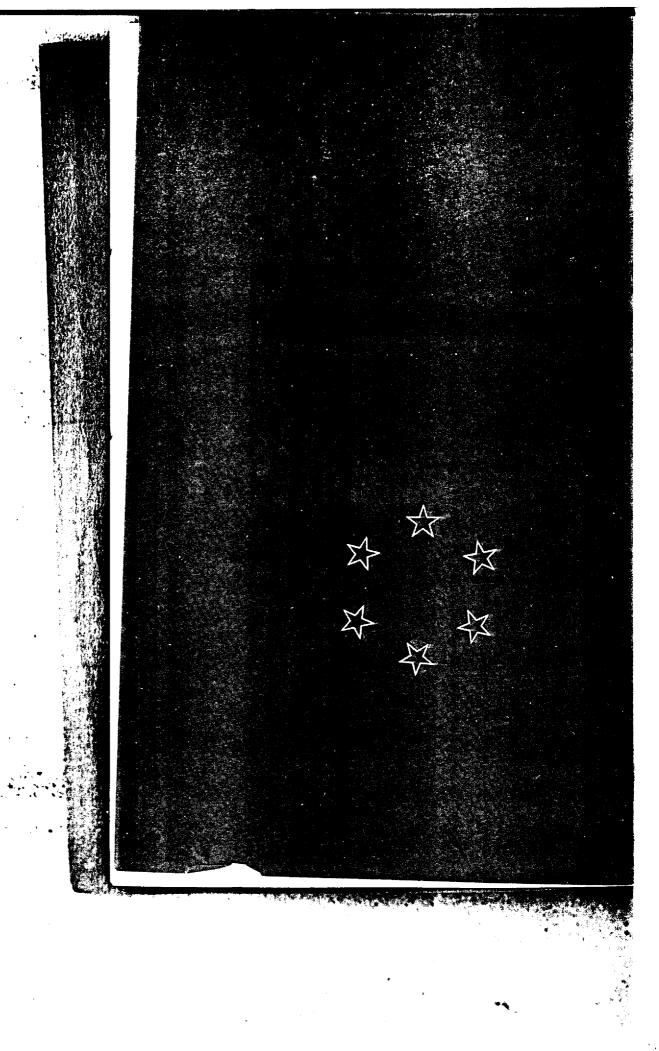

This report covering fiscal year 1968, is the twenty-first annual report by the United States to the United Nations, pursuant to article 88 of the United Nations Charter, on the administration of the Trust Territory of the Pacific Islands.

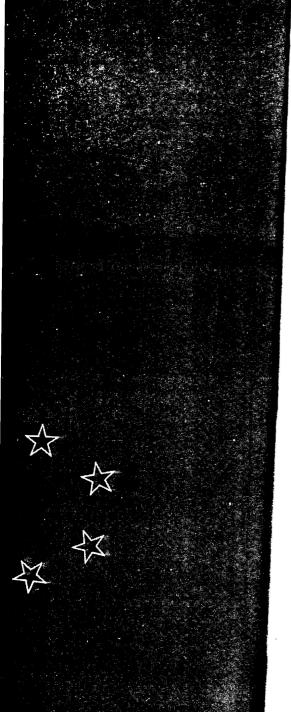

Previous reports in the series were published by the Department of the Navy, 1948 to 1951, and the Department of the Interior 1952 and 1953.

The material for the present report was furnished by the Department of the Interior.

# GENERAL DESCRIPTION OF THE TRUST TERRITORY

The Trust Territory of the Pacific Islands covers some 3 million square miles of the Western Pacific Ocean just above the equator, ranging from about 1° to 22° north latitude and 130° to 172° east longitude. The Territory embraces more than 2,000 islands and islets, lying in three major archipelagoes: the Carolines, the Marshalls, and the Marianas. The latter archipelago, however, includes Guam which is not part of the Trust Territory, but rather is an unincorporated territory of the United States.

The entire area, including the Gilbert Islands which lie to the south of the Marshalls and are not part of the Trust Territory, is often called Micronesia, or the "Tiny Islands." Anthropological evidence and studies indicate that the present Micronesian population probably originated in Southeast Asia and Malaysia.

Resemblances and interrelationships among the Micronesians are many. Differences in customs and in the nine major languages of the Territory do exist, however, and generally correspond to the six administrative districts of the Territory.

Fiscal Year 1968

Four districts—Palau, Yap, Truk and Ponape—lie within the Carolines archipelago. The Mariana Islands District and the Marshall Islands District lie in separate archipelagoes of the same respective names. The Provisional Headquarters of the Trust Territory Administration remains on Saipan in the Mariana Islands District.

The Mariana Islands District, comprising 183 square miles, has the largest land area. Palau and Ponape are slightly smaller with 178 and 176 square miles, respectively. The Marshall Islands District covering 70 square miles, and Yap and Truk Districts with 46 square miles each, are much smaller.

Total population at the end of fiscal year 1968 was 94,469. Truk District is the largest, with 26,368, followed by the Marshall Islands District, 18,998; Ponape District, 18,877; Palau District, 11,904; Mariana Islands District, 11,452; and Yap District, 6,870.

#### Climate

Temperatures generally range from the mid-70's to the mid-80's and are

relatively uniform. Rainfall is heavy and humidity averages 80%. Seasonal changes vary throughout the Territory but most islands have pronounced wet and dry seasons.

The islands of the Territory lie in an area of the Western Pacific where major ocean storms both develop and strike. Islands of the Palau, Yap, and Marianas Districts were struck by strong typhoons in late 1967. In April 1968, the disastrous Typhoon Jean struck the Caroline Islands and developed to full intensity as it passed the Marianas, causing an estimated \$16 million in damage. The American Red Cross and the Armed Forces on Guam provided immediate assistance. The President of the United States declared the area a major disaster area and emergency funds were provided.

#### **Physical Characteristics**

The more than 2,000 islands of the Territory range from large volcanic islands to tiny coral islets linking the circular chain of rock and vegetation which forms a coral atoll. Most islands in the Eastern Carolines and the Marshalls are of coral formation.

Remnants of a vast undersea volcanic ridge, stretching southward from Japan along the western perimeter of the Territory, form the Mariana and Western Caroline Islands. The Marianas, exclusive of Guam, are a sizable volcanic archipelago of over 180 square miles of land area-Saipan alone comprising 46 square miles. To the east of this archipelago, the Eastern Carolines and all of the Marshall Islands rest on another series of submarine elevations. The largest islands in the Territory are Babelthuap, Palau District, and Ponape Island, Ponape District. Islands of the Territory range in height from about 6 feet on a coral

atoll to the 3,166 feet of Agrihan Island in the Marianas.

#### Flora

Vegetation varies considerably from high island to low atoll, though coconut and breadfruit trees are common to both. Coral atolls are particularly characterized by the coconut palm and its related plant associates—breadfruit, pandanus and plants of a shore nature. The high volcanic islands, on the other hand, usually have mangrove swamps on the tidal flats, coconut vegetation on the slopes, and mixed forest growth on the uplands.

#### Fauna

The only presumably native land animals in the Territory are two species of insect-eating bats and two species of fruit bats. These animals are not on all islands but do occur on both high islands and atolls. Dogs, pigs, and one species of rat were introduced by migrating islanders prior to Western and Oriental contact. Three additional species of rats entered the area after Western and Oriental contact. Sometime after World War II, a species of oriental shrew got into the area and is now found in the Marianas, Truk, and the Marshalls. The water buffalo or carabao was introduced to the Marianas from the Philippines by the Spanish and subsequently spread to Ponape and Palau. Horses, cattle, goats and cats were introduced in the post-European contact period. Deer were introduced into the Marianas by the Germans and later carried to Ponape.

Marine and shore birds abound in the area. These include terns, albatross, booby, tropic birds, golden plovers, frigate birds, shear-waters, several species of herons and a cormorant. One species of rare fresh

Part I-Introduction

water duck is found in the Marianas and another in Palau. Several species of ducks migrate through the Territory. Relatively few species of resident land birds can be found, especially on the atolls. There are, however, various species of flycatchers, warblers, honey eaters, starlings, finches, thrushes, kingfishers, gallinules, rails, doves, pigeons, parrots, cockatoos, megapodes or mound builders, vireos, swiftlets, owls, hawks, ospreys, bitterns, nightjars, drongoes and white-eyes. Cuckoos, swallows, falcons and some other species of land birds migrate through the Territory. There are several species of introduced birds.

Two species of crocodiles (the salt water crocodile and the New Guinea crocodile) are found in Palau. One species of small blind burrowing snake is found on most of the islands in the Territory. Two species of highly venomous sea snakes are found in Palau with one of them also present in the Marshall Islands. Also, in Palau are a tree snake, a mangrove snake, a boa, and a rare golden burrowing snake. None of these are venomous. A large monitor lizard (up to 6 feet) is found on many high and low islands. Other lizards, geckoes, and skinks of several species are abundant throughout the Territory.

A rich marine fauna exists in the open sea, reefs, lagoons and shore areas. Species of fish include tuna, barracuda, sea bass, sharks, eels, snappers, stone fish, lion fish, flying fish, porcupine fish, gobies, archer fish, flounder, butterfly fish, surgeon fish, trigger fish and many others. Other marine organisms such as starfish. spiny lobsters, crabs, sea cucumbers, octopi, clams, oysters, snails and sea urchins are abundant. Porpoises are common but whales are rare. The dugong or sea cow, a marine mammal,

is found in Palau but is rare; threat of its extinction has resulted in district laws for its protection.

More than 7,000 species of insects are known to be in the Territory, of which perhaps 15% have been introduced by man. Some 45% are found throughout all the islands, while the rest are endemic to specific areas.

#### Ethnic Background

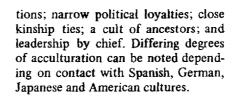

بقرار فيعطس بأريان المعاشيك ومطول كغا المراهيات

The people of the Trust Territory are classified as Micronesians, except for about 1,000 inhabitants of the islands of Kapingamarangi Nukuoro and a scattering of individuals of other racial groups.

Physically, the Micronesians are characterized by medium stature, brown skin, straight to wavy black hair, relatively little face and body hair, and rather high cheekbones. People of the Eastern Carolines tend to have stronger Malaysian characteristics than those elsewhere in the region. A true Polynesian type is found in Kapingamarangi and Nukuoro. Today's Chamorro inhabitants of the Mariana Islands differ considerably from the original Chamorro inhabitants whose skeletal remains indicate they were a largeboned, tall and robust people. A complex blending of several racial elements over many generations has produced the Chamorro of today.

Traditional customs differ among the districts as the scattered and isolated islands have led to local adaptations and inventions. There has been a basic similarity throughout, however, in general cultural characteristics such as a fine adjustment to life in a small tropical isle; a specialized technology using stone, shell, fibers and other local materials; complex class distinc-

Fiscal Year 1968

#### Language

Great differences in language exist in Micronesia, although each island language has a common Malayo-Polynesian source. Nine major languages, with dialectal variations, are spoken in the Territory: Palauan, Chamorro, Ulithi-Woleai, Yapese, Trukese, Ponapean, Kusaiean, Marshallese and Kapingamarangi-Nukuoro. Some linguists add a tenth language, Sonsorolese-Tobian of Southwest Palau. These languages are in everyday use and most people know only the language of their home island. In those islands where the Japanese influence was strongest many older people know at least conversational Japanese.

#### Social Structure

A matrilineal society was common throughout the area, except in Kapingamarangi and Nukuoro. The basic political unit in the Central Carolines was the local community, made up of several lineages tracing descent from a common female ancestress. Elsewhere social organization was more complex. In the prehistoric Marshalls, a number of petty, warring and unstable feudal states arose accompanied by stratification into several social classes. An even greater degree of social stratification developed in Kusaie, Palau, Yap, and the Marianas. This reached a peak on Yap where five of the original nine distinct social classes are still recognized today. Yap also dominated a loosely organized economic-religious empire which extended far to the east in the Carolines. The people of Ponape

competed for social status through a complex system of bestowed titles. Much of the old pattern is still maintained.

#### **Population Movements**

Before European contact some travel took place between adjacent island populations in spite of vast distances, social differences, and clan wars. Yap islanders sailed their large canoes to Palau to quarry the famous Yapese stone money from Palauan quarries. Other Yapese canoes regularly plied to and from Guam. Trading voyages were made from the westcentral Carolines to the Marianas where Yapese colonies apparently existed. In the Marshalls, sailing trips to the islands and atolls were made throughout the area as well as to Kusaie. Considerable trading, visiting and, very likely, war raiding took place.

After Japan assumed control of the area, some displacement of local population occurred. The Chamorros and Carolinians on the islands of Saipan and Rota were moved from their original homes to settlements along the margins of the large Japanese communities. During World War II extensive dislocation of the islanders occurred. Where possible, the Administering Authority has returned displaced islanders to the places they considered to be home.

Resettlement of the Bikini and Eniwetok people who were moved outside the area of the Pacific Proving Ground has created problems of adjustment to the new environment.

Early in 1966 at their request, the people of Ebadon and Arbwe Islands in the Kwajalein Atoll returned to their homes after living on the island

competed for social status through a complex system of bestowed titles. Much of the old pattern is still maintained.

#### **Population Movements**

Before European contact some travel took place between adjacent island populations in spite of vast distances, social differences, and clan wars. Yap islanders sailed their large canoes to Palau to quarry the famous Yapese stone money from Palauan quarries. Other Yapese canoes regularly plied to and from Guam. Trading voyages were made from the westcentral Carolines to the Marianas where Yapese colonies apparently existed. In the Marshalls, sailing trips to the islands and atolls were made throughout the area as well as to Kusaie. Considerable trading, visiting and, very likely, war raiding took place.

After Japan assumed control of the area, some displacement of local population occurred. The Chamorros and Carolinians on the islands of Saipan and Rota were moved from their original homes to settlements along the margins of the large Japanese communities. During World War II extensive dislocation of the islanders occurred. Where possible, the Administering Authority has returned displaced islanders to the places they considered to be home.

Part I-Introduction

of Ebeye for about 6 months. They were originally relocated to Ebeye along with residents of the Kwajalein mid-atoll corridor. In April 1966, the people of Lib, some 234 individuals who had voluntarily left their island for Ebeye several years before in connection with a defense project, also returned to their 230-acre island where a complete new village had been built for them.

#### History

Micronesia has been known to the western world since 16th-century Spanish and Portuguese explorers first visited the islands. Later explorers, traders, and whalers included the British, Germans, Russians, Japanese, and Americans.

In the 19th century, development of a lucrative copra trade brought about conflict between Germany, Spain, and Great Britain, resulting in German control over the Marshalls, and Spanish sovereignty over the Carolines. In 1898 the United States acquired Guam following a war with Spain. In 1899, Spain withdrew from the Pacific and sold all her remaining possessions to Germany.

Germany's administration, which encouraged development of trade and production of copra, was terminated in 1914 when Japanese naval squadrons took over military possession of the Marshalls, Carolines, and Marianas at the outbreak of World War I. Japan began its formal administration by mandate of the League of Nations in 1920.

After the United States entered World War II in 1941, Micronesia assumed vital importance in the Pacific campaign and much bitter fighting took place before the area was secured by U.S. forces.

In 1947, the Marshall, Caroline, and Mariana Islands, except Guam, became a United Nations Trusteeship administered by the United States.

### MAJOR EVENTS OF THE YEAR

Speaker. Representative Ambilos Ieshi of Ponape was selected House floor leader

August 1967

The Third Regular Session of the Congress of Micronesia adjourned after enacting 48 of 173 bills introduced during the session. Forty-one acts were signed into law by the High Commissioner. Among the major items of legislation was a law creating a Social Security System for Trust Territory citizens.

July 1967

The Third Regular Session of the Congress of Micronesia convened. The Honorable John O. Ngiraked of Palau was elected President of the Senate and the Honorable Olympio T. Borja of the Marianas was chosen as Vice-President. Senator Amata Kabua continued to serve as the Senate floor leader.

The House of Representatives reelected the Honorable Bethwel Henry of Ponape as Speaker and the Honorable Petrus Mailo of Truk as Vice-

Fiscal Year 1968

The administration of justice was strengthened with the appointment of a second Associate Justice. The Honorable D. Kelly Turner, former Deputy Attorney General of the Territory, was sworn in by the High Commissioner.

Leo A. Falcam, a Ponapean and former Assistant District Administrator for Administration in Ponape, was appointed Special Assistant to the High Commissioner.

#### October 1967

The Honorable Benjamin T. Manglona of Rota, Representative, Congress of Micronesia, represented the Trust Territory at the Seventh South Pacific Conference. He also served as an adviser to the U.S. delegation to the 30th South Pacific Commission Session which followed the Conference.

#### November 1967

The Congress of Micronesia's Future Political Status Commission held its organizational meeting in Saipan and elected the Honorable Lazarus E. Salii of Palau as chairman. The Assistant Director of the Department of the Interior's Office of Territories met with the Commission on matters relating to its mission.

After completing summer and fall training programs in Udot, Truk District, 240 Peace Corps Volunteers began assignments throughout the Territory, bringing the number of Volunteers in the Territory to 647.

Two typhoons inflicted major damage in the Territory. Typhoon Emma struck Yap, damaging roads, public facilities, and several private

homes before passing over northern Palau where it also caused damage Typhoon Gilda struck Rota, Mariana Islands District, causing extensive damage to crops, private homes, and government buildings and facilities.

Due to increasing responsibilities in education and health programs, the Department of Community Services was separated into a Department of Education and a Department of Public Health. Dr. William M. Peck, who assumed the position of Director of Public Health in June 1967, was appointed Assistant Commissioner for Public Health.

#### December 1967

The Territory's first first-class hotel, the Royal Taga, opened in Saipan, Mariana Islands District. The three-story, \$800,000 structure will be expanded from 54 to 100 rooms.

#### January 1968

Nine members of the U.S. House of Representatives and three members of the Senate Committees on Interior and Insular Affairs visited the Territory on separate 3-week inspection tours. The House members were accompanied by the Assistant Secretary of the Interior. During their visit, the delegations met with the Congress of Micronesia's Future Political Status Commission and leaders from all six districts, and also visited many remote islands.

Hawaii Architects and Engineers, under contract to the Trust Territory to prepare physical development master plans for all district centers and for Ebeye and Carlson Islands, submitted its pre-final plan to the High Commissioner.

Hawaii Architects and Engineers, under contract to the Trust Territory to prepare physical development master plans for all district centers and for Ebeye and Carlson Islands, submitted its pre-final plan to the High Commissioner.

Part I-Introduction

The Honorable Edward P. Furber retired after 22 years as Chief Justice of the Trust Territory. He was succeeded by Dr. Robert K. Shoecraft, former Attorney General of the Territory.

The Final Report: Planning for Education and Manpower in Micronesia and Summary Report was received from the Stanford Research Institute and was distributed throughout the Territory.

#### February 1968

The High Commissioner presented to the Appropriations Committees of the U.S. House and Senate a statement in support of the Territory's \$34 million budget request for fiscal year 1969.

Under the provisions of Public Law 2-2 of the Congress of Micronesia, a four-member Trust Territory Personnel Board held its first meeting. The Board gives Micronesian government employees a voice in the formulation and implementation of the administration's personnel policy applicable to Micronesians.

#### March 1968

Donald R. Tindal, who came to Micronesia in April 1967 as Assistant Attorney General of the Territory, was appointed Attorney General.

#### April 1968

Typhoon Jean moved through the Truk and Mariana Islands Districts, wreaking havoc in the Mortlock and Hall Islands through heavy sea action and then devastating Saipan, Tinian, and the Northern Marianas with winds up to 150 knots. In addition to emergency relief provided by the Red Cross

Fiscal Year 1968

and U.S. Armed Forces, the combined Trust Territory and Office of Emergency Planning contribution to emergency and permanent restoration of the affected areas will be about \$15 million.

#### May 1968

Air Micronesia took over the operation of air service in Micronesia, bringing jet service to the Territory for the first time. Air Micronesia, a corporation formed by Continental Airlines, Aloha Airlines and the United Micronesia Development Association, is committed to a program of training for Micronesian personnel and to a substantial contribution to the development of tourism in the Territory.

The M/V James M. Cook, the newly acquired Trust Territory administrative vessel, departed Saipan for its first voyage in Micronesia. The ship's services will be in the fields of public health, education, and community development.

Congress of Micronesia Senator Bailey Olter and Representative Lazarus E. Salii made a 45-day tour of the U.S. mainland, Puerto Rico, the Virgin Islands, and Hawaii. The two members of the Future Political Status Commission traveled under the auspices of State Department Leader Grants.

Harold W. Burnett, Attorney General of Guam since 1962, was appointed an Associate Justice of the Trust Territory. He will assume duties on July 1, 1968.

#### June 1968

High Commissioner W. R. Norwood, serving as special representative on the U.S. Delegation, appeared

before the 35th Session of the U.N. Trusteeship Council. Senator Isaac Lanwi, Representative Jacob Sawaichi, and Assistant Commissioner for Public Affairs N. Neiman Craley, Jr. accompanied the High Commissioner.

The Micronesian News Service was established to provide comprehensive news coverage of the Fourth Regular Session of the Congress of Micronesia. The staff of 12 includes seven Micronesian trainees from all districts.

Natural disasters continue to hinder the Territory's development. Typhoon Jean struck Truk and the Mariana Islands in April 1968 causing damage such as this to a school in Saipan. Over \$15 million in emergency funds have been made available for restoration.

### PART II

# STATUS OF THE TERRITORY AND ITS INHABITANTS

#### Status of the Territory

The legal status of the Territory is defined by:

- (a) The trusteeship agreement between the United States and the United Nations Security Council which entered into force on July 18, 1947, under which the United States administers the Territory.
- (b) United States Public Law 451, June 30, 1954, as amended, which states that until Congress determines otherwise, the President shall provide for the civil administration of the Territory.
- (c) Executive Order No. 11021 of the President of the United States, signed May 7, 1962, placing in the Secretary of the Interior responsibility for the civil administration of the Territory.
- (d) Secretary of the Interior's Order No. 2876 of January 30, 1964, describing the nature and extent of executive authority exercised by the

High Commissioner and the judicial authority vested in the courts of the Trust Territory.

- (e) Secretary of the Interior's Order No. 2882 of September 28, 1964, as amended, creating the Congress of Micronesia and granting to it certain legislative authority.
- (f) United States Public Law 90-16, signed May 10, 1967, providing for appointment of the High Commissioner by the President by and with the advice and consent of the Senate.
- (g) The Trust Territory Code of December 22, 1952, as revised on October 10, 1966, and amendments.
- (h) Public laws enacted by the Congress of Micronesia not included in the Code.

#### Status of Inhabitants

 $\Im(de^{(S_{n+1}^{(n)})})$ 

The Trust Territory Code defines citizens of the Territory as all persons born in the Territory except those who, though born in the Territory, at

Fiscal Year 1968

birth or otherwise acquire another nationality. A child born outside the Territory of parents who are citizens is considered a Territory citizen while under age 21, and thereafter if he becomes a permanent Territory resident while under 21.

Naturalization may be granted to persons over 18 years of age. To be naturalized a person must have been born of parents at least one of whom was a citizen of and maintained his principal residence in the Territory. Children of parents who become citizens in this manner are also eligible for naturalization. Applicants for naturalization must be permanent residents of and legally domiciled continuously in the Trust Territory for at least 5 years

immediately prior to application  $f\varepsilon$  citizenship. Naturalized citizens enjo the same status as natural bor citizens. To date some 165 individual have been granted Territory citizer ship through naturalization.

The High Commissioner may gran non-Micronesian immigrants per manent residence status.

Citizens and resident noncitizens of the Territory can acquire U.S. citizentship in the same manner as do othe immigrants to the United States.

The same laws govern all residents in the Territory whether they are citizens, resident noncitizens, or visitors.

The Third Regular Session of the Congress of Micronesia in Joint Session listens to the High Commissioner's State of the Territory Message.

### PART III

# INTERNATIONAL AND REGIONAL RELATIONS

#### International Relations

The Trust Territory cooperates with the United Nations and its specialized agencies as well as with other international organizations. Official relations with international organizations are conducted through the U.S. Department of State. A list of international agreements applying to the Territory in 1968 appears in Appendix A.

During the year under review, the director of Land Management attended a 2-week International Seminar on Land Taxation, Land Tenure, and Land Reform in Developing Countries, held in Taiwan and sponsored by the Republic of China in conjunction with the United Nations.

Recipients of U.N. fellowships during the year were the mayor of Koror, who studied public administration in the Philippines, New Zealand, and Western Samoa; and a Mariana Islands District administrative assistant, who studied public administration in the Philippines. To date, 43 Micro-

nesians have received U.N. fellowships for observation and training outside the Territory.

The Territory is part of the Western Pacific Region of the World Health Organization (WHO). The Department of Public Health uses standards of the WHO in such areas as communicable disease reporting and quarantine regulations. The WHO provides to the Territory fellowship assistance, services of technical experts, and invitations to attend specialized training courses and conferences.

Micronesians who traveled abroad this year to study under WHO auspices were: two sanitarians on 1-year fellowships for sanitation at the Fiji Medical School; two dental officers, for dental health, in Australia; the Yap district director of public health, for public health administration, in the Philippines; the Ponape district director of public health, for public health administration, in Hawaii; the Marianas health educator, for health education, in New Guinea; and the head nurse in the Marshalls, for post-graduate

The National States

Fiscal Year 1968

nursing work in public health, in New Zealand.

To date, 15 Micronesians have received WHO fellowships for training outside the Territory.

WHO visitors to the Territory this year included a consultant anesthesiologist, who visited Saipan to discuss training of Micronesian personnel in anesthesia, and the WHO representative in Taiwan, who conferred with Department of Public Health officials on the WHO program for 1970. A lecturer in social and preventive medicine from the Fiji School of Medicine discussed training for Territory students who plan to enter the Fiji Medical School.

#### **Regional Relations**

The United States is a member of the South Pacific Commission (SPC). an advisory and consultative body set up in 1947 by the governments then responsible for the administration of island territories in the South Pacific region. Present members are Australia, France, New Zealand, the United Kingdom, the United States, and Western Samoa. The SPC's purpose is to advise participating governments on ways to improve the well-being of the people of the Pacific island territories in health, economics, and social matters. Each year the Trust Territory receives valuable assistance from the SPC's varied programs.

A Congress of Micronesia Representative from the Mariana Islands District was the Trust Territory's delegate to the Seventh South Pacific Conference in Noumea, New Caledonia, in October 1967. He also served as an adviser to the U.S. delegation to the SPC's 30th Session which followed the Conference.

SPC visitors to the Territory during the year included the SPC executive officer for social development, who conferred with Administration officials on SPC programs for fiscal year 1969; an SPC agriculturist who visited the Mariana Islands and Ponape as a consultant on animal husbandry, pasture improvement, and atoll agricultural development; an oral English specialist who visited all districts to assist in training new Peace Corps Volunteers, and a rat control expert. Two SPC specialists came to Saipan to assist in a 2-week sanitation training course for 34 Trust Territory workers. The Second Trust Territory Land Management Conference, also held in Saipan, had the assistance of a land tenure consultant who reported on land tenure in relation to economic development.

The SPC, in cooperation with the U.N. Food and Agriculture Organization, sponsored a fisheries training course in Palau which was attended by students from several SPC countries.

Territorial representatives also participated in SPC-sponsored seminars and meetings outside the Territory. The director of dental services attended a seminar on dental health in New Guinea; representatives of the Sanitation Division attended both a housing sanitation seminar in Niue, and a joint SPC/East-West Centersponsored Asian Pacific Interchange on Rodent Control in Honolulu; and three Micronesian women studied home economics at the SPC Community Education Center in Fiji. Agricultural officials attended technical meetings on agricultural education in Noumea, on coconut production in Rangiroa, and on plant protection in American Samoa. Two Micronesians took a regional course in Cooperation and Business Methods in Fiji.

Part III-Introduction

Among other regional contacts during the year, four Micronesian leaders and their wives traveled to Nauru at the invitation of the Government of Nauru, for the independence ceremonies in January 1968. The Fisheries Management biologist attended the Philippine-United States Workshop on Fisheries and Oceanography in Manila.

Hundreds of small single-side band radios like this one connect remote islands and atolls with district centers. These radios have helped save human life in emergencies.

Fiscal Year 1968

#### PART IV

# INTERNATIONAL PEACE AND SECURITY

#### Maintenance of Law and Order

In accordance with Sections 240, 241 and 242 of the Code of the Trust Territory, the Insular Constabulary is responsible for maintaining law and order within the Territory. The Constabulary is an armed, uniformed, and trained group of men and women divided into six district detachments. Each district Constabulary unit is responsible for the maintenance of law and order, local defense, criminal investigation, service of legal process, fire protection, and the administration of penal institutions within its district.

The Insular Constabulary functions under the general supervision of the Attorney General, while technical supervision and direction is provided by the Director of Public Safety. Immediate supervision in each district is the responsibility of the district sheriff under the district administrator.

In fiscal year 1968, Constabulary units consisted of 6 sheriffs, 8 deputy sheriffs, and 173 Constabulary staff members.

During the year, 20 police officers from all districts attended a 10-week course in criminology at the Guam Police Academy, University of Guam, and 18 officers were scheduled to attend the course in the summer of 1968. The Administration will continue to send police officers to future courses offered by the University. Police training has been augmented by the participation of the District Attorney, Assistant District Attorney, and Peace Corps Volunteer attorneys in all districts.

Rules and regulations for the Constabulary provide for the proper training of police officers, for a system of classification for the police force, and a merit system to provide a systematic method of promotion of police officers based on efficiency, service, and outstanding performance of official duties. Specific provisions govern standards of employment, including age requirements, qualifications, pay, equipment, leave and subsistence.

#### Collective Violence

No instances of collective violence or disorder occurred during the year.

The Trust Territory Administration is seeking to promote and establish effective legislative, executive, and judicial institutions of territorial and local government, to encourage a concept of a unified Micronesia, to develop Micronesian participation in government policy-making and planning, and to broaden information and political education programs. The development of political competence and understanding has progressed at an accelerating pace through the deliberation and legislative actions of the 3-year-old Congress of Micronesia.

Chapter 1

GENERAL POLITICAL STRUCTURE

Executive and administrative authority of the Government of the Territory and responsibility for carrying out the international obligations undertaken by the United States with respect to the Territory are vested in a High Commissioner, formerly appointed by the Secretary of the Interior but in the future to be appointed by the President of the United States and confirmed by the U.S. Senate.

Legislative authority rests with the bicameral Congress of Micronesia as specified by the Secretary of the Interior's Order 2882, as amended.

Fiscal Year 1968

Judicial authority is independent of the other two branches of Government and is vested in the High Court of the Territory and such other courts as may be established by law. The Chief Justice and two Associate Justices of the High Court are appointed by the Secretary of the Interior.

the state of the s

The authority and responsibilities of territorial, district, and municipal governments are delineated by Public Law 1-6, enacted by the Congress of Micronesia in 1965.

## Recognition of Indigenous Institutions and Customs

Local customs are recognized if they are not in conflict with the laws of the Territory, with the principles of the Trusteeship Agreement, or with applicable laws of the United States, including executive orders of the President and the Secretary of the Interior.

Chapter 2

TERRITORIAL GOVERNMENT

Under Public Law 1-6, the Territorial Government has prime responsibility for problems of a Territory-wide nature:

- Construction and maintenance of primary roads and harbor facilities
- Control of banking
- Organization of business corporations, business associations, credit unions and cooperatives, insurance, sale of securities, and public utilities
- Control of the establishment and operation of, and investment in, businesses and conditions under which importing and exporting licenses shall be issued
- Making of grants to districts and municipalities
- Exclusive control of import, export, and income taxes
- Support of all judicial activities except for assistance from municipalities
- Support of public education and public health
- Law enforcement

#### Legislative Branch

The Congress of Micronesia is a bicameral legislature, consisting of a Senate and a House of Representatives. There are 12 Senators, two elected at large from each of the six districts for 4-year terms. The House of Representatives has 21 members elected for 2-year terms from singlemember election districts of about equal population. The present apportionment of Representatives is: Mariana Islands District, 3; Marshall Islands District, 4; Palau District, 3; Ponape District, 4; Truk District, 5; and Yap District, 2.

Members of Congress are chosen is biennial elections in even-numbered years by secret ballot of residents who are citizens of the Territory, 18 year of age or over, and registered voters. A regular session of the Congress, which may continue for 30 consecutive calendar days, is held each year beginning the second Monday of July. The High Commissioner may call a special session whenever he deems it in the public interest.

The legislative power of the Congress of Micronesia extends to all appropriate subjects of legislation. except that no legislation may be inconsistent with treaties or international agreements of the United States, laws of the United States applicable to the Territory; Executive Orders of the President of the United States and orders of the Secretary of the Interior; or Sections 1 through 12 (Bill of Rights) of the Trust Territory Code. Further, the Congress may not impose any tax upon property of the United States or of the Territory, nor may it tax the property of nonresidents at a higher rate than that of residents. The Congress also has power to appropriate funds available from revenues raised pursuant to Territory tax and revenue laws and to review and make recommendations on the High Commissioner's proposed requests for funds to be appropriated by the United States Congress.

During the year under review, the Secretary of the Interior issued Amendment No. 3 of Order No. 2882, the document which provides for the authority and organization of the Congress of Micronesia. The Amendment concerns the passage of bills, the conduct of elections should a natural disaster prevent balloting on the appointed day, and revenues appropriable by the Congress. (The Amendment is reproduced in Appendix B.)

Further, the Congress may not impose any tax upon property of the United States or of the Territory, nor may it tax the property of nonresidents at a higher rate than that of residents. The Congress also has power to appropriate funds available from revenues raised pursuant to Territory tax and revenue laws and to review and make recommendations on the High Commissioner's proposed requests for funds to be appropriated by the United States Congress.

During the year under review, the Secretary of the Interior issued Amendment No. 3 of Order No. 2882, the document which provides for the authority and organization of the Congress of Micronesia. The Amendment concerns the passage of bills, the conduct of elections should a natural disaster prevent balloting on the appointed day, and revenues appropriable by the Congress. (The Amendment is reproduced in Appendix B.)

Part V-Political Advancement

The Third Regular Session of the Congress of Micronesia took place from July 10 to August 8, 1967. During the session, the Congress passed 48 bills and adopted 30 joint resolutions. Eighty-four single house resolutions were also adopted. The High Commissioner approved and signed into law 41 bills and withheld his approval on the remaining seven, in most cases because of certain technical defects. (A list of the bills and the action taken by the High Commissioner on each is included in Appendix C.)

The state of the s

Among major items of legislation passed were Public Law No. 3-40 creating a Social Security System; Public Law No. 3-32 providing for improved administration of the tax laws; Public Law No. 3-41 setting up a Board of Land Surveying Examiners; and laws appropriating a total of \$532,500 for programs and projects in the six districts.

Activities of the Congress following the Third Regular Session included organization of its Future Political Status Commission and studies of the Interim Committees on Education appointed by each house. In February 1968, the President of the Senate, the Chairman of the House Appropriations Committee, and the Legislative Counsel of the Congress traveled with the High Commissioner to Washington, D. C., to appear before the Appropriations Committees of the United States Congress in support of the Territory's budget requests. For the second successive year, one Senator and one Representative were advisers to the U.S. delegation to the Trusteeship Council.

#### **Executive Branch**

Working under the High Commissioner are a Headquarters staff, de-

scribed below, and six district administrations. All officers function under the Trust Territory Code and the Trust Territory Manual of Administration.

The Office of the High Commissioner consists of the Deputy High Commissioner, the Attorney General, the Special Assistant and the Assistant Commissioners for Administration, Education, Public Affairs, Public Health, and Resources and Development. The Internal Auditor and the Public Defender are also attached to this office.

The five Assistant Commissioners and the Attorney General perform both line and staff functions in assisting the High Commissioner in over-all direction of the executive branch. With the Deputy High Commissioner, they also serve collectively to advise the High Commissioner on matters of policy and program, functioning as a de facto "cabinet."

Under the various Assistant Commissioners are department or division heads and specialists responsible for the technical direction of their program operations throughout the Territory, and for provision of necessary staff, professional and technical services.

Several organizational changes took place during the year under review. The Departments of Education and Public Health, previously under supervision of an Assistant Commissioner for Community Services, are now each headed by an Assistant Commissioner. The former Department of Public Works and the Engineering and Construction Service were combined into a new Department of Public Works responsible for design, construction, operations and maintenance.

The way have

Fiscal Year 1968

The position of Special Assistant to the High Commissioner was reactivated and filled by a Micronesian who formerly was Assistant District Administrator for Administration of Ponape. Two new boards established by law by the Congress of Micronesia-the Trust Territory Personnel Board and the Social Security System Board-were appointed and began functioning. A Planning Programming Budgeting System office, to provide for longrange program planning, was established and is headed by the Program Analysis Officer. The position of Planning Coordinator was created to coordinate physical planning. A Claims Officer was added to the staff of the Attorney General to assemble and process claims against the United States for post-secure World War II damages.

Andrew Comment of the Contract of the Contract

In addition, the following senior positions were filled: Attorney General, Juvenile Officer, Finance Officer, Director of Property and Supply, Director of Public Works, Chief of Operations and Maintenance, Assistant Director of Public Health, Director of Economic Development, Director of Transportation, Assistant District Administrator for Administration of Ponape, and Assistant District Administrator for Public Affairs of Truk (temporary appointment).

The annual conference of district administrators was held in October 1967, discussing principally social security and retirement programs plus the political, economic, educational and general future of the Territory.

### Relationship with the Congress of Micronesia

The High Commissioner's relationship with the Congress of Micronesia is

established by Secretarial Order N 2882. Section 4 provides that at at time during a legislative session, the High Commissioner may submit proposed legislation to the Congress.

Section 5 provides that, before finally submitting to the Secretary the Interior the annual requests for U.S. funds for the government of th Territory, the High Commissione present a preliminary budget plan t the Congress of Micronesia. The plan outlines the proposed requests for U.S. funds as well as the High Commis sioner's requests to the Congress o Micronesia for appropriation of fund raised pursuant to Territory revenue laws. The Congress reviews and may make recommendations on those portions of the plan which relate to expenditures of funds to be appropriated by the U.S. Congress. The High Commissioner must transmit to the Secretary of the Interior any recommendations he does not adopt. The Congress of Micronesia may take whatever actions it deems advisable on the High Commissioner's requests for appropriations of locally derived revenues.

Section 14 provides that the High Commissioner has the power to approve or disapprove every bill passed by the Congress. He may also disapprove items of appropriation of monev within bills otherwise approved. He must veto within 10 consecutive calendar days, unless the Congress, by adjournment, prevents the return of a bill; otherwise it becomes law. If adjournment prevents the return of a bill, it becomes law if the High Commissioner signs it within 30 days after it has been presented to him. The Congress may repass a bill vetoed by the High Commissioner after the session at which it was originally passed, but not later than 14

Section 5 provides that, before finally submitting to the Secretary of the Interior the annual requests for U.S. funds for the government of the Territory, the High Commissioner present a preliminary budget plan to the Congress of Micronesia. The plan outlines the proposed requests for U.S. funds as well as the High Commissioner's requests to the Congress of Micronesia for appropriation of funds raised pursuant to Territory revenue laws. The Congress reviews and may make recommendations on those portions of the plan which relate to expenditures of funds to be appropriated by the U.S. Congress. The High Commissioner must transmit to the Secretary of the Interior any recommendations he does not adopt. The Congress of Micronesia may take whatever actions it deems advisable on the High Commissioner's requests for appropriations of locally derived revenues.

Section 14 provides that the High Commissioner has the power to approve or disapprove every bill passed by the Congress. He may also disapprove items of appropriation of money within bills otherwise approved. He must veto within 10 consecutive calendar days, unless the Congress, by adjournment, prevents the return of a bill; otherwise it becomes law. If adjournment prevents the return of a bill, it becomes law if the High Commissioner signs it within 30 days after it has been presented to him. The Congress may repass a bill vetoed by the High Commissioner after the session at which it was originally passed, but not later than 14

Part V-Political Advancement

months after it has been vetoed. If within 20 days the High Commissioner does not approve a bill so passed, he must send it with his comments to the Secretary of the Interior who either approves or disapproves the bill within 90 days after receipt.

#### Chapter 3

#### DISTRICT GOVERNMENT

Subject to all Territory-wide laws, the district governments are primarily responsible for liquor control, including collection of wholesale liquor license fees and imposition of taxes on alcoholic beverages; land law; inheritance law: domestic relations; construction and maintenance of secondary roads and docks; exclusive licensing and collecting of license fees of wholesale businesses other than banking, insurance, sale of securities, and public utilities; imposition and collection of sales taxes; and support of public education and public health as may be required by law.

#### **District Administrators**

General executive responsibility in each of the six districts is designated in Section 40 of the Trust Territory Code. In his district, the district administrator is the High Commissioner's principal representative and he exercises general supervision over all operations, programs, and functions of the Territory within the area of his jurisdiction. He is also responsible for executing all district laws. Each district administration consists of a number of officers and departments paralleling those of the Headquarters staff.

Fiscal Year 1968

#### **District Legislatures**

Legislative bodies in five districts have jurisdiction throughout their districts. The Yap Islands Legislature has had jurisdiction only in the Yap Islands proper. Leaders from all parts of the district reached agreement on formation of a Yap District legislature at the conclusion of a series of meetings held during the year, and a proposed charter has been submitted to the Congress of Micronesia for adoption.

All district legislative bodies act under charters granted by the territorial government. Except for *Iroij* members of the Marshall Islands District Legislature and chief members of the Palau Legislature who acquire membership because of hereditary chieftain status, all members of district legislative bodies are elected by popular vote. The hereditary chiefs of Palau who are members of the legislature—2 paramount chiefs and 12 municipality (village) chiefs—do not have the privilege of voting in the legislature.

No uniform plan exists for representation in the various legislative bodies. While allocation of representation is generally based on population, the ratio varies from district to district. Palau District has a population of about 12,000 and a 28-member body, while Truk District, with a population double that of Palau, has a 27-member body.

The qualifying age for membership in the district legislature is 25 except in Truk where it is 23. Other qualifications for membership include Territory citizenship and residence requirements.

4 CM 1.25

All districts now have 4-year terms of office except Truk, which has a 2-year term.

All district legislative bodies meet twice a year except the Marshall Islands District Congress which meets only once, in August.

Bills passed by district legislatures are presented to the district administrator who has power to approve or disapprove them within 30 days. District legislatures may pass disapproved bills over the district administrator's veto by a two-thirds majority of their entire membership. If the district administrator does not then approve a vetoed bill so repassed, he must send it to the High Commissioner who must either approve or disapprove it within 30 days.

Lists of the current membership of the district legislatures are given in Appendix E.

Preparation of district legislature budgets is discussed in Part VI, Chapter 1.

#### Yap Islands Council

This is an executive-advisory body composed of the elected magistrates of the 10 municipalities of the Yap Islands as voting members, the 10 municipal secretaries as non-voting members, and other advisory members designated by the Council.

Chapter 4

LOCAL GOVERNMENT

#### Municipalities

The basic unit of local government in the Territory is the municipality.

Subject to all Territory-wide laws and all district laws of their respective districts, municipalities are primarily responsible for:

- the peace, safety, and public welfare of their inhabitants;
- licensing and collecting license fees of retail and service businesses;
- imposition and collection of excise taxes authorized by the district legislature, head taxes, and property taxes;
- construction and maintenance of municipal streets, roads, and docks;
- all necessary law enforcement not otherwise provided for;
- support of court sittings within the municipality away from established courthouses; and
- support of public education and public health as may be required by law.

Municipal boundaries largely represent customary geographic-political divisions or entities which may comprise an island, group of islands or atolls, or a locally recognized area or division of a larger island. The Marshall Islands, however, are grouped into municipalities by islands and atolls, irrespective of the overlapping jurisdiction of the hereditary chieftains, the *Iroij Laplap*.

The municipalities may be classified as those which function under a charter and those which are unchartered; some of the latter elect only an executive officer while others remain under a traditional form of government.

Part V-Political Advancement

- licensing and collecting license fees of retail and service businesses;
- imposition and collection of excise taxes authorized by the district legislature, head taxes, and property taxes;
- construction and maintenance of municipal streets, roads, and docks;
- all necessary law enforcement not otherwise provided for;
- support of court sittings within the municipality away from established courthouses; and
- support of public education and public health as may be required by law.

Municipal boundaries largely represent customary geographic-political divisions or entities which may comprise an island, group of islands or atolls, or a locally recognized area or division of a larger island. The Marshall Islands, however, are grouped into municipalities by islands and atolls, irrespective of the overlapping jurisdiction of the hereditary chieftains, the *Iroij Laplap*.

The municipalities may be classified as those which function under a charter and those which are unchartered; some of the latter elect only an executive officer while others remain under a traditional form of government.

Part V-Political Advancement

There are 45 chartered municipalities. In general the charter provides for a municipal council, a chief executive and other officials, election procedures, terms of office, and duties and responsibilities of officials.

The chief executive of a municipality is either the magistrate or the mayor. Lists of municipal chief executives may be found in Appendix F.

Municipal council members and the chief executive officers of the chartered municipal governments and of several unchartered municipalities are elected by popular vote. Some municipalities elect other officers, but many municipal charters provide for appointment of such officers as treasurer and secretary.

Age qualifications for office holders vary among the districts with positions of greater responsibility normally requiring a higher age.

Ordinances passed by the chartered municipal council and approved by the district administrator have the force and effect of law within that municipality.

Preparation of municipal budgets is discussed in Part VI, Chapter 1.

#### **Traditional Rulers**

Chiefs and other traditional rulers of comparable rank acquire their rank and title through a combination of hereditary rights and acceptance by their people. In some districts, upon the death of a high-ranking or high-titled person, a community council of elders or the general populace pass upon the qualifications and endorsement of his normal successor before he assumes title. When a chief fails to fulfill his obligations and to hold the

respect of his people, the people of the area or a council of elders representing the people may revoke his title or rank

districts, hereditary some position or rank has been extremely important. Thus, as democratic procedures were introduced, the traditional or hereditary leader often would be automatically elected to office. As the elective process becomes more popular and as the demands of the office increase, this situation is gradually changing. Increasingly, voters are electing candidates who are knowledgeable and who have won their confidence. The hereditary or traditional leader who runs for office no longer can rely exclusively on his traditional prestige. In some districts, chiefs who realize the importance of the elective office of magistrate, but who do not choose to run themselves, will support younger men who are more educated in the processes of modern government.

### CIVIL SERVICE

#### **Conditions of Employment**

United States citizens, except for teachers, medical personnel, engineers, and technicians in public works are employed under and subject to U.S. civil service regulations and procedures.

Micronesians are employed in accordance with terms of the Trust Territory Merit System, enacted by the Congress of Micronesia as Public Law 2-2, and with policies and procedures established by the High Commissioner.

Fiscal Year 1968

Qualification standards for Micronesian employees, specifications of approved positions, and standardized rates of pay are described in the "Micronesian Title and Pay Plan." This Plan provides three distinct pay schedules: manual occupations and skilled crafts; clerical, administrative and protective positions; and professional and managerial positions. As the result of a 1966 comprehensive study of the Plan, a new classification and pay plan for positions in the manual occupations and skilled crafts became effective in July 1967. The new plan greatly increases rates for skilled craftsmen and their supervisors. At the same time, an increase in rates for the clerical and administrative schedule was effected.

The Trust Territory Merit System spells out the terms and conditions and benefits of employment within the Trust Territory executive branch and gives legal force to the rights of employees. Among features of the System are:

- Appointment of a Territorial Personnel Board
- Protection against arbitrary and discriminatory punishment of employees through procedural guarantees of due process and a system of appeals
- Provision for competitive appointments through examinations
- An employee council to act as official spokesman for employees on matters affecting their pay, status, and working conditions
- Authorization for a retirement system, group life insurance,

annual and sick leave and oth benefits

By the end of fiscal year 1968, of the above features had been in plemented except the enactment of retirement system. The Administratic is funding a special portion of the ne Social Security System, described Part VII, Chapter 5, to recognize lor service by its employees. Employee who have worked for the Adminitration for more than 5 years we become fully insured faster and receive a higher pension than non-government employees upon retirement.

Set up in 1967, a group life insu ance program open to all Micronesia employees provides \$1,000 doublindemnity life insurance for ever \$1,000 of annual income or any fraction thereof. Government employees more than 90% of whom have elected to be covered, pay two-thirds of the premiums while the Territory Government pays one-third.

The Administration also offers it employees workmen's compensation insurance through a private insurance company. The program covers up to three-fourths of a Government em ployee's salary for lost time incurred from an on-the-job accident. All medical and hospital expenses for a dutyconnected accident are borne by the Administration. The Government makes every effort to retain employees capable of performing their work after any injuries sustained on the job. construction companies Private working on contract to the Trust Territory Government also have access to the workmen's compensation program; premiums are paid directly by these companies to the insurance company.

The Administration entirely funds a death benefit of up to one year's

By the end of fiscal year 1968, all of the above features had been implemented except the enactment of a retirement system. The Administration is funding a special portion of the new Social Security System, described in Part VII, Chapter 5, to recognize long service by its employees. Employees who have worked for the Administration for more than 5 years will become fully insured faster and receive a higher pension than non-government employees upon retirement.

Set up in 1967, a group life insurance program open to all Micronesian employees provides \$1,000 double indemnity life insurance for every \$1,000 of annual income or any fraction thereof. Government employees, more than 90% of whom have elected to be covered, pay two-thirds of the premiums while the Territory Government pays one-third.

The Administration also offers its employees workmen's compensation insurance through a private insurance company. The program covers up to three-fourths of a Government employee's salary for lost time incurred from an on-the-job accident. All medical and hospital expenses for a dutyconnected accident are borne by the Administration. The Government makes every effort to retain employees capable of performing their work after any injuries sustained on the job. Private construction companies working on contract to the Trust Territory Government also have access to the workmen's compensation program; premiums are paid directly by these companies to the insurance company.

The Administration entirely funds a death benefit of up to one year's

Part V-Political Advancement

salary for the survivor of a Government employee who dies after completing at least 5 years Government service.

The function of the Personnel Board, set up by the Merit System law, is to supervise and evaluate the operation of the Merit System. During its first session in April 1968, the four-member Board evaluated the Trust Territory personnel program and recommended improvement in many areas.

The Trust Territory Personnel Officer is in charge of the administration of the comprehensive personnel program involving labor, wages, employment policy, training, and employee services.

#### Recruitment and Training

Micronesians who can qualify are offered first opportunity for Government positions. When qualified Micronesian personnel are not available, selections are made through the U.S. Federal Civil Service Registers in order of preference, respectively, at Guam, Honolulu, and San Francisco; or contract hires are recruited, mainly as teachers, and public health and construction personnel.

Competitive examinations for Micronesian applicants have been introduced for most professional, administrative and clerical positions. New employees must now meet a required minimum score on a written examination. To supplement, and in certain cases replace, the written tests, the Personnel Department is now developing qualification standards for rating an individual's experience and training for various occupations.

In 1966, a Management Intern Program was initiated to select and

Fiscal Year 1968

systematically train young Micronesians who have high potential for administrative posts. By the end of fiscal year 1968, six Micronesians had successfully completed the program and were assigned to management positions in Resources and Development, Budget and Finance, and Personnel Administration at Headquarters and in the district centers. Seventeen interns are expected to complete training during fiscal 1969.

Efforts to improve the quality and scope of on-the-job training continue, with special emphasis on personnel policies, industrial safety, heavy equipment maintenance and usage, and other skilled and semi-skilled areas.

The Administration also gives employees the opportunity to train in their specialized fields at the East-West Center in Hawaii, through South Pacific Commission courses, and elsewhere. During FY 1968, nearly 150 employees attended refresher courses or specialized training courses in medical and para-medical fields, clerical skills, education, agriculture, administration, accounting, radio broadcasting, health, sanitation, land management, home economics, criminology, and in skilled trades such as automobile mechanics.

The Summer Student Employment Program for about 50 high school juniors and seniors began at Head-quarters and in the districts in June 1968. Students were productive employees in office clerical, public works and supply areas. A 40-hour general orientation was followed by on-the-job instruction by the supervisors.

In all districts, Micronesians are in administrative and professional jobs and are increasing their knowledge and

experience in their fields. Micronesians who assume high-level administrative and professional duties are covered under the higher salary schedule established for professional and managerial employees. High-level appointments of Micronesians have included a District Administrator, a Special Assistant to the High Commissioner, a Deputy Assistant Commissioner for Resources and Development, and seven assistant district administrators.

Chapter 6

SUFFRAGE

A Territory-wide suffrage act for all levels of government has yet to be enacted. Voting qualifications are prescribed separately by municipal charters, district legislature charters, and Secretarial Order No. 2882, as amended. In general, electors must be Trust Territory citizens, 18 or older, and residents for specified lengths of time of the municipality or other election district where they vote. Discrimination in voting based on race, sex, language, or religion does not exist.

Both men and women are eligible to be chosen for elective office in the Trust Territory.

About 44,000 persons were eligible to vote in the 1966 Congress of Micronesia elections if they registered and met other requirements prescribed by law. Participation in that election varied widely among districts. For example, the percentage of eligible electors voting ranged from a reported high of 98% in the Mariana Islands District to a low of 42% in Truk. To make the people aware of their right

to vote, the Government has disserinated information on registration voting procedures, dates of elections etc., through radio broadcasts and meetings with local officials. Politica parties in the districts, as well as some candidates, have also expended considerable effort in encouraging their supporters to register and vote.

The High Commissioner issued orders to outline the conduct of the first elections to the Congress of Micronesia in 1965. The Congress passed an act in 1966 providing for election of its members, which was signed as Public Law No. 2-16 and later incorporated into the Code of the Trust Territory as Chapter 3A. Under this law all eligible persons desiring to vote must first register. A person may register by executing an affidavit in which he identifies his voting residence and swears that he meets the qualifications prescribed by law. Candidates for the House of Representatives and the Senate may be nominated either by petition or political party. All elections of members of Congress are by secret ballot, and Public Law No. 2-16 provides for supervision of polling places, complaints of irregularities, appeals from decisions of election officials, recounts of ballots, and absentee voting. Responsibility for conducting the Congress elections is vested in the district administrators, are designated election commissioners for their districts, and in boards of election of the 21 election districts.

Chapter 7

POLITICAL ORGANIZATIONS

Traditional cultural patterns in most areas of the Territory placed a

Part V-Political Advancement

premium on modesty and, until fairly recently, to actively campaign for public office would have been a violation of such patterns. A candidate's reputation, position in the community, and traditional ties continue to be important in obtaining public support. Political campaigning in the commonly understood sense began about 8 years ago and has varied from extremely lively campaigns in the Mariana Islands and Palau to more sedate campaigns in other districts. Candidates are given radio broadcast time to describe their programs. Public meetings are held and, in some areas. candidates are also beginning to visit constituents in their homes.

To date organized, registered political parties are found only in the Mariana Islands and Palau Districts. The Mariana Islands District has two parties: the Popular Party and the Territorial Party. An indication of their strength is that in recent years no candidate for public office has run independently of the parties. In Palau, two parties, Liberal and Progressive, have been active since 1963.

In the 1966 elections to the Congress of Micronesia, the parties of both districts adopted platforms, nominated slates of candidates, and conducted vigorous pre-election campaigns.

In other districts, young men's and women's groups and other groups encourage the nomination of and solicit support for the candidates of their choice.

Chapter 8

THE JUDICIARY

During the year the Judiciary achieved a long-standing goal with the

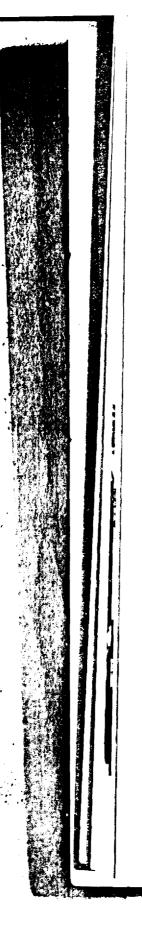

appointment of a second Associate Justice-the former Deputy Attorney General of the Territory. Stationed in Koror, Palau District, his primary judicial responsibility is for the Palau and Yap Districts. The transfer of an Associate Justice to American Samoa left a vacancy which has been filled by the former Attorney General of Guam. The latter Associate Justice is stationed in Ponape with primary judicial responsibility for the Ponape and Truk Districts. In January 1968, the Chief Justice retired after 22 years service to the Trust Territory Judiciary. The Attorney General of the Trust Territory was appointed by the Secretary of the Interior as the new Chief Justice and assumed duties on February 1, 1968. The retiring and the transferring judges continued as Temporary Judges beyond the end of the fiscal year to complete work previously begun. A Peace Corps Volunteer who is a retired Judge of the Superior Court for Los Angeles was appointed as a Temporary Judge for 2 years. He is stationed in Saipan but, as with all justices, his service entails regular travel to all district centers and a number of the sub-district centers.

## **Types of Courts**

The Territory has three types of courts: the High Court, district courts, and community courts.

High Court. The High Court consists of the Chief Justice, two Associate Justices, and a Temporary Justice, and a panel of three temporary judges. At present they are all U.S. lawyers appointed by the Secretary of the Interior and employed under U.S. Civil Service laws for full-time judicial work. Currently the members of the panel of temporary judges are the Presiding Judge of the District Court of Guam and two of the senior judges of the Island Court of Guam.

Fiscal Year 1968

The High Court is the highest judicial authority in the Territory. It has Appellate and Trial Divisions. The Appellate Division, for a particular case, regularly consists of three (although two form a quorum) of the High Court judges assigned by the Chief Justice. The concurrence of two judges is necessary to decide any appeal. A judge who hears a case in the Trial Division is disqualified to sit on that case in the Appellate Division. The Trial Division sits regularly, presided over by a single judge on a circuit-riding basis in the different districts. In murder cases, however, he must be assisted by two of the special judges for the district where the trial is to be held. These special judges are appointed by the High Commissioner and at present are all also district court judges. In hearing a murder case at a non-jury trial, the special judges cast equal votes with the presiding judge in deciding, by majority vote, questions of fact and sentence. In a jury trial, however, the special judges vote only on the question of sentence, with the presiding judge deciding all questions of law involved in the trial and the outcome of the case.

The Appellate Division of the High Court has jurisdiction to review, on appeal, the decisions of the Trial Division of the High Court in the following instances:

- (1) All cases tried originally in the High Court.
- (2) All cases decided by the High Court on appeal from a district court,

Number of Sittings

involving construction or validity any law of the United States, or of ar law or regulation of the Territory, any written enactment intended have the force of law of any official board, or body in the Territory.

(3) All cases decided by the Hig Court on review of the record of district or community court decisio in which the High Court has reverse or modified the decision so as to affec the substantial rights of the appellan-

The Appellate Division of the Hig Court may also, in its discretion and i certain cases, review on appeal de cisions directly from a district o community court.

The Trial Division has origina jurisdiction in all cases, civil and criminal, including probate, admiralty and maritime matters and the adju dication of title to land or any interes therein. It also has jurisdiction to review on appeal decisions of the district courts and to review on the record final decisions of the distric courts and community courts for which no appeal is made.

Three sittings of the Appellate Division were held during the yearone each on Koror, Majuro, and Guam. As far as practicable, oral arguments, if not waived, are heard in the district from which the appeal

District Courts. Each district court consists of a Presiding Judge and two or more Associate Judges appointed by the High Commissioner for specified terms. The High Commissioner fixes the salary of the Presiding Judge and it may not be diminished during his term of office.

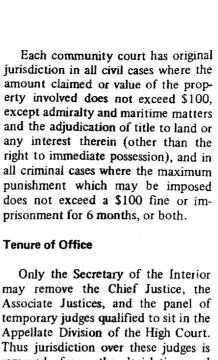

Each district court has original jurisdiction in all civil cases where the amount or value of the property involved does not exceed \$1,000, except admiralty and maritime matters and the adjudication of title to land or any interest therein (other than the right to immediate possession), and in all criminal cases where the maximum punishment which may be imposed does not exceed a \$2,000 fine or imprisonment for 5 years, or both. Each district court also has jurisdiction

to review on appeal decisions of community courts in its district.

District courts are regularly available for sittings as needed at each district center and at the following sub-centers where an Associate District Court Judge or Judges and an assistant clerk of courts are stationed: Rota, Mariana Islands; Lukunor, Mortlock Islands, Truk; Kusaie, Ponape; and Ebeye, Kwajalein Atoll, Marshall Islands. These courts also sit at other points in their respective districts when special need arises.

Community Courts. Each community court consists of a Presiding Judge and may include one or more Associate Judges, all appointed for specified terms by the district administrator of the district where the court is located.

Fiscal Year 1968

removed from the legislative and executive branches of the Government to assure maximum independence of judicial authority. Only the Trial Division of the High Court can remove district and community court judges from office during their terms for cause after a hearing. Assessors are appointed and changed, if necessary, by the judge or judges holding a particular session. Appointment and removal of judicial officers other than judges and assessors is by the Chief Justice or at his direction. Their rate of compensation is fixed by the Chief Justice with the approval of the High Commissioner, as is that of assessors and all the lower court judges other than Presiding Judges of district courts.

### Participation in Courts

Micronesians are employed as judges, officers, and employees of the courts to the maximum extent consistent with proper administration, as specified in Section 183 of the Trust Territory Code. At present, the judges

of all courts, except the High ( and the community court for Kwajalein Test Site, are Micrones as are all clerks of courts, asses and other employees of the co except for the administrative off three court reporters, and a secre to the Chief Justice. Of the Micronesian judges, 23 are discourt judges, who also serve as spijudges of the High Court, and 106 community court judges. Micrones also serve as the six district clerk courts, 12 assistant clerks of cot and two probation officers.

### Official Languages

Ordinarily, proceedings and rece in cases in the High Court are English, but pleadings in indigen languages are frequently accept Proceedings in the Trial Division normally translated orally in or court into the principal indigent language of the area where the proceedings are being held. Further trallation is also provided for any accus who understands neither English resuch principal indigenous language.

In the district and communicourts, proceedings are ordinarily the principal indigenous language, a records are kept either in that langua or in English.

### **Procedure**

The procedure followed in the Territory courts in both civil an criminal cases is, in general, a simplification of that used in the U.S. district courts sitting without jury.

The Congress of Micronesia, b Public Law No. 1-7, effective Augus 23, 1965, authorized the district legis lature of any district to adopt the system of trial by a jury of six persons

The Congress of Micronesia, by Public Law No. 1-7, effective August 23, 1965, authorized the district legislature of any district to adopt the system of trial by a jury of six persons

Part V-Political Advancement

Ordinarily, proceedings and records. Rights of the accused, appeals, ion of invalidity of the enactment nvolved and does not affect any find-

> In line with U.S. Supreme Court ccused, the High Court issued an pinion directing that similar safetuards be made available to persons under investigation for commission of crimes. These include:

• Prior to any questioning, the person must be warned that he has a right to remain silent, that any statement he makes may be used as evidence against him, and that he has a right to the presence of counsel, either retained or appointed, during interrogation.

Fiscal Year 1968

- That the services of the Public Defender, when in the vicinity, and of his local representative are available to represent a person under investigation and that such services are provided without cost to the person.
- That the police are required to obtain counsel for a person, when he so requests, and they may not interrogate until counsel is present.

After a criminal charge has been brought, the defendant is entitled to:

- Have, in advance of trial, a copy of the charge upon which he is to
- Consult counsel before trial and have an attorney-at-law or other representative of his own choosing defend him at trial
- Apply to the court for further time to prepare his defense, which the court shall grant if satisfied that the defendant will otherwise be substantially prejudiced in his defense
- Bring with him to trial such material witnesses as he may desire or have them summoned by the court at his request
- Give evidence on his own behalf at his own request at trial, although he may not be compelled to do so
- Have proceedings interpreted for his benefit when he is unable to understand them otherwise, and
- Request appointment of an assessor in trials before the Trial Division of the High Court if one has not been appointed by the Trial Judge under provisions of Section 126 of the Code.

Legislation prescribing the rights of the accused has been drafted for consideration by the Congress of Micronesia during its Fourth Regular Session.

There is an absolute right of appeal to the Trial Division of the High Court from decisions of any district court on questions of fact and of law. On questions of law, decisions of the Trial Division of the High Court may be appealed to the Appellate Division in cases falling within the jurisdiction of the Appellate Division as enumerated above. The Appellate Division may also, in its discretion, review on appeal directly from district or community court decisions involving the construction or validity of any law of the United States or of any written enactment of any official, board, or body in the Territory intended to have the force of law. Written notice of appeal must be filed within 30 days after announcement of the decision or within such longer time, not exceeding 120 days, as may be specified by the court in case of decisions of the Trial Division of the High Court which are made when a party is neither present nor represented.

The Trial Division of the High Court reviews on the record all final decisions of district courts and community courts in annulment, divorce, and adoption cases in which no appeal has been made, and it may, in its discretion, review on the record any other final decision of a district or community court in which no appeal has been taken. The court acting on an appeal or review has the power to affirm, modify, set aside, or reverse the judgment or order appealed from or reviewed and to remand the case with such directions for a new trial or entry of judgment as may be just. However, if the Government has appealed in a criminal case, the comay not reverse any finding of guilty and its powers are limited reversal of any determination of in idity of the enactment involved.

Disputed facts are ascertai primarily from oral testimony witnesses and from exhibits. W deemed helpful to the conduct of case, the court may also go to scene of an incident having a bear on the case, giving both sides opportunity to reconstruct and attention to evidence. With the peri: sion of the court written deposition may be used by the accused criminal cases or by either side in c cases. As a rule, pretrial conferen are held in civil cases by other disti courts and the Trial Division of High Court to determine the issues a reach agreement on as many facts possible.

### Fees

Clerks of courts charge and colle fees for filing in civil actions, I copies of certified true records, t transcripts of evidence and notes hearing, and for recording land trai fers. Filing fees in civil actions ran from 25¢ for filing of complair under the small claims procedure \$5 for filing of notice of appeal the Appellate Division of the Hig Court. The fee for a copy of ar record certified to be a true copy 25¢ plus 10¢ for each 100 words after the first 100. The fee for transcripts ( evidence or notes of hearing is 25¢ pe 100 words for three copies. The fe for the recording of land transfers 50¢, except when the Trust Territor is the grantor, in which case there is n charge.

Sheriffs are entitled to collect fee for the serving of process (\$1 plus 3¢

deemed helpful to the conduct of the unless transportation is provided at no case, the court may also go to the construct to the witness, certain travel scene of an incident having a bearing expenses at the rate of 3¢ a mile, or opportunity to reconstruct and call are higher. If a witness is required to stay away from his place of work or residence for more than one day, the court may determine the amount reasonable to cover his subsistence needs. Except as specified in Section 262 or when suitable subsistence is provided without expense to the witness, fees are to be paid in advance.

> Section 262 of the Code provides that any court may authorize commencement of proceedings of civil and criminal cases and appeals without prepayment of fees if the person is a permanent resident of the Trust Territory and swears under oath that he cannot pay the fees or give security for them. It also provides that in a criminal case the court may have a witness summoned without prepayment of fees if the accused so requests, and that the court may order that the fees be paid in the same manner as those of a witness summoned on behalf of the Government.

### Legal Aid

A Public Defender and Counselor, with headquarters in the Mariana Islands District, is on the staff of the Trust Territory Government to serve as counsel for accused persons who desire his assistance. Primary responsibilities of representation are for those charged with crimes involving a

possible sentence of imprisonment for more than 5 years. The Public Defender and Counselor has a local representative in each district who acts as counsel for the accused who desire assistance in cases less serious than those aided by the Public Defender himself. In four districts this local representative also has an assistant. The Public Defender and his district representative are available, so far as their primary duties will permit, to provide legal aid and assistance to all persons unable to secure adequate counsel without undue hardship.

### **Penalties**

Penalties for principal crimes remain the same as set forth in Chapter 6 of the Trust Territory Code. These are based primarily on American precedents. Under Section 7 of the Code, all sections of the population are assured equal protection of the law. Only maximum penalties are prescribed by the Code, except for murder; district laws and municipal ordinances which authorize criminal penalties for their violation generally provide maximum penalties. Thus, the courts are permitted wide discretion in fitting the punishment to the circumstances of the particular case.

The Territory's Bill of Rights provides that no crime shall be punished by death, no excessive fines imposed, nor cruel or unusual punishments inflicted. Punishments most often prescribed are imprisonment for a stated time (all or part of which may be suspended on such conditions as the court deems proper), fines, or unpaid labor on public projects. Corporal punishment is not permitted.

The High Court may, in lieu of or in addition to other lawful punishment, direct that a person found guilty

Fiscal Year 1968

of a criminal offense establish his place of residence within a specified area and maintain it there for a period not exceeding the maximum period of imprisonment which may be imposed for the offense. None of the other courts may do this nor may any court impose deportation as a penalty for a crime. However, when any part of a sentence of imprisonment is suspended, the court granting the suspension may, and regularly does, impose conditions of suspension. These may include a residence requirement or departing from and remaining thereafter outside the Trust Territory during the suspension period. Deportation of non-citizens of the Territory rests in the discretion of the High Commissioner, and the committing of serious or repeated crime is naturally to be considered by him in the exercise of that discretion.

Chapter 9

LEGAL SYSTEM

The basic body of laws applicable and having force and effect in the Trust Territory is found in Section 20 of the Trust Territory Code, as amended by Public Law No. 2-15 of 1966. These laws are: (a) the Trusteeship Agreement, (b) such laws of the United States as are by their own terms applicable to the Territory, including Executive Orders of the United States President and Orders of the Secretary of the Interior, (c) laws of the Trust Territory, (d) past District Orders promulgated by district administrators, and Emergency District Orders promulgated by district administrators, (e) acts of legislative bodies convened under charter granted by the Territorial Government when these

acts are approved by the district administrators or otherwise confirmed as law as may be provided by charter or the laws and regulations of the Trust Territory, (f) duly enacted Municipal Ordinances, (g) local custom when not in conflict with applicable statutes, and (h) common law.

Section 436 of the Trust Territory Code further requires that, in imposing sentences under Chapter 6 of the Code concerning crimes and criminal procedures, due recognition shall be given to the customs of inhabitants in accordance with the Trusteeship Agreement. The penalty for any act which is made a crime solely by generally respected native custom shall not exceed a fine of \$100, or 6 months imprisonment, or both (Section 434, Trust Territory Code)

The recognized customary law of the various island groups, atolls, and districts of the Territory in matters where applicable as determined by the courts, has the full force and effect of law, provided such customary law is not in conflict with the written body of laws enumerated under Section 20 of the Trust Territory Code. Section 22 of the Code provides that the common law, as expressed in the Restatements of the Law approved by the American Law Institute, and to the extent not so expressed, as generally understood and applied in the United States, shall be the rules of decision in the courts of the Territory in the absence of applicable statute or local customary law to the contrary. One important limitation to the application of common law appears in Section 24 which provides that the law concerning ownership, use, inheritance, and transfer of land in effect in any part of the Territory on December 1, 1941, shall remain in full force and effect except insofar as it has been, or

The recognized customary law of the various island groups, atolls, and districts of the Territory in matters where applicable as determined by the courts, has the full force and effect of law, provided such customary law is not in conflict with the written body of laws enumerated under Section 20 of the Trust Territory Code. Section 22 of the Code provides that the common law, as expressed in the Restatements of the Law approved by the American Law Institute, and to the extent not so expressed, as generally understood and applied in the United States, shall be the rules of decision in the courts of the Territory in the absence of applicable statute or local customary law to the contrary. One important limitation to the application of common law appears in Section 24 which provides that the law concerning ownership, use, inheritance, and transfer of land in effect in any part of the Territory on December 1, 1941, shall remain in full force and effect except insofar as it has been, or

Part V-Political Advancement

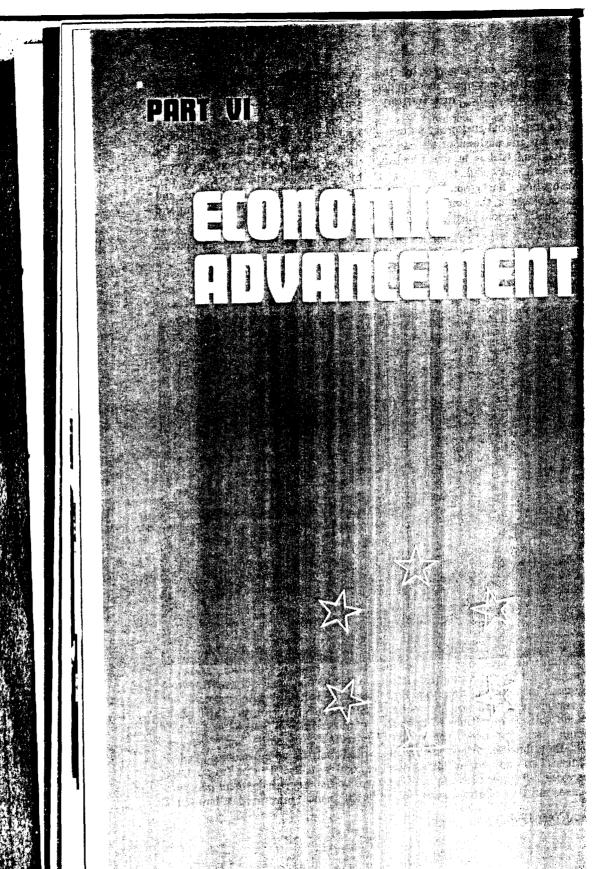

The traditional customary patterns, have been subjected to study and nvestigation. Background papers on Section 436 of the Trust Territor such subjects as the land tenure patcustoms, political power structure, and political factionalism have been prepared at different times by various researchers. All these reports, manuscripts, booklets, and handbooks have provided reference material for use by Land Management personnel, by district administrators, by personnel of the Legal Department, and by members of the court system and the Congress.

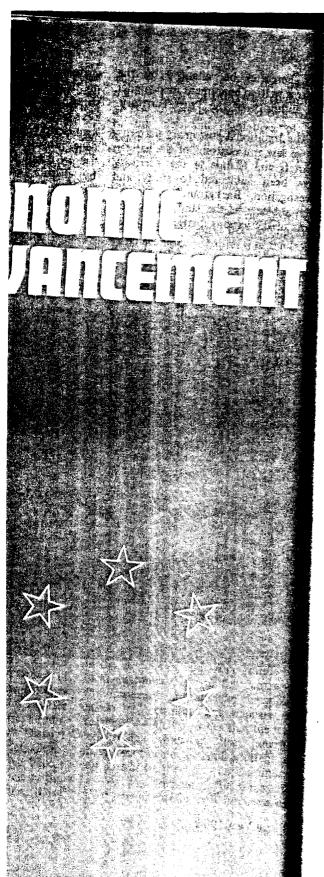

pose in front of their new legislative building.

Fiscal Year 1968

35

# SECTION 1: FINANCE OF THE TERRITORY

Chapter 1

**PUBLIC FINANCE** 

The costs of Trust Territory operations are met by funds granted by the Congress of the United States and from local reimbursable revenue collections.

Trust Territory appropriation requests are subject to appropriation ceiling legislation the U.S. Congress has enacted.

In 1962, a major shift in the direction and scope of the Administering Authority's commitment in Micronesia led to increased appropriations from the U.S. Congress to facilitate a more rapid pace of development. Accordingly, the previous ceiling of \$7.5 million was raised to \$17.5 million. An accelerated program for emergency construction and staffing of school facilities was set in motion along with efforts to improve health standards and provide a general upgrading and integrated development of essential public services embracing transporta-

tion, communications, water and power resources.

Despite the impetus this program has created during the past 6 years, effective and realistic development required further increases in the ceiling to meet the needs of the people of Micronesia. In 1967, new ceiling legislation authorizing \$25 million for 1967, and \$35 million for 1968 and 1969, was signed into law.

Preparation of the annual Trust Territory Government budget begins well over a year in advance when district administrators and various department heads submit estimates to the Director of Budget and Finance. After screening and necessary modification, including review by the appropriate Commissioners, these estimates are presented to the High Commissioner. The Budget Officer and his staff, using the final recommendations approved by the High Commissioner, then draw up a preliminary budget plan for the coming fiscal year. In July this preliminary budget plan is presented to the Congress of Micronesia for its review and recommendations with respect to such portions as relate to funds to be appropriated by

Fiscal Year 1968

the Congress of the United States. The High Commissioner adopts such recommendations of the Congress as he may deem appropriate, but he also must transmit to the Secretary of the Interior all recommendations he does not adopt.

The Administering Authority controls and administers financial operations and construction as funded by the U.S. Congress. The Secretary of the Interior's Advisory Committee exercises review of Trust Territory proposed programs. Bureau of the Budget hearings are held and the budget for Trust Territory operations and capital improvement projects is included in the President's Budget submitted to the U.S. Congress each year.

Budgeting, funding, and expenditure take place at all three levels of government—territorial, district, and municipal. The legal authorization for local government financial operations is contained in the Trust Territory Code, Sections 46 to 48 and Chapter 18, Finance: Taxation.

District governments control and administer financial operations at the district level, with types of income and responsibility for operations defined from Trust Territory separately Government and municipal level income and responsibilities. Each district administrator is required by law to present annually to the district legislature a proposed budget based on revenues anticipated as a result of district and territorial tax laws. After considering the district administrator's proposals as well as proposals of individual members, the district legislature enacts a budget for the district in the form of one or more appropriations bills. Appropriations acts are submitted to the district administrator for

action. Upon approval, the appropitions acts become law, and experitures are made in accordance w their provisions.

The district treasurer is responsit for receiving, maintaining, and disbuing district government funds distinguished from Trust Territo Government funds. He is appointed the district legislature and serves und the direction and supervision of the district administrator. The district reasurer is required by law to subman annual report of all funds receives and disburses during each fiscal year.

Control of fiscal operations at the municipal level rests with the munic pal administration, the district admi: istrator having certain powers supervision and approval. Loc: officials prepare the annual municipa budget and refer it to the municipa council for approval before it is trans mitted to the district administrator fc ratification. Officials of the distric administration assist and advise in th original preparation of the budge where such assistance is required o requested. The approved budge determines the extent of expenditure which may be made locally during the fiscal year from municipal revenues Tax and license fee schedules which provide tax income for the municipality are similarly prepared and approved. The treasurer, or in some instances the magistrate, is authorized to collect taxes and license fees and expend them according to approved schedules and budgets.

Revenues and expenditures of municipalities and district governments which prepared budgets for fiscal year 1967 appear in tables in Appendix IV. A comparative statement of revenues and expenditures also is given in Appendix IV.

The district treasurer is responsible for receiving, maintaining, and disbursing district government funds as distinguished from Trust Territory Government funds. He is appointed by the district legislature and serves under the direction and supervision of the district administrator. The district treasurer is required by law to submit an annual report of all funds he receives and disburses during each fiscal year.

Control of fiscal operations at the municipal level rests with the municipal administration, the district administrator having certain powers of supervision and approval. Local officials prepare the annual municipal budget and refer it to the municipal council for approval before it is transmitted to the district administrator for ratification. Officials of the district administration assist and advise in the original preparation of the budget where such assistance is required or requested. The approved budget determines the extent of expenditures which may be made locally during the fiscal year from municipal revenues. Tax and license fee schedules which provide tax income for the municipality are similarly prepared and approved. The treasurer, or in some instances the magistrate, is authorized to collect taxes and license fees and expend them according to approved schedules and budgets.

Revenues and expenditures of municipalities and district governments which prepared budgets for fiscal year 1967 appear in tables in Appendix IV. A comparative statement of revenues and expenditures also is given in Appendix IV.

Part VI--Economic Advancement

During the year under review the Territory did not enter into any administrative fiscal or customs unions.

Chapter 2
TAXATION

Taxation authority vested in the territorial, district, and local governments is delineated in Chapter 3, Sections 46 to 48 of the Trust Territory Code. Chapter 18 of the Code deals with taxation laws. The taxing authority is vested in and may be exercised by the three levels of government as follows:

Territorial. Exclusive control of import, export, and income taxes including any so-called excise taxes which are actually collected on the basis of imports. Present taxes are (a) an excise tax on the use, distribution, or sale of motor vehicle fuel, (b) an export tax on copra, trochus shell, and scrap metal, and (c) general import taxes. For rates of these taxes, see Part VI, Section 4, Chapter 2.

District. Liquor control, including the right to collect wholesale liquor license fees and to impose taxes on alcoholic beverages, provided that neither of these shall be based on imports or volume or value of imports.

Exclusive issuance of licenses for wholesale businesses other than banks, credit union and cooperatives, insurance, sale of securities and public utilities, including the exclusive right to collect fees for such licenses, provided these are not based on imports or the volume or value of imports.

Fiscal Year 1968

The imposition and collection of sales taxes, and the authorizing of municipalities to impose and collect excise taxes on any item other than foodstuffs.

Municipal and Local. Licensing and collecting license fees of retail businesses within the municipality, subject, however, to all applicable territorial or district laws.

The imposition and collection of head taxes, property taxes on any items other than foodstuffs, and such excise taxes as the district legislature may authorize; provided, however, that none of these shall be based on imports, or the value or volume of imports.

For purposes of taxation, no distinction is made between domestic companies and foreign companies or organizations doing business in the Territory; all are equally subject to applicable taxing statutes and ordinances imposed by and in effect within each level of government. The Territory does not now have income taxes, dividend taxes, corporation profit taxes, or hut taxes, nor is there any Territory-wide capitation or poll tax. The head tax is the most nearly universal tax in Micronesia varying in amount from \$1 to \$10, averaging \$2 to \$3, and generally levied on males 18 years of age or older. In two districts, some municipal governments levy real property taxes. One other district levies cattle taxes.

Except for taxes the Territorial Government imposes, district and municipal taxes are imposed by district laws and municipal ordinances passed by the respective legislative bodies.

STATE AND THE

Penalties for failure to furnish records or information to any of the taxing units of government for the purpose of computation, assessment, or collection of any tax or license fee are specified in Chapter 18 of the Trust Territory Code. A failure to pay taxes subjects the taxpayer to a civil suit brought by the taxing unit concerned pursuant to Section 1147(c) of the Trust Territory Code. While the Trust Territory Code does not specifically contain provisions concerning foreclosures of land to enforce or collect taxes, the taxing unit may avail itself of land foreclosure in an execution on a judgment. In cases of nonpayment of property tax under Section 1147(a) of the Trust Territory Code, the following provision also applies:

"Any taxes imposed or authorized ... upon property shall be a lien upon the property, and may be collected by levy upon it in the same manner as the levy of an execution."

Pursuant to the above section, land or interest therein may be foreclosed provided the land involved or interest therein is "owned solely by the judgment debtor, in his own right." The court, however, must first determine for itself before ordering the sal or transfer of such land that (a) justic so requires it, and (b) the judgmen debtor will have "sufficient landemaining to support himself and those persons directly dependent of him according to recognized local custom and the law of the Trus Territory." (Section 288(c), cf Section 287 T.T. Code.)

Since the Territory does not have an income tax, arrangements or laws concerning international double taxa tion have not been necessary.

Under Sections 1116 to 1118 of the Trust Territory Code, any group of association of persons may form a corporation by submitting the proposed articles of incorporation to the High Commissioner, and if the proposed articles meet the requirements specified under these Code sections, the High Commissioner may grant a charter. Corporations or companies which have been incorporated in the Territory under pertinent sections of the Code are listed in Appendix VII.

Credit unions incorporated in the Territory are listed in Appendix XVI.

# SECTION 2: MONEY AND BANKING

Since U.S. currency serves as legal tender, no laws or regulations governing currency and exchange have been needed other than U.S. laws governing banking. Residents have access to banking institutions in Guam, Hawaii, and the U.S. mainland as well as to branch banks within the Territory. Kwajalein in the Marshalls, Koror in Palau, and Kolonia in Ponape have

Bank of Hawaii branches. Truk District and Saipan in the Mariana Islands District are served by Bank of America branch banks. The branch banks make some loans to individuals and private business firms.

In 1956, a revolving fund was established from funds made available by the U.S. Congress for loans to

Part VI-Economic Advancement

to furnish to any of the ment for the 1, assessment. or license fee r 18 of the failure to pay yer to a civil ing unit conon 1147(c) of e. While the es not specifconcerning enforce or nit may avail in an execuases of nontax under ast Territory ovision also

on, land or foreclosed or interest y by the wn right."

The court, however, must first deter- locally owned trading companies for mine for itself before ordering the sale or transfer of such land that (a) justice so requires it, and (b) the judgment debtor will have "sufficient land remaining to support himself and those persons directly dependent on him according to recognized local custom and the law of the Trust Territory." (Section 288(c), Section 287 T.T. Code.)

Since the Territory does not have an income tax, arrangements or laws concerning international double taxation have not been necessary.

Under Sections 1116 to 1118 of the Trust Territory Code, any group or association of persons may form a corporation by submitting the proposed articles of incorporation to the High Commissioner, and if the proposed articles meet the requirements specified under these Code sections, the High Commissioner may grant a charter. Corporations or companies which have been incorporated in the Territory under pertinent sections of the Code are listed in Appendix VII.

Credit unions incorporated in the Territory are listed in Appendix XVI.

# SECTION 2: money and

es as legal ns governhave been governing access to n, Hawaii. well as to Territory. Koror in nape have

Bank of Hawaii branches. Truk District and Saipan in the Mariana Islands District are served by Bank of America branch banks. The branch banks make some loans to individuals and private business firms.

In 1956, a revolving fund was established from funds made available by the U.S. Congress for loans to

Part VI-Economic Advancement

expansion and other development purposes. This revolving fund was continued until August 1964 when U.S. Public Law 487 transferred \$368,000 from the revolving fund to the Trust Territory Economic Development Loan Fund, bringing the balance of the Loan Fund, established in 1963, to \$668,000. Total capitalization of the Loan Fund as of June 30,

1968 was \$669,000, and this level is to be raised to \$1,000,000.

The Economic Development Loan Fund provides direct loans and guarantees commercial bank loans to business organizations and individuals for development purposes. Details of Economic Development Loan Fund activities during the reporting period are given in Part VI, Section 3, Chapter 2.

# SECTION 3: **ECONOMY OF THE TERRITORY**

Chapter 1

GENERAL

The economic structure of the Territory is based mainly on subsistence farming and fishing. The economic development of the inhabitants varies, however, from the semiurbanized residents of the district centers, participating in a money economy, to the dwellers of the outer islands who may receive only a small amount of cash from the sale of copra to augment their subsistence resources. The Administration is promoting development of the economy of Micronesia so that it will become geared to a world money economy and, thus, its subsistence aspects will become supplemental.

### Nonindigenous Investment

Twenty-one firms in the Territory are financed mainly by nonindigenous capital. Some are chartered under Territory laws. The largest firms include the Bottling Company of Micronesia, Van Camp Sea Food

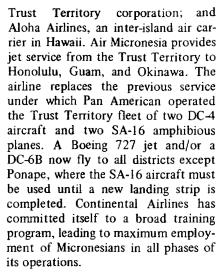

Company, Micronesian Line, Micronesian Development Company, Inc., Micronesian Hotel Corporation, Mobil Oil Micronesia, and Air Micronesia. Bank of America and Bank of Hawaii operate branches in the Territory. Van Camp Sea Food Company employs 145 nonindigenous fishermen, who train Micronesians in live-bait tuna fishing. Two long-time Belgian businessmen reside in Ponape District.

### Major Economic Developments

Development of natural resources for the economic and social betterment of the Micronesian citizenry is receiving increasing emphasis. Findings and recommendations of such source material as the Robert R. Nathan Associates' Economic Development Plan for Micronesia, completed in December 1966, are being used to devise new, practical plans for orderly, balanced economic and social development.

Under a 5-year contract, commercial jet service was inaugurated in Micronesia on May 16, 1968, by Air Micronesia, a corporation formed by Continental Airlines; United Micronesia Development Association, a

Fiscal Year 1968

With increasing movement of people and cargo to and through Micronesia, Continental has contracted to contribute substantially to development of tourism through sizable investment in tourist hotels, advertising, and promotion. Its contract stipulates an approximate expenditure of 6% of passenger revenues during the term of its contract for promotional activities, including an information campaign for the travel trade, media advertising, development of package tours, and colorful and interesting literature.

Increased numbers of travelers are conducive to hotel development. In December 1967 the Royal Taga, the first first-class hotel in the Territory, opened in Saipan. The three-story, \$800,000 structure will be expanded from 54 to 100 rooms. Within the next 3 years, Continental also plans to build an attractive and interesting Pacific-style hotel in each district. Construction probably will begin in Truk and Palau Districts during calendar year 1969.

Including the Royal Taga, about 189 rooms are available to travelers in

the 15 hotels throughout the Territory.

### **Gross Territorial Product**

The estimated (imprecise) tot dollar value of all goods and servic available for consumption and inves ment in the Territory plus net add tions to capital facilities for the yea 1965-1967 amounts to abor \$38,300,000 a year or about \$430.0 per capita. About 47% of this tot product, or real income, consists government-provided goods and ser ices, about 35% results from loc production of both subsistence at locally marketed products; the remai ing 18% comes from goods importinto the private markets of the economy. These estimates indicate t source of the total economic produ available to be distributed among ar to support the people of Micrones:

### Wage and Export Income

The following is an estimate income from wages and exports avaable to Trust Territory citizens for t past 5 fiscal years:

| Year | National Income |
|------|-----------------|
| 1964 | \$ 7,589,000    |
| 1965 | 10,257,000      |
| 1966 | 10,746,000      |
| 1967 | 11,370,000      |
| 1968 | 14,904,672      |

<sup>1</sup> Does not include U.S. employed salaries.

> Chapter 2 POLICY AND PLANNING

The Resources and Development specialists and technical advisers who coordinate programs in economic development; administer purchasing agreements and development loan funds; direct the marine the entire land management program; assist in the development of local cooperatives, credit unions, trading companies, small business and other commercial activities; administer the agriculture and forestry development program; and advise on transportation matters. Other members of the High Commissioner's staff, such as the Attorney General, give advice and assistance where necessary. Technical assistance also is obtained from universities, Government agencies, the South Pacific Commission, and the United Nations.

During the year, an Economic Development Division was established within the Resources and Development Department and an experienced

Fiscal Year 1968

economic development specialist was added to the staff.

In the districts, the Resources and Development program is carried out under the general supervision of the district administrator with technical direction by agriculturists and land management and economic advisers.

### Policy

The Administering Authority of the Territory bases its economic development program on:

- Increasing food production through improvement of crop farming and encouraging use of local materials for house construction, furniture, and handicraft.
- Developing transportation and communications systems to overcome community isolation, increase educational opportunity, promote higher standards of family and community life and provide an adequate and uninterrupted air-and-sea logistic support of the island communities.
- Encouraging development of tourism and the personnel and facilities needed for tourism.
- Maintaining a wage structure and conditions of employment consonant with the advancing social and economic conditions of the Trust Territory; this structure to be based on periodic economic surveys and cost-of-living studies.
- Reserving to the inhabitants their land and resources by applying appropriate controls and constraints so that land use plans and patterns are designed to achieve optimum use of land resources.

- Providing the basic physical and resource developments necessary for economic growth by expanding a Trust Territory-wide construction program which includes rehabilitating and building roads, airports, and harbor facilities; and improving and expanding water, electrical, sanitary, and other basic utilities.
- Encouraging Micronesians to establish their own business enterprises by providing them with necessary technical assistance and long-term loans. These enterprises include establishment of cooperatives, small home industries, expanded production of handicraft, search for markets, and instruction in modern methods of production.
- Providing for capital participation in economic enterprises which are otherwise beyond the financial capacity of local investors, by providing an economic climate which will allow business, commerce and industry a profit while providing productive employment opportunities for Micronesia's growing population. Enterprises which may require such participation include commercial transportation and travel facilities, fisheries, large-scale tropical agricultural production, food processing, and other fabricating and manufacturing industries.

### **Credit Facilities**

The Economic Development Loan Fund is one important device for stimulating the local economy. The Loan Fund is administered by a sevenmember Board of Directors, chaired by the Director of Economic Development.

A general rule established by the Board of Directors requires that loan

applicants attempt to secure cr directly from commercial banks in area, and that only when such as ance is not available may they sut applications to the Board for its sideration. Loans are made directly in the form of a loan guarantee commercial bank by the Territa Government, with the Board set aside cash in reserve equivalent to of the total loan guaranteed.

Loans may be made or guaran to:

- (a) A citizen or resident of Trust Territory, or a group or assition of Trust Territory citizen: residents, whom the Board of D tors regards as a suitable borrower.
- (b) Corporations and coopersocieties authorized to conduct ness in the Territory; citizens or dents of the Territory engaged agriculture, manufacturing, or mercial fishing; improvement of ism; and improvement of real proper industrial purposes which Board specifically determines to beneficial, desirable and necessar the economic development of Trust Territory and which meets or more of the following criteria:
- -Creates new employemnt;
- -Replaces imports, increases expo
- -Reduces consumer prices;
- Provides vitally needed facilities services.

During the year under re direct loans totaling \$115,300 made and \$164,200 worth of tional loans were guaranteed commercial banks. At year's \$23,000 in loans were pending at

Loans are made directly, or in the form of a loan guarantee to a commercial bank by the Territorial Government, with the Board setting aside cash in reserve equivalent to 25% of the total loan guaranteed.

Loans may be made or guaranteed

- (a) A citizen or resident of the Trust Territory, or a group or association of Trust Territory citizens or residents, whom the Board of Directors regards as a suitable borrower.
- (b) Corporations and cooperative societies authorized to conduct business in the Territory; citizens or residents of the Territory engaged in agriculture, manufacturing, or commercial fishing; improvement of tourism; and improvement of real property for industrial purposes which the Board specifically determines to be beneficial, desirable and necessary to the economic development of the Trust Territory and which meets one or more of the following criteria:
- -Creates new employemnt;
- -Replaces imports, increases exports;
- -Reduces consumer prices;
- -Provides vitally needed facilities and services.

During the year under review, direct loans totaling \$115,300 were made and \$164,200 worth of additional loans were guaranteed with commercial banks. At year's end, \$23,000 in loans were pending and an

Part VI-Economic Advancement

Of the 50 direct loans outstanding, totaling \$531,963, twenty-eight were delinquent, 17 in the Mariana Islands District which was devastated by Typhoon Jean in April. After the typhoon a survey was made of estimated financing needs of the Marianas business community. Loan applications totaling about \$500,000 were considered likely for restoring and ungrading establishments. These would he in addition to loans known to be in process in other districts.

The following figures reflect the activity of the Economic Development Loan Fund since 1964:

| Fiscal<br>Year | Direct<br>Loans | Guaranteed<br>Loans |
|----------------|-----------------|---------------------|
| reur           | Louns           | Loans               |
| 1964           | \$200,000       | \$104,000           |
| 1965           | 68,600          | 39,625              |
| 1966           | 203,398         | 236,000             |
| 1967           | 193,700         | 285,700             |
| 1968           | 115,300         | 164,200             |

These loans were granted for a variety of purposes:

- To stimulate agricultural production (for example, to establish poultry farms, piggeries, vegetable farms, cattle ranches)
- To establish new enterprises (such as laundromat, boat yard, bakeries, fishing operations)
- To provide additional capital for expanding private businesses and cooperatives
- finance new construction (commercial buildings, motels. hotels, and rental property)

• To engage in transportation services (e.g., local transportation, warehouses, sea transportation, stevedor-

Credit Unions and Cooperatives. Trust Territory credit unions and cooperatives continue to make notable progress. By the end of fiscal year 1968, 48 credit unions were operating in the Territory, an increase of seven over the previous period. Total assets of these self-help thrift and lending institutions aggregated \$879,778, an increase of 62% during calendar year 1967. By the end of the reporting period, total assets were estimated to be above \$1,000,000. At the end of calendar year 1967, 7,295 Micronesians were participating in credit unions and had saved \$764,485 for an average of \$105 per member. During calendar year 1967, credit unions made 4,059 loans to members amounting to \$1,208,846 or an average of \$298 per loan. In most cases, the credit union is the only source for such loans. Loans were made for such beneficial purposes as home building and improvement, buying furniture and household appliances, sending children away to school, and a number of other practical purposes.

By the end of fiscal year 1968, 14 Trust Territory credit unions had subscribed for the Loan Protection and Life Savings insurance provided by CUNA Mutual Insurance Society of Madison, Wisconsin, Under the loan protection coverage, the insurance company will repay the balance of a member's credit union loan if he dies or becomes totally and permanently disabled. Thus, the credit union will not lose, nor will it have to call upon the family of the deceased member to pay the obligation. The insurance company does not seek recovery of the amount it restitutes to the credit union.

Fiscal Year 1968

Life savings insurance provides similar benefits with respect to a member's savings. When a member dies, the insurance company will match the amount of his savings at the time of death. This is considered an incentive for members to save and to refrain from withdrawing their savings except for urgent needs.

Seventeen credit unions have subscribed to surety bond coverage, which protects them from embezzlement. Coverage is limited to \$1,000,000.

Cooperatives in the Territory also have increased their volume of business. By the end of fiscal year 1968, active cooperatives numbered 33, an increase of nine from the previous year. These cooperatives were buying copra and retailing trade goods, often in remote areas where there was no other trading company; catching and marketing fish; producing and marketing handicraft; constructing low-cost homes for members; and building and repairing boats.

Total sales and other revenues of Trust Territory cooperatives will exceed \$5,000,000 for fiscal year 1968. At the end of 1967, 7,499 Micronesians were members. Good operating results enabled cooperatives to show net savings of \$453,201 and to pay an estimated \$259,363 in patronage refunds.

# Chapter 3

### **INVESTMENTS**

The Administering Authority recognizes that outside capital and expertise, particularly for large-scale,

sophisticated enterprises, are need to carry out economic ventures in a most efficient and profitable mann

The Director of Economic Development analyzes proposed outside invenent, obtains views of concerning persons, and formulates a recomendation for the High Commission to license or charter any enterprinvolving non-Micronesians.

In reviewing a business ventuapplication, the following criteramong others, are considered:

- (a) the economic need for a service or activity to be performed
- (b) the promoters' willingness joint Micronesian ownership of venture
- (c) the degree to which such operation effects a net increase exports or a net decrease in imports
- (d) the extent of participation Micronesian citizens at the outset a in the future at the management le and at lower levels, and the provision for Micronesian personnel training
- (e) the lack of capability financial, technical, managerial otherwise—of Micronesians to operasuch a business now or within treasonable future.

Investment which meets the abc considerations, resulting in an infle of capital and needed know-how as increasing the productivity of Micronesian workers, is welcomed and factated.

ority recogipital and large-scale, sophisticated enterprises, are needed to carry out economic ventures in the most efficient and profitable manner.

The Director of Economic Development analyzes proposed outside investment, obtains views of concerned persons, and formulates a recommendation for the High Commissioner to license or charter any enterprise involving non-Micronesians.

In reviewing a business venture application, the following criteria, among others, are considered:

- (a) the economic need for the service or activity to be performed
- (b) the promoters' willingness for joint Micronesian ownership of the venture
- (c) the degree to which such an operation effects a net increase in exports or a net decrease in imports
- (d) the extent of participation by Micronesian citizens at the outset and in the future at the management level and at lower levels, and the provisions for Micronesian personnel training
- (e) the lack of capability—financial, technical, managerial or otherwise—of Micronesians to operate such a business now or within the reasonable future.

Investment which meets the above considerations, resulting in an inflow of capital and needed know-how and increasing the productivity of Micronesian workers, is welcomed and facilitated.

Part VI-Economic Advancement

The law prohibits ownership of land by persons who are not citizens of the Territory. The High Commissioner must approve land leases to non-Micronesians. Approval for applications to lease land for commercial purposes is considered formally after the applicant has received formal approval from the High Commissioner for his business venture, including all associated relevant activities. Such approval or permission is manifested by license or Territorial corporate charter.

Micronesians are limited in the skills necessary for their ready participation in economic development opportunities at present. Shortages exist in managerial, professional, and middle level skills, such as building and service trades. The demands of expanding activities will increase the shortages. Therefore, when circumstances require and when the economic venture is desirable, the Territorial Government will allow entrepreneurs to import skills to meet schedule and vocational requirements. The intent of the Government is to ensure that Territory citizens are involved to the maximum extent feasible in the job structure of the proposed economic activity. It is also the Government's intent that, when alien labor is imported, maximum effort be made to train Micronesians to replace them as soon as practicable.

The largest investments in the Territory are by Mobil Oil Micronesia, Inc., and Air Micronesia. Other large investors are Micronesian Line, Van Camp Sea Food Company, Micronesian Development Corporation, and Micronesian Hotel Corporation.

Fiscal Year 1968

Mobil Oil Micronesia, Inc. operates a petroleum supply, storage, and distribution system throughout the Territory. District managers are Micronesians.

Micronesian involvement in the ownership and operation of Air Micronesia is an important feature of this new service. The airline is owned 31% by Continental Airlines, 20% by Aloha Airline of Hawaii: and 49% by the United Micronesia Development Association, most of whose stock is owned by Micronesians.

Micronesian Line, a locally chartered firm, operates the Territory's three major logistic vessels and the M/V Majuro. Both government and private vessels serve islands from each district center.

The Van Camp Sea Food Corporation operates a live-bait tuna fishery and on-shore freezing, cold-storage, and auxiliary facilities to support this industry.

The Micronesian Hotel Corporation has leased a portion of beach area in Saipan, Mariana Islands District, for a luxury hotel, the Royal Taga. The lease agreement is for 20 years and may be extended.

The Micronesian Development Company, Inc. is developing a modern livestock industry on the island of Tinian, Mariana Islands District.

Other non-Micronesian investments include insurance companies, a charter boat enterprise, banks, a bottling company, and small service industries.

# RELATIVE CHANGE IN VALUE OF EXPORTS BETWEEN 1967, 1968

LAND LANDERD

Fund which stabilizes copra prices to producers, thus alleviating the uncertainty and insecurity of world market fluctuations.

Copra remains the Territory's largest export item with 12,880 short tons valued at \$2,504,740 exported this year. This represents a 442-ton increase from 1967 and a dollar increase of about \$820,000 due to the rising price of copra on the world market. The price per short ton of copra was maintained at \$102.50 during the year, enabling the Copra Stabilization Fund to rise from a low of \$383,000 to its present \$508,566.

Regardless of the extent to which the world price of copra may fluctuate, copra is and, as far as can be determined, will continue to be a major source of income to a large portion of Trust Territory citizens for some time to come. In line with this reasoning, a program to upgrade the copra production base through coconut grove rehabilitation continues in an effort to safeguard this very important source of income and subsistence to out-island inhabitants.

Among other items of export, scrap metal valued at \$288,465 was exported in 1968, a decrease of \$93,083 from last year. The Mariana Islands District, the largest exporter of scrap metal last year, decreased from \$232,573 in 1967 to \$35,000 in 1968. This is mainly due to the diminishing supply of scrap metal around Saipan and partially to the effects of Typhoon Jean which halted export for the last quarter. Saipan's decrease was largely made up by Palau, which increased its export of scrap metal by \$161,804 to \$241,960 in 1968.

Export of handicraft increased from \$104,836 in 1967 to \$148,800

in 1968. The handicraft industry tinues to expand as demand for a ity Micronesian crafts products graincreasing numbers of tourists Micronesia insure that the demand handicrafts will remain high for s time. The greatest problem is mee that demand.

Total revenue from fish export, including commercial export, \$21,266 in 1968, a decrease \$72,244 from 1967. This was marily due to a large decrease Palau's exports, from \$84,000 \$18,125. This may have been car by the creation by Selmur Product of temporary, high paying jobs for making of a movie. An increase local sales and poor weather cotions may have contributed as well

Vegetable export has been sigicant only in the Mariana Isla District. During 1968, vegetable port totaled \$15,161, a decrease \$10,526 from 1967. The typhowhich hit Rota in November Saipan, Tinian and Rota in April Isignificantly hampered agricult production. Also, local sales of a able vegetables have increased duthe larger number of visitors to Marianas, particularly Saipan.

Export of meat increased fi \$9,482 in 1967 to \$18,615 in 19 due mainly to sales to Guam by Micronesian Development Compannew livestock industry on Tinian. A on the increase was trochus extwhich, after a low of \$4,375 in 19 increased to \$15,303 in 19 Trochus, a major export until pla replaced it in the button induseveral years ago, has been find some new popularity on the jewe market.

The large increase in time. The greatest problem is meeting revenue from copra export was primarily responsible for an over-all increase of about 30% in exportsin 1967 to

The principal private commercial organizations in the Territory are listed in Appendix VII.

The only commercial organizations in the Territory which have a monopolistic position in regard to a resource are the Copra Stabilization Board and Mobil Oil Micronesia.

## **Protection and Conservation** of Resources

The following safeguards protect Territory citizens from outside ex**pl**oitation:

- (a) The High Commissioner permits outside participation in the development of resources subject to controls necessary to protect Micronesian interests.
- (b) Only Territory citizens may hold title to land.

The Administering Authority encourages maximum possible ownership and participation by indigenous inhabitants in economic development of the Territory.

Education and training for conservation of natural resources is a continuing function of the Administering Authority carried out mainly through its agricultural extension service. Legislative provisions for the conservation of natural resources have been discussed above.

Chapter 2

COMMERCE AND TRADE

The present pattern of merchandising (including food stores, general merchandise, bars and restaurants) in each Trust Territory district is characterized by one to three relatively large enterprises operating as "General Import - Wholesaler - Retailer" (IWR) and a host of small enterprises, in effect economic satellites of the IWR's. Many of the small, often tiny, retailers operate on a shoe string, buying in broken lots of perhaps two or three items at a time from the large IWR. Hence the latter in their forward planning, in their importing of merchandise, in maintaining adequate inventories, do so not only for themselves, but for a large number of smaller establishments.

No methods of price control exist in the Territory except in the case of copra, nor of allocating supplies of foodstuffs, piece goods and other essential commodities.

The Territorial Government levies export and import taxes.

There is a 10% copra and trochus shell export tax as well as the following taxes on the export of scrap metal: Non-ferrous, 25% ad valorem; ferrous, 5% ad valorem; lead and covered cable, 10% ad valorem.

Fiscal Year 1968

### **Import Taxes**

Import taxes are levied on all the following products imported into the Territory for resale:

(1) Cigarettes- $7\phi$  every 20 cigarettes.

(2) Tobacco, other than cigarettes -50% ad valorem.

(3) Perfumery, cosmetics and toiletries, including cologne and other toilet waters, articles of perfumery, whether in sachets or otherwise, and all preparations used as applications to the hair or skin, lipsticks, pomades, powders and other toilet preparations not having medicinal properties—25% ad valorem.

(4) Soft drinks and non-alcoholic beverages-2¢ each 12 fluid ounces or fractional part thereof.

(5) Beer and malt beverages—3¢ per can or bottle of 12 fluid ounces or fractional part thereof.

(6) Distilled alcoholic beverages—\$6.00 per wine gallon,

(7) Wine-\$1.50 per wine gallon.

(8) Foodstuffs for human consumption-1% ad valorem.

(9) All other imported products, except those specified above and gasoline and diesel fuel—3% ad valorem.

An excise tax is levied on the use, distribution, or sale within the Territory of all gasoline and diesel fuel at the rate of  $5\phi$  per gallon so used, distributed or sold.

Chapter 3

LAND AND AGRICULTURE

### Land Tenure

Customary land tenure and uti tion practices differ greatly thro out the Territory, not only f district to district, but even in s instances among island groups with district. These traditional prac have undergone considerable modi tion as a result of the influence f the various administrations. Never less, the Economic Development for Micronesia, completed by Rc R. Nathan Associates, Inc., in Dec ber 1966, makes a keen observat "Still, today, the many traditi tenure arrangements which cont to persist often create obstacles agricultural development. The sys of undefined ownership by exterfamilies and clans, with use right many, discourages investment in improvement. Land reform is the ultimate solution, but the car planning and equitable impleme tion of a well-conceived land ret will take much expert effort and m years to achieve."

The Administration, aware of complexity of traditional land tensystems, is making conscious effort urge the people to seek solutiviting the established judicial proand the administrative framework. Policy of the Government is encourage, where possible, ways means to promote understanding the need for a single consistent sys of land holdings in the Territory.

In Yap, the traditional unit of land and has been for centuries the tabinaw, or estate, which consists of Since publication of a handbook on all land belonging to a single extended customary land tenure patterns and household and which may include one

or more house platforms, taro pits, tracts of sea inside the reef, stone fish weirs, coconut palms, yam gardens, grassy uplands, and timber lots.

In precontact time the Mariana Islands were divided into districts, each ruled by a local chief who nominally controlled the lands within it. The rights to areas within the district were assigned to kinship groups. The land tenure system began to break down when the Spanish administration gave Chamorro families rights to certain lands on the islands. In the latter part of the 1800's, when the Chamorros resettled in Saipan, individual ownership was established and each family cultivated its own fields. Present-day land tenure patterns among the Mariana Islands resemble the western system more than do the patterns in any other district of the Trust Territory. The sale of land is an accepted practice.

In the Truk District, especially on the atolls, land is more precious than anywhere else in the Territory due to the high population density. Land is identified with food. For example, a Trukese will say, "That is my food," when pointing to his parcel of land. The land may be owned individually or by lineage groups. Major types of land recognized by the local inhabitants are dry land, fresh water swamp, and the shallow area covered by sea water. Improvements or planting of tree crops, such as breadfruit trees, in any of these areas may be owned separately from the land itself. The size of individual pieces of property may be quite small, seldom more than a few acres, although a person usually has some, but not necessarily sole, interest in a half dozen or more plots.

In precontact time all the land area of the Ponape Islands belonged to the

Part VI-Economic Advancement Fiscal Year 1968

por me me

Nanmwarki (king) of each municipality. The common people used the land to grow food only with the consent of the Nanmwarki and his nobles. The "first fruits" of the season always went to the Nanmwarki. To some extent this is still the practice, even though in 1912 the German government gave the common people actual deed-holding title to land they had been working. Today, individual ownership of land predominates on Ponape Island and to a certain extent on Kusaie. In practice, however, some elements of family enterprise directed toward subsistence of all concerned are retained. The Ponapeans live on scattered farmsteads rather than in villages as do other inhabitants of the Trust Territory. On these farmsteads such crops as yams, taro, breadfruit, coconut and bananas are grown for subsistence or sale in local markets.

Land is of paramount importance to the Marshallese people; their agricultural economy is based on copra production, and much of their food comes directly from their land The system provides for all members of the Marshallese society, each of whom obtains land rights at birth. The Marshallese generally exhibit an attitude of security, undoubtedly due in large part to their land tenure system involving three levels of society-the commoners, the headmen, and the nobility. Despite three foreign powers having administered their islands, they still retain possession of most of their land and show every inclination to continue to do so in the future. In general, land is not for sale in the Marshalls.

### **Quality of Soil**

The lush vegetation on the islands is deceiving as an indication of the fertility of the soil. The high rainfall leaches

the soil, making it deficient in all the basic nutrients-nitrogen, phosphates potassium, and the minor elements The soil usually is made up of decomposed volcanic or coral rocks and smal quantities of humus. On the steeper slopes of the high islands the soil laye has often been removed through ero sion; the valleys and alluvial plain toward the coast contain soil or moderate fertility. Most volcanic islands have swamp areas where taro is grown as a staple food. Some of the alluvial plains and gentle slopes near the coast now are being used for crop production-coconut palms, bread fruit, bananas, cacao, yams, dry land taro, sweet potatoes, and vegetables Mangrove forests on the tidal flats and rain forests in the interior provide timber for building homes and other structures. The surfaces of coral atolk and single coral islands which build up on submerged mountain peaks are normally only a few feet above sea level. The soils are quite porous. consisting of sand, shells, and coral fragments with very little organic matter. They are well suited to the growth of the coconut palm, but are not conducive to ordinary forms of cultivated agriculture. Many coral islands and atolls have manmade tare pits of varying sizes where grass. leaves, and debris have been placed to produce organic matter for taro cultivation. The balance of the atoll land is generally used to produce coconut palms, breadfruit, pandanus, arrowroot, cucurbits and bananas.

In some districts extensive land not yet under cultivation or development but suitable for crops or livestock production exists. The exact acreage is unknown.

The balance of the atoll land is generally used to produce coconut palms, breadfruit, pandanus, arrowroot, cucurbits and bananas.

In some districts extensive land not yet under cultivation or development but suitable for crops or livestock production exists. The exact acreage is unknown.

### Acquisition and Transfer of Title

Public Law No. 2-1, enacted in 1966, provides for establishment of

Part VI-Economic Advancement

land commissions and the determination and registration of title to land. Before land commissions were established, persons were encouraged to have land transfer documents and other evidence of ownership or title recorded with their respective district clerks of courts. At present, territorial legislation to control the transfer of land among Micronesians is lacking.

For many years, the policy of the Administering Authority, as specified in Section 900 of the Territory Code, has been that only Micronesian citizens may hold fee title to land in the Territory. The Nathan Report's recommendation to consider the possibility of non-Micronesians' holding title to land was not accepted by the Administration. The alternative for non-Micronesian investors is to acquire long-term leasehold. Acquisition by non-Micronesians of interest in land, other than fee title, is controlled by administrative regulations. These regulations require the approvel of the High Commissioner for any transfer of an interest in land, public or private, to a non-Micronesian. Some 7,534 acres of public land are under longterm lease to non-Micronesian businesses. Nearly all-7,500 acres-of that public land is in Tinian, Mariana Islands District, and is leased to an American entrepreneur, a long-time resident of Guam, for a livestock industry.

Chapter 20 of the Trust Territory Code prescribes the procedure to be followed by the Government in exercising its right of eminent domain. A land policy recently released by the Administration established procedures for allocating public land or acquiring private land for capital improvement programs by the Government. Its basic policy considerations stipulate that, whenever possible, capital improve-

ment projects should be situated on public land. If no such land is available or suitable for the contemplated construction project, however, appropriate interests in private land may be acquired by the Government, but only if in the public interest and necessity. It further provides that an interest in private land may be acquired by negotiation or by exercise of the power of eminent domain. Use of eminent domain, however, is restricted to those few situations where land cannot be acquired by negotiation and the land is absolutely required for public use.

### Settlement of Land Claims

A war claims review team which conducted a fact-finding tour of the Territory in the fall of 1966 collected some 1,067 post-secure war claims amounting to \$16,081,813.51 against the United States and the Trust Territory Government. Close to one-third of that amount pertains to claims for use and occupancy, and damage to real property. These post-secure war claims are now being processed by the Attorney General's staff, which has one man assigned full-time to collect evidence on the validity of the claims. Several district land management offices are providing staff assistance to the Attorney General in processing these claims. It will take several years, however, before they are settled to the satisfaction of all concerned.

During the review year, no major land claims have been settled. Some pending land claims are expected to be settled before the end of fiscal year 1969.

### Homestead Program

A February 1965 administrative directive stated that new proposals for homesteading areas must be

Fiscal Year 1968

accompanied by an economic development plan fully justifying the homestead area and discussing other potential economic developments to be undertaken by the prospective homesteaders. Since that time, the High Commissioner has not declared any new areas for homesteading.

The Nathan Report has pointed up the validity of the administrative directive by analytic comments which state that the Government's homesteading program serves "to compound the difficulties and to destroy the possibility of using the land resources for the best interests of the people. The ... homesteading program does not encourage either the wise use of land or investment in land improvement." The recommendation of the report is to suspend issuance of all homestead permits (village and agriculture) except those which are part of a governmental master plan or an approved agriculture or village community development program. Master planning of the Territory is in its final stages and the Administration is seriously considering implementation of the Nathan Report's recommendation.

### **Population Pressures**

Except for a few outer islands in the Truk and Marshall Islands Districts where overpopulation is serious, population pressure in general is not a problem. A number of the larger islands have considerable areas of public domain and resettlement on such land is feasible for future population expansion.

The Territory at one time supported a much larger population than its present 94,469 inhabitants. Even taking into account possible exaggeration in early figures, present population figures have not yet reached leve of pre-European times. Perhaps the most dramatic example of population decline can be found in Yap where the present population of 6,870 is only fraction of the estimated pre-Europea population. Similar examples can be given for Ponape, estimated at on time to have had 35,000, almodouble its present population, and for the Mariana Islands and Palau. Ponape, on Babelthuap Island. Palau, and in Yap, scores of desertivillage sites can be seen.

### Erosion

Erosion is an ever-present proble in the high islands where heavy rainf prevails. Lumbering operations as intensified agricultural methods past administrations stripped certa areas of protective forest cover. "Sla and burn" agricultural techniques us on hillsides by indigenous inhabitat plus accidental fires during dry perio also have aggravated erosion contions.

On the coral atolls coconut pa and other flora tend to protect the s from erosion. Severe damage occasic ally occurs as in the disastro typhoon of 1958 which denuded pa of Jaluit Atoll, Marshall Islar District, of top soil and drastica changed the configuration of certaislands in this atoll.

Soil fertility is sufficient for t subsistence farming that is practice. Where intensified cropping is intuted, however, soil amendments mbe provided to sustain continue productive yields.

In Ponape, on Babelthuap Island of Palau, and in Yap, scores of deserted village sites can be seen.

### **Erosion**

Erosion is an ever-present problem in the high islands where heavy rainfall prevails. Lumbering operations and intensified agricultural methods of past administrations stripped certain areas of protective forest cover. "Slash and burn" agricultural techniques used on hillsides by indigenous inhabitants plus accidental fires during dry periods also have aggravated erosion conditions.

On the coral atolls coconut palm and other flora tend to protect the soil from erosion. Severe damage occasionally occurs as in the disastrous typhoon of 1958 which denuded parts of Jaluit Atoll, Marshall Islands District, of top soil and drastically changed the configuration of certain islands in this atoll.

Soil fertility is sufficient for the subsistence farming that is practiced. Where intensified cropping is instituted, however, soil amendments must be provided to sustain continuous productive yields.

# Plant and Animal Pests and Diseases

Under the Director of Agriculture, the staff entomologist and the staff

Part VI-Economic Advancement

plant pathologist supervise the quarantine program and insect pest and plant disease control programs of the Territory.

During the year, a complete revision of the Trust Territory plant and animal quarantine regulations was accomplished to keep them current with program and territorial development.

Plant quarantine regulations to control accidental introduction or spread of plant insect pests and diseases are in effect. All districts have several agricultural quarantine inspectors who conduct inspections of incoming planes and surface vessels.

During the past 4 years, 26 quarantine inspectors from the Territory have attended East-West Centersponsored, 3-month training courses in plant quarantine procedures and techniques. The aim of these courses is to train inspectors to properly carry out their duties in controlling immigrant pests which endanger the agricultural economy.

Plant diseases have caused serious problems in the Territory. A disease broke out on cacao trees at Ponape and Truk in 1962. It was later identified as a fungus (Phytopthora palmivora) and was arrested by completely cutting out and burning seriously infected trees. A continuing preventive program is required to hold the disease in check.

The staff plant pathologist, aided by consultants from the Universities of Hawaii and California, South Pacific Commission, and Food and Agriculture Organization, is continuing to investigate a serious breadfruit disease, originally reported from Pingelap Atoll in Ponape District. Since that time similar breadfruit disease reports have come from Jaluit Atoll, Kili Island, Ebon Atoll, and Namorik Atoll in the Marshalls; Ponape District islands; Mortlock Islands in Truk; Yap Islands; Guam and Saipan. The disease is a "die back" type with uppermost branches being affected first, quickly resulting in complete death of the tree.

The coconut rhinoceros beetle remains the most serious agricultural threatening the Territory's economy, although it has been confined to the Palau District. Controls by sanitation and biological means have been in use for several years and have reduced the beetle population in Palau; nevertheless, the coconut palms there still suffer considerable damage. Typhoons in Palau during recent years have increased this pest's breeding grounds-debris and fallen coconut palms. The Territory participates in the South Pacific Commission Rhinoceros Beetle Control Project.

The melon fly (Dacus cucurbitae) has been a serious insect pest of the Marianas. From 1964 to 1967, a fruit fly eradication program was in effect in Saipan, Tinian, Agrihan and Rota, using the sterile-fly technique and the male annihilation method. Complete eradication of this fruit fly was completed in 1967.

The African snail continues to be a major pest in Ponape, Truk, Palau, and the Marianas, inhibiting commercial and subsistence vegetable crop production and resulting in low economic returns and a decline in farmer initiative.

### Agricultural Products

Except in the Mariana Islands District, the principal commercial agricultural product of the Territory is

Fiscal Year 1968

copra. It is hoped cacao may become another cash crop in Ponape and Truk Districts with a possible minimum production of 75 tons of cacao beans for export by 1970. Black pepper is being established at Ponape on a small commercial scale where individual farmers are planting 1/6 acre pepper gardens under the direction and guidance of extension agents. A pilot project on rice production for local consumption is underway at Ponape with 50 acres planted so far. A total of 50,000 pounds of polished rice was produced this year.

Taro, arrowroot, yam, sweet potato, cassava, breadfruit, pandanus, banana, citrus and a number of other introduced crops, used mainly for local subsistence, are the remaining principal crops.

The agricultural potential and cultural preference of each island place different emphasis on the various crops. For example, in Palau District, cassava has taken the place of breadfruit. In Truk District, breadfruit and giant swamp and dry land taro varieties are the most important food crops.

On Ponape Island, yam culture is highly developed, having a social prestige role as well as serving subsistence purposes. Large yams, sometimes weighing several hundred pounds and many years old, play a dominant role in the ceremonial life of the Ponapeans.

Traditional cultural practices are still followed for most subsistence crops. Coconuts, breadfruit, pandanus, bananas and other trees are planted with very little cultivation. Taro is cultivated in pits where the soil has been improved by the use of fallen leaves, cut grasses, and compost. Dry

land row crop agriculture is practic to some extent in Palau and Marianas. In the other districts we little ground cultivation is done excess in Ponape, where holes are special prepared for planting yams and vines are carefully trained up live that

The long-range coconut planting program is aimed at thinning and bushing, replacing senile and debilitated palms, indigenous labor and desire, trained agricultural personnel, and material incentives serve to motivate such a **pr**ogram.

The Agricultural Division is urging large improvement of transportation and copra storage by demonstrating better types of small boats and better warehousing design for use in outlying areas.

> One Micronesian completed work agriculture and two received their B.S. in the Philippines and United States.

## Agricultural Experimentation

In 1964, the Agriculture Division began a black pepper project in of \$200 to use for purchase of fern posts for plant supports and fertilizer. He will begin paying back his loan after his pepper garden comes into production. Each year the Government retains a portion of his crop until the entire loan is liquidated. Local farmers on Ponape have established 350 (100-vine) pepper gardens. About 5,000 pounds of black and white pepper have been processed from the Ponape demonstrational planting and private farms.

The rice project at Ponape continues. Twenty-five acres of new paddy land are under cultivation making a total of 50 acres. A rice technician from the Philippines continues as project supervisor. Six groups of Ponapeans are clearing land and building paddy fields for growing rice in four municipalities. Two Ponapeans who were sent to Taiwan for a 6month on-the-job training program in rice culture last year are providing additional technical and extension coverage to the farmers.

Improvement of existing subsistence crops is being achieved through selection and propagation of higher yielding, disease-resistant varieties, and by demonstration and training in better cultivation and fertilization practice. American and Micronesian extension workers handle the extension service program of the Agriculture Division.

## Food Supply

Some areas of the Territory do not have a well-balanced food supply, but rarely do serious shortages of food occur except when major disasters. such as typhoons, strike. The Administration and local governments send relief supplies after a disaster until sufficient food is available from local

sources. U.S. Department of Agriculture commodities such as rice, flour, dry milk, lard, peanut butter, and canned meat have been distributed for typhoon relief. Agriculture extension agents with new planting materials and tools are assigned to damaged areas to help the people replant food crops.

### Water Resources

With an annual average rainfall of over 100 inches a year, sufficient ground water for crop production exists in most areas. A lack of supplemental water supplies for irrigation limits commercial vegetable production in the Mariana Islands during the dry season. Certain atolls in the Northern Marshalls have insufficient water to sustain life throughout the year. Lengthy droughts have a retarding effect on crop production because supplemental water supplies are not available.

Throughout the Territory, catchments and cisterns to hold water for livestock are lacking. Piped water is generally not available in the scattered farms of Saipan, Rota, and Tinian where water must be hauled to livestock herds during the dry season.

Very seldom is additional water needed for crop growing in districts other than the Marianas, except in nurseries to start young plants for later transplanting to the field. Lack of an adequate irrigation system in the Ponape District will inhibit expansion of rice production on a commercial scale.

| Chapter 4 | i | ĺ |

In 1964 a nonindigenous firm, the Micronesian Development Company, was given a lease to develop 7,500 acres of land on Tinian, Mariana Islands District, for livestock. To date 250 acres have been planted in mixed feed, corn, soybeans, and sorghum With additional introduction from the United States, local purchases, and normal herd production, the Micro nesian Development Company's herhas increased from 700 head in 196 to about 1800 head this year.

The principal livestock in the Terr tory are swine and poultry. In add tion, cattle, goats, and carabao as found on the high islands. Chicker are in greatest number and are left roam and breed at will, although a fe poultry farmers at district cente house their chickens and purchase hi quality egg-laying birds from the Ag culture Division. spraying programs are in effect for all government demonstrational livestock and technical assistance to indigenous livestockmen is provided on request.

The goal of the Marine Resources Development Program is to conserve, develop, and use the Territory's greatest natural resource-the ocean and its products-for the nutritional and economic enrichment of the Micronesians. To develop this resource, the Administration is engaged in six major program efforts: conservation, inshore fisheries development, offshore fisheries development, boatbuilding, research, and training.

### Conservation

The objectives of the conservation program are to protect and encourage maximum proper use of the marine resources of the islands. A Palauan and a Trukese, who trained at the East-West Center in Hawaii, direct the conservation program in their districts. Another conservation officer attended the 2-month Fisheries Training Center course in Palau in 1968. A newly recruited fourth conservation officer rounds out the force.

These men are assisted by a Peace Corps Volunteer who specializes in developing educational programs to teach the people the need for and value of well-designed conservation programs. Local constabulary offices in each district assist with enforcement work. Local radio stations and schools cooperate in educational activities.

The inshore fisheries development program strives to promote and encourage full development and use of marine resources for the people of the Territory, including marine recreational resources, sport fishing, skin diving, shelling, and commercial fishing, including trochus shell, pearl culture, and trepang.

With the help of Peace Corps Volunteers, the Marine Resources Development Program has opened offices in Truk, Ponape, and Yap. In Truk, a Fisheries Volunteer assists the Pis Fisheries Cooperative with its operational and construction programs. Another Fisheries Volunteer is trying to develop the fisheries of the outer islands with special attention to re-establishing the formerly lucrative trepang (sea cucumber) fisheries of Truk. Another Fisheries Volunteer is helping to train the crew and engineer of the Government tuna boat in the proper operation and maintenance of shipboard equipment. Other Fisheries Volunteers, under the direction of the Marine Resources program, work in various ways to develop the inshore marine resources of districts to which they are assigned.

The United Nations Food and Agriculture Organization (FAO) and the South Pacific Commission (SPC) sponsored a fisheries training course in Palau in June 1968. The FAO staff member who directed the course was assisted by the SPC Fisheries Officer and the Fisheries Management Biologist of the Trust Territory. Two experienced fishery experts from Hawaii and the Cook Islands instructed the 21 trainees from New Guinea, Guam, and the Trust Territory.

The SPC also scheduled a top meeting of fisheries experts in K-but it was canceled at the last mi when transportation difficulties a Because a number of experts already in Koror or Guam, a Territory Marine Resources ference was called instead to di development of marine resource grams.

#### Offshore Fisheries Development

The goals of the offshore fisi development program are to procommercial exploitation of ski tuna stocks by Micronesian fishe to develop freezing, canning, and cessing operations as well as building and repair facilities at su locations throughout the Terrand to promote an increase in fishing for marlin, large tuna other game species.

The major marine industry Trust Territory is the skipjack f in the Palau District which an lands about 4,000 tons of fish, at about \$420,000, from manned largely by Okinawan men.

To prepare Micronesians f ever-increasing role in this fisher Administration sponsors an adfisheries training program in where Micronesian fishermen wskipjack boats operating of Hawaii.

Because live bait is essent skipjack fishing, the program at to explore the availability of li in the Territory. During the reperiod, the Government tuna was used to conduct a survey i to determine the availability and dance of the local bait specie survey produced inconclusive

Site surveys for a commercial fishassisted with a thorough study of the water resources of Dublon. Construction estimates were prepared to help determine the most practical of the

The boatbuilding program seeks to wooden, molded-glass, steel, and ferro-cement boats operated by the The major marine industry in the commercial fishing industry, the

> Boatbuilding and drydocking acti-All operations remain under the supervision of the Trust Territory boatbuilding specialist who instructs workers in modern boatbuilding and repair techniques. More than 70 boats, ranging in size from 8 to 45 feet, were built during the year for use throughout the Trust Territory and Guam in fishing, hauling copra, carrying freight and passengers, and serving as supply, support, and recreational vessels. About 23 workers were employed at the shipyard and sales totaled \$137,181.

> The working area at the shipyard exceeds 10,000 square feet. A doubledecked warehouse, a large loft, concrete work dock with heavy duty

crane, one construction and repair ways, one repair ways, and one small boat ramp are in use. A small machine shop added during the year is being enlarged as demand warrants. All commercial fishing vessels and most Government and private boats in the Palau area are maintained at the yard.

New construction continues at a rapid pace. The shipyard is now formulating plans to begin building ferrocement boats, barges, and pontoons for bridges and floats. In addition, plans to start construction of moldedglass hulls for vessels in the 14 to 25 foot range are being studied.

Inquiries and orders for boats ranging up to 45 feet have come from as far away as Hawaii, Samoa, and Tahiti. Efforts are being made to determine the feasibility of developing these markets and whether suitable shipping arrangements can be made.

# Biological and Oceanographic Research

The goal of the marine research program is to establish in Palau District a marine biological research laboratory which will increase knowledge of phenomena related to inshore and offshore waters of the Territory. The laboratory will provide access to this rich biotic province at a particularly favorable place, will include research and housing facilities for visiting scientists, and will undertake long-range applied and basic research projects to obtain the scientific information required to foster development and conservation of the Territory's marine resources. A number of universities and agencies have indicated a desire to conduct marine research programs in Palau if laboratory facilities can be provided.

Fiscal Year 1968

#### **FORESTS**

The Forestry-Conservation Office of the Agriculture Division formulates policies and plans for forestry and conservation service, including water, soil, and range conservation, and develops parks and wildlife reserves. The office provides technical leadership and guidance to district officials on forestry and conservation matters, develops professional standards for forestry-conservation personnel, and coordinates the functions of these personnel throughout the Territory. The Forestry-Conservation Officer has drawn up a set of principles and guidelines to govern operations of his office.

The forestry-conservation program is directed toward management of the "wildlands" of the Territory. It includes forestry in its usual sense as well as management of the recreation and scenic resources of "wildland" areas. Scarce and non-renewable resources will be managed with objectives of protection and preservation. Renewable natural resources will be managed with objectives of multiple use and sustained yield.

Seven species of forest trees have been planted in the demonstration forest plantation at Airai on Babelthuap Island, Palau District. Plans are underway to establish the Airai Watershed and Natural Habitat to preserve existing vegetation in its natural state and to provide the greatest amount of water retention and catchment for the Koror domestic water system.

Organization of the Nekken Forestry Station on Babelthuap has been

completed. Nursery techniques being worked out for promising lo timber species as well as for exot already in Palau. Present emphasis on techniques and species for rehabtation and reforestation of the deteorated grassland/savannas. So promising local species are Caiphyllum (two local varieties), Campisperma vrevipetiolata, Gmel. palauensis, Horsfieldia umaklaal, a Intsia bijuga. Some exotics with loc ly available seed source are Casuar equisetifolia, Eucalyptus deglupta, a Swietenia macrophylla.

The knowledge gained at Nekl will be extended to municipalit homesteaders, and private landown by using the present Nekken staff a nucleus for a forest extension p gram. Three Micronesians are atteing Bulolo Forestry Training Center New Guinea on a 3-year diplo training program.

In past years, a limited amount lumbering has been carried out in ar within easy reach of water transportion. The most easily accessible trare harvested first and lumbering in area ceases when the limit of acceibility is reached. The German a Japanese administrations did so lumbering on Ponape Island, and Japanese carried out small-sc lumbering operations in Palau. Lo inhabitants have relied for centuries local lumber to provide build materials for houses, canoes, a boats.

Chanter 8

INDUSTRIES

Manufacturing in the Territory consists primarily of cottage-type activities in the subsistence sector. The few activities directed toward production for the market economy are characterized by inadequate capitalization, poor management, and an untrained labor force.

Boatbuilding is a widespread economic activity but except for the Palau Shipyard, discussed in Part VI, Section 4, Chapter 5, it is unorganized and carried on by individual craftsmen working in their own homes.

Some small-scale handicraft production exists. In general, handicraft products are readily salable, but production at reasonable prices needs to be stimulated. Marketing outlets are established on Guam; Kwajalein, Marshall Islands; Koror, Palau; and Saipan, Mariana Islands.

At present most small industries fall in the service classification. These businesses, which may be family-owned and operated, include auto repair shops, barber shops, a charcoal manufacturer, electricians, gas stations, a goldsmith, movie theaters, photographers, poultry and egg farms, refrigeration repair shops, restaurants, saw mills, stevedoring companies, and taxi and bus companies.

As previously mentioned, capital for economic development is available from outside sources and through Government loan funds.

Provisions governing licensing of businesses are found in the Trust

Fiscal Year 1968

Territory Code. Under section 1100(a), the district administrator grants business permits to citizens of the Territory, except where the district administrator determines the public interest would be jeopardized.

Under section 1100(b) the High Commissioner is given authority to license, upon such reasonable conditions as he may prescribe, noncitizens to engage in economic activity within the Territory provided such activity would not restrict opportunities for economic advancement of Territory citizens.

Citizens and noncitizens desiring to incorporate in the Territory must comply with section 1118 of the Code which enumerates the bare minimum of information which the articles of incorporation must contain. Upon approval of the articles of incorporation and bylaws, the High Commissioner, pursuant to section 1116, may issue a charter.

All power facilities are provided by the Territory Government.

#### Chapter 9

# TRANSPORTATION AND COMMUNICATIONS

Transportation and Communications are vital elements in the Administering Authority's program for improving the welfare of Micronesians and for developing a viable economy in the Territory.

# Maritime Transportation

As a vital support service, transportation plays a key role in accomplishing the Administration's goals for the Trust Territory. Modernization and expansion of the transportation system, particularly in the maritime area, must go hand-in-hand with capital improvement and other developmental programs. Past efforts to improve maritime transportation have not been particularly impressive, but steps are being taken to improve service and acquire new vessels.

The Territorial Government owns three major logistic vessels which have been operated since 1965 on contract by the United Tanker Corporation of New York. This corporation has a charter from the Government establishing a local corporation, Micronesian Line, which operates these vessels: the M/V Palau Islander, M/V Gunner's Knot and M/V Pacific Islander. Micronesian Line, during the year under review, purchased a fourth vessel, the M/V Majuro, which began service in December 1967.

Twenty-three Micronesians are serving in a licensed officer capacity aboard the four vessels. Of the four Micronesians who completed training at the Philippine Maritime Academy during the year, three are assigned to the logistic vessels and one to terminal operations in Ponape. One other Micronesian continues training at the Academy.

In March 1968, the Administration began negotiations with several shipping lines for a new, 10-year contract for operation of the Trust Territory's logistic shipping. At year's end, several bidders were competing for the maritime contract; improved shipping service for the Territory, including direct service from the United States will result.

Local Micronesian companies operate the fleet of Government-owned

service, transrole in accomtion's goals for the Trust Territory. Modernization and expansion of the transportation system, particularly in the maritimarea, must go hand-in-hand with capital improvement and other developmental programs. Past efforts improve maritime transportation have not been particularly impressive, but steps are being taken to improve service and acquire new vessels.

The Territorial Government own three major logistic vessels which haw been operated since 1965 on contract by the United Tanker Corporation of New York. This corporation has charter from the Government establishing a local corporation, Micronesian Line, which operates these vessels: the M/V Palau Islander, M/V Gunner's Knot and M/V Pacific Islander. Micronesian Line, during the year under review, purchased a fourth vessel, the M/V Majuro, which began service in December 1967

Twenty-three Micronesians art serving in a licensed officer capacity aboard the four vessels. Of the four Micronesians who completed training at the Philippine Maritime Academy during the year, three are assigned to the logistic vessels and one to terminal operations in Ponape. One other Micronesian continues training at the Academy.

In March 1968, the Administration began negotiations with several shipping lines for a new, 10-year contract for operation of the Trust Territory's logistic shipping. At year's end, several bidders were competing for the maritime contract; improved shipping service for the Territory, including direct service from the United States will result.

Local Micronesian companies operate the fleet of Government-owned

Part VI-Economic Advancement

field trip vessels which travel from district centers to out-islands and which are excluded from the above contract. Because of limited revenue from operation of the vessels, the Government subsidizes portions of operating costs to meet service requirements in all areas. The 100-foot, steelconstructed, diesel-powered cargo and passenger vessels-the M/V Truk Islander and the M/V Yap Islanderprovide field trip service in Truk and Yap Districts. They are operated by the Truk Transportation Company and the Yap Shipping Cooperative Association respectively. In Ponage, the 134-foot M/V Kaselehlia is operated by the Ponape Federation of Cooperative Associations. The 176-foot M/V Ran Annim is operated in the Marianas by the Saipan Shipping Company. In the Marshall Islands District, service is provided by the 157-foot M/V Militobi, operated by the Kwajalein Islands Trading Company. Additional service in the Marshalls is provided by the M/V Ralik-Ratak, owned and operated by the Marshall Islands Import Export Company, During the year, the 65-foot Government-owned M/V Feloch was transferred from Truk to the Marianas where it will provide shuttle service between Saipan, Tinian, and Rota.

To upgrade the Territory's logistic transportation, the Administration has begun to place in service additional administrative vessels to meet educational, medical, and community services requirements throughout the Territory. Previously such services have had to be combined with regular field trip service. By separating them, the field trip vessels will be able to confine their operations to meeting the direct logistic needs of the people. The first administrative vessel, the 178-foot, all-steel M/V James M. Gook. was obtained by the Govern-

ment and began service in April 1968. Negotiations are underway for acquisition of two additional vessels for administrative use.

Local Micronesian companies on a private enterprise basis handle stevedore, terminal, and shipping agency functions at district ports.

Published Port Regulations provide uniform rules consistent with commercial port regulations throughout the world on the regulation and operation of ports in the Trust Territory. Micronesians have been selected to serve as port managers at each district port.

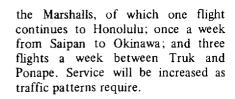

# Air Transportation

Air transportation has improved considerably since May 1968, when Air Micronesia took over air service in the Trust Territory. Air Micronesia is a corporation formed by Continental Airlines, Aloha Airlines and the United Micronesia Development Association.

Jet travel among the Marianas, Truk, the Marshalls, and Guam and to Honolulu in the east and Okinawa in the west has been inaugurated with Air Micronesia's Boeing 727. Air Micronesia also operates a DC-6AB between Guam, Saipan, Rota, Yap, and Palau and the two Government-owned SA-16 Grumman amphibious aircraft between Truk and Ponape. Jet service will be extended to Ponape when the airfield under construction is completed in 1969, and to Yap and Palau when airfield improvement is completed in Palau.

Air service now consists of: Daily jet and/or DC-6AB flights from Saipan to Guam, with stops in Rota twice a week; twice a week from Guam to Yap and Palau; twice a week to Truk and

Fiscal Year 1968

Air Micronesia is conducting a broad program of training for eventual placement of Micronesian employees in all phases of its operations.

Another aspect of Air Micronesia's service in the Territory is tourism. The airline plans to build a hotel in each district and to contribute to tourist development through advertising and promotion.

A commercial air taxi passenger and cargo-carrying charter aircraft company operates on a non-scheduled basis between Guam and Saipan and between Guam and Yap, Ulithi, Palau, and Truk.

The government, in coordination with the Federal Aviation Administration, is continuing a program to improve landing fields and ground services as well as navigational aids and communications facilities in each district.

## Land Transportation

Private bus companies operate Truk, the Marshalls, Palau, Ponap and the Marianas. The Saipan Bi Company, the largest of these corpanies, operates a fleet of six model diesel-powered buses providing scheuled service to all points on the islamand has a contract with the Government to provide a subsidy for studel transportation.

Individual participation in current economic growth is seen in the increased number of vehicles in the Territory. A breakdown of the number of vehicles in the Territory, by type, for fiscal years 1965 throug 1968 is shown below.

During the year, three Micronesian on Government scholarships con pleted a 3-month course in automotiv repair at the East-West Center i. Hawaii. The number of personnestudying automotive repair and relate fields will be increased in 1969. Micronesian personnel also take part i on-the-job training programs. This years is young men studied new vehicl assembly in the central repair section of Public Works and students too

# Land Transportation

Private bus companies operate in Truk, the Marshalls, Palau, Ponape, and the Marianas. The Saipan Bus Company, the largest of these companies, operates a fleet of six modern diesel-powered buses providing scheduled service to all points on the island and has a contract with the Government to provide a subsidy for student transportation.

Individual participation in current economic growth is seen in the increased number of vehicles in the Territory. A breakdown of the number of vehicles in the Territory, by type, for fiscal years 1965 through 1968 is shown below.

During the year, three Micronesians on Government scholarships completed a 3-month course in automotive repair at the East-West Center in Hawaii. The number of personnel studying automotive repair and related fields will be increased in 1969. Micronesian personnel also take part in on-the-job training programs. This year six young men studied new vehicle assembly in the central repair section of Public Works and students took

Part VI-Economic Advancement

part in similar programs sponsored in some districts by the U.S. Office of Economic Opportunity agencies.

#### Roads

Roads in the Territory range from concrete and macadam in good condition to dirt roads which are little more than footpaths. Road maintenance is difficult, especially on the high islands where heavy rainfall washes out roadbeds, and limited budgets have made difficult more than token upkeep on roads outside district centers. Limited budgets have also kept road construction at a minimum, even though the Administration considers roads important links to the outlying villages in the islands where road networks are possible.

A designated road system exists throughout the Territory. The construction and maintenance of primary roads are the basic responsibility of the Territory Government through the District Administration. District governments are responsible for roads designated as secondary, and municipal governments for local roads not designated as either primary or secondary.

#### Communications

Major communications stations in each district center form a closely integrated network, communicating with each other and with outside points through common radiotelegraph and radiotelephone networks. Twenty-four hour communications are maintained between Headquarters and district centers through a central receiving and transmitting station in Saipan.

Rapid expansion of activities in the Territory has overtaxed the major communications system. The Federal

Aviation Administration is now providing engineering assistance in a major revampment of the Territory's system. The new system, to be completed by 1970, will provide high speed multichannel radioteletype circuits and multi-channel radiotelephone service from Headquarters to outside points and from all districts to Headquarters, as well as a commercial radiotelephone circuit through a Saipan interconnect to RCA Guam and worldwide points. Radioteletype now is available only between Truk and Saipan, the Marshalls and Saipan, and Saipan and Guam; manual Morse code is used to communicate with the other districts. Commercial radiotelephone service is available only between Saipan and Guam.

Direct radiotelephone service is available between Headquarters, the Liaison Office in Guam, all district centers, aircraft and ocean vessels. The Liaison Office in Guam also has direct radiotelephone service to district centers.

Each district station has facilities to communicate with aircraft, shipping, outer islands and point-to-point. All maintain a 24-hour guard on a number of frequencies including international distress frequencies. Radio beacons are a part of each station and furnish navigational assistance to ships and aircraft. VHF transmitter/receiver units provide interference-free transmissions with landing and departing aircraft in all districts.

Two-way, single-sideband, 100-watt radio stations are now on 68 outer islands throughout the Territory. All major populated islands have now been supplied with two-way radio communications. About 75 short-range "citizen band" stations are also in operation. These provide intra-atoll

Fiscal Year 1968

and island-to-island communications for small population centers.

Radiotelephone, radiotelegraph, and radioteletype transmissions are provided for U.S. Weather Bureau administrative and weather observation traffic on a contractual basis.

The Trust Territory provides technical guidance and assistance to all non-government radio communications and particularly encourages communications on private ships. A total of 28 private ships are radio-equipped. The number of private point-to-point radio communications has also increased considerably. Two missionary groups have established their own networks which not only provide communications between missions in district centers, but also with mission stations in remote areas. Two transportation companies have established base stations for communications with their vessels. The Territory has 47 private land stations in operation.

The emergency coordination center in Saipan operates around the clock collecting weather forecasts, storm and typhoon warnings, and seismic tidal wave warnings which are routed on an emergency basis to all districts, radio-equipped out-islands, and to ships and aircraft in the area. This center has direct radio communications with the agencies issuing the warnings. In turn, radio stations at district centers broadcast the information on scheduled and/or emergency broadcasts.

Chapter 10

PUBLIC WORKS

During fiscal year 1968, the Public Works Department was reorganized so

that, under an overall Director Public Works, the department now three divisions: Construction, En neering and Design, and Operational Maintenance.

The director coordinates activit of the three divisions, proviadministrative guidance and survision, establishes policy, and outli goals relating to all public works a vities.

#### Construction Division

This division provides for imprentation and execution of approved Trust Territory capital provement program.

The Chief of Construction prepainvitations for bids, recomme award of contract to the low qualified bidder, reviews and analyzes constition work, and provides for inspect of work performed by contract. provides supervision of special c struction projects within the distrible conducts final inspections of w performed by contract and appropayments to contractors.

#### **Operations and Maintenance Division**

The function of this division is to provide technical advice and assistance to the various districts on matters relating to operations and maintenance of Government-owned plant, public utilities, and related public works facilities. This assistance is provided by technicians operating in the following subdivisions: electrical, water and sewage, buildings and grounds, and roads and equipment.

The division's activities are carried out by developing standards and procedures for operations and maintenance which are coordinated with the district administration and district public works personnel under whom actual maintenance and operations are performed.

During the reporting period, procedures were set whereby specific maintenance programs will be developed in the districts to upgrade and improve existing buildings, equipment, and utilities.

Through use of equipment and personnel the division's activity has provided support in the districts to all

capital improvement projects, whether performed by force account or by contract.

Some projects in which the division actively participated during the year are: improvements to airfields for jet

operation in all districts, relocally 2-700 KW generators from Ky to Saipan to alleviate power shassistance in typhoon rebuil Palau, Rota, Tinian, and Saip surfacing the road from Tomil to Coast Guard Loran Station,

Magnificent scenery as in this view of Pagan,

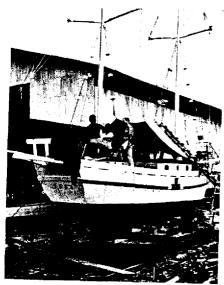

Territory's economic structure is based mainly on subsistence farmind tishing. Products such as has are plentiful, but they are cond and are not exchange earners. Iren obviously participate in these y efforts, nevertheless elementary of attendance is quite good.

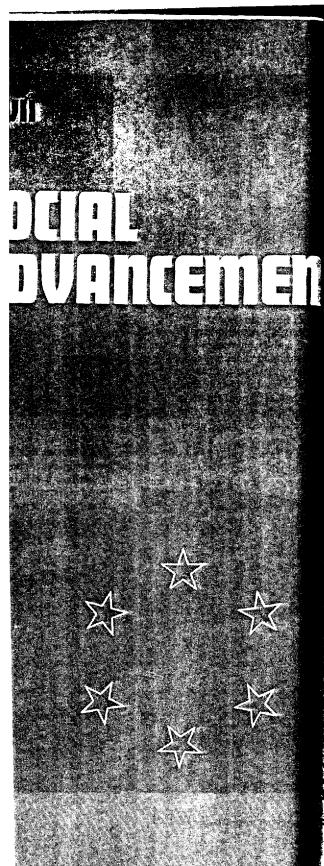

The ocean poses both problems in transportation and opportunity in the resources it contains. The outrigger canoe still plays a vital role in both. The Palau shipyard, however, continues to expand, and its modern facilities will play a key role in Administration efforts to exploit the Territory's marine resources.

PART VIII

The Government of the Trust Terriory promotes social advancement of the Territory through programs of the Territory through programs of the territory through programs of the public health, and by improving the tandard of living. It encourages Microtesians to voluntarily integrate into their own culture useful features of their civilizations to enable them to the total more meaningful and rewarding the total tot

Chapter 1

GENERAL SOCIAL CONDITIONS

Social and cultural diversity exists mong the districts, but increased ontact and education have brought bout adoption of new cultural forms ind have created a more common attern of social organization throughout the Territory.

The basic units of social organizajon in the Carolines and the Marshalls
re a number of lineages tracing decent matrilineally. In the Central
arolines, in Truk, the senior male of
hat lineage which first settled on a
articular island possesses considerable
tatus, and chiefs still enjoy traditional
restige and authority. The Polynesian
lands of Kapingamarangi and
lukuoro, support a similar level of
ocial organization based on patrilineal
escent.

Fiscal Year 1968

On Ponape Island, in the Eastern Carolines, a complex social system of titles exists with most male adults holding titles in either of the two lines of nobility or in the line of commoners. The island itself is divided into five districts, formerly independent areas, each having two lines of chiefs headed by Nanmwarki and Naniken, respectively. The titles bestowed by these chiefs advance a man in social prestige. This status system is still a potent force in local social life.

The traditional social organization of Kusaie, Ponape District, has been modified due to the influence of missionary teaching over the last hundred years.

A rather complex class system still exists in the Marshall Islands. At the lower levels are the headmen, alap, of the families of commoner status, directing their affairs and speaking for them in larger councils. At the higher levels are the chiefs, iroij, of the families of "royal" status, of whom the highest are paramount chiefs. Between these royal and commoner leaders are chiefs and families of varving degrees of status. The importance of this social stratification is evident in the Marshall Islands Congress charter which permits the Iroii laplap to sit by hereditary right.

In Palau, in the Western Carolines, hamlets were traditionally ruled by a

council of 10 titled male chiefs and a parallel "advisory" staff of 10 females, each representing one of the ranking clans of the community. In addition to these two councils, both men and women were, and continue to be, grouped in numerous societies for social and economic purposes. Palauan hamlets were loosely linked into village clusters, constituting the municipalities of today. These village clusters in turn were linked in alliance to make up two great semistates, north and south, each headed by a high chief. Due to rapid change in this traditional system, however, it has been possible for today's younger, educated men to assume positions of prestige in the community.

Social stratification reached a peak in Yap where nine social classes were recognized, with the three lowest classes as well as the Trukese-speaking outer islanders relegated to a subordinate status. A milder form of this class stratification is still important on Yap today. In early times, Yap dominated an economic-religious empire which allegedly reached as far as Kusaie in the Eastern Carolines. Today, remnants of control are found in the Ulithi-Woleai areas, where a landlordtenant relationship exists through affiliations with villages and families in Yap, primarily in Gagil Municipality. Large fleets of canoes customarily made annual trips to Yap for food and building materials which were urgently needed in the low islands. In turn, the low islands would provide manpower for major construction projects as well as luxury items or gifts, such as the products of their looms. This exchange of gifts is still practiced.

In the Marianas, Western family structure has been adopted; the traditional social class structure of nobles and commoners of Chamorro society is completely gone. Within the Saipa area, however, are central Carolinia communities which became established during the first half of the 19t century and still retain a more typically Micronesian matrilineal social of ganization.

Most of the inhabitants of t Territory today are Christians, wi the Catholic and Protestant fait about equally represented. The inc pendent Marshallese Protesta Church, a Congregational sub-sect. over 100 years old. Catholicism, int duced into the Marianas before 16 and transmitted to other districts the late 19th and early 20th centur is represented by the Capuchin or in the Guam diocese, which inclu all islands of the Marianas; elsewi Catholic missionary activity is c ducted by the Society of Jesus. Evwhere religious faith is strong. Abo inal superstitions and taboos are found among many islanders, howe and in several areas, traditional medicine is still known, used, valued.

# Social Organizations

Traditional "social clubs" for are important in the Western Central Carolines to this day. (non-governmental social organiza are rare, except for the village ch Palau which still play an importance in the social life of the contity for the middle-aged and groups.

The Japanese administratio couraged formation of age-grad ganizations, particularly for mer means of modernization. Son these organizations, in modified exist today in Yap and Palau a

is completely gone. Within the Saipan area, however, are central Carolinian communities which became establish ed during the first half of the 19th century and still retain a more typical ly Micronesian matrilineal social or ganization.

Most of the inhabitants of the Territory today are Christians, with the Catholic and Protestant faith about equally represented. The inde. pendent Marshallese Protestant Church, a Congregational sub-sect, over 100 years old. Catholicism, introduced into the Marianas before 1680 days, both as a vehicle for community and transmitted to other districts in labor service and as a focus for wholethe late 19th and early 20th centuries some recreational activity. "Youth is represented by the Capuchin order." Corps." labor batallions to provide in the Guam diocese, which includes young men with needed work experiall islands of the Marianas; elsewher Catholic missionary activity is con ducted by the Society of Jesus. Every where religious faith is strong. Aborig inal superstitions and taboos are still young males on Ebeye. The particiand in several areas, traditional foll medicine is still known, used, and valued.

## Social Organizations

Traditional "social clubs" for med are important in the Western and Central Carolines to this day. Other non-governmental social organization are rare, except for the village clubs if Palau which still play an important role in the social life of the communication nity for the middle-aged and older groups.

The Japanese administration en couraged formation of age-graded of ganizations, particularly for men, as means of modernization. Some 🚺 these organizations, in modified form exist today in Yap and Palau and an

concerned mainly with athletics, the performance of community labor and, in some minor instances, with affairs of local government. Graduates of secondary and higher schools have organized for social and discussion groups in all districts. With the enconragement of American residents, Boy Scout troops have been organized in the Mariana Islands, Marshall Islands, Truk, and Ponape districts.

Youth organizations have been popular in Micronesia since Japanese ence and a sense of civic responsibility have been initiated in Palau, Ponape, and the Marshall Islands districts. Most successful of these was a special 12-month program for unemployed pants received a dollar daily stipend and performed needed community work. Elsewhere these programs foundered due to insufficient local financial support. All districts this past year have participated enthusiastically in the U.S. Office of Economic Opportunity (OEO)-funded, Trust Territory Government-sponsored Neighborhood Youth Corps program, described in Part VII, Chapter 6. The Marianas District has achieved notable success in organizing and financing youth clubs in each of its village communities, though to date program emphasis has been exclusively recreational.

In the area of organized recreation, one of the outstanding events of the reporting period was the Micronesian Olympics Conference, held in Saipan in June 1968. With Peace Corps financial assistance, representatives

from all six districts assembled to discuss ways and means to organize an "Olympics," tentatively planned for Saipan in 1969. Also noteworthy was the formation of the Marshall Islands Recreation and Amateur Athletic Association. The association of diverse sports groups into a unified group will no doubt contribute to increased sports activities in that district. Under the stimulus and guidance of Peace Corps Volunteers assigned to sports and recreation, similar associations or federations are planned for other districts in the Territory.

Trained recreation leaders, especially among Micronesians, are scarce in the Territory. To help alleviate this situation, discussions have begun with officials at the East-West Center in Hawaii aimed at creating a special course of study there for indigenous sports and recreation leaders.

The American expatriate population continues actively to support the many sporting and recreation events in the Territory. Recreation leaders from the large American community of Kwaialein in the Marshall Islands have been especially generous in contributing athletic equipment and supplies to the Marshall Islands District where sports activities are centered in Majuro. With the support of the Mariana Islands District Community Action Agency, Western-style day camping was introduced for children of Saipan in the summer of 1968. A 2-week session in late June to train the staff of 25 Micronesian high school students was to be followed by 8 weeks of camping for 7 to 13-year old children. The camp featured the Territory's first American Red Cross swim instruction program as well as other traditional camp activities.

Part VII-Social Advancement Fiscal Year 1968

# HUMAN RIGHTS AND FUNDAMENTAL FREEDOMS

Trust Territory inhabitants are guaranteed basic human rights and fundamental freedoms as set forth in the Trust Territory code. These are:

- Freedom of religion, speech, press, right of assembly and petition
- No slavery or involuntary servitude
- Protection against unreasonable search and seizure
- No deprivation of life, liberty or property without due process of law
- No ex post facto law
- Excessive bail, excessive fines, cruel and unusual punishments prohibited
- No discrimination on account of race, sex, language or religion
- Freedom of migration and movement within the Territory
- The maintenance of free elementary education
- No imprisonment for failure to discharge contractual obligations
- Writ of habeus corpus
- No quartering of soldiers in private houses
- Trade and property rights protected
- Due recognition of local customs.

The right of petition is used freely. Inhabitants have petitioned the United Nations as well as the Administering Authority. In the past, petitions to the Administration have usually concerned special considerations for individuals or groups. Petitions have been presented to the various U.N. Visiting Missions in both verbal and written form. These have involved such questions as visitor's permits, land claims and utilization, war damage claims against the Japanese Government, readmission to the Territory of former

Japanese residents, opening Territory ports to foreign common vessels, need for improved transtation services for specific areas, for examination of health condimination the Territory, and various subjects. Several citizens of the Territory have presented petition person before the Trusteeship Control of the Trustees

Districts continue to publish their fied Public Information Officer to dependent newssheets—the Marsha develop a more comprehensive program of public information for in-Times, respectively. In Palau and Yaz ternal as well as external consumption. The Headquarters Public Information Office continues to distribute press releases, feature stories, and photographs and other information materials to the press, radio, and television as well as to various government agencies, business organizations, and other **in**terested persons.

> To provide thorough coverage of the activities and proceedings of the

Fourth Regular Session of the Congress of Micronesia, the Micronesian News Service was established in June. It is headed by an experienced journalist, who is assisted by three Peace Corps media volunteers and six Micronesian trainees. Although funded by the Department of Public Affairs, the Micronesian News Service is a semiindependent news bureau and as such will be permitted to establish its own editorial policies within the limits of responsible journalism.

Radio. The number of radio receivers in Micronesia continues to grow and increasing numbers of Trust Territory citizens are furthering their education by this means. This is an education, not of specifics, necessarily, but in the sense of a growing awareness of the world that surrounds them.

All six radio stations in the Trust Territory have expanded broadcast hours to 18 per day and have increased news gathering and reporting services at the local level. Establishment of the Micronesian News Service will provide each station with access to Territorywide news; world news happenings have been brought into sharper focus through liberal use of such programs as "Scope," "This Week at the United Nations," National Aeronautics and Space Administration programs, Voice of America and Armed Forces news programs, as well as features recorded at and distributed by the Broadcast Center at Headquarters. The latter have pointed up Administration policies and programs and have enlightened listeners on legislation that affects them. Programs on political information and agricultural education have also been carried.

The spiritual needs of the six districts are served with radio programs,

Part VII-Social Advancement

Fiscal Year 1968

some locally produced, of each religious denomination.

Five of the six stations, Saipan excluded, carry programs that provide instruction in the English language. Each station broadcasts local and district news in English and the vernacular of the area. All local and public service announcements are likewise broadcast in two languages or more, depending on population needs. In Ponape, news is given in four languages.

Freedom of the press is jealously guarded in all locally produced programs. Because this broadcast policy is strictly adhered to, Trust Territory radio has many eager listeners.

The six stations of the Territory are staffed entirely with Micronesians, including managerial positions. Micronesian newsmen, announcers, and translators make up the balance of the 41 full-time employees in the radio network. These employees have been trained in the East-West Center in Hawaii, Voice of America in Washington, D.C., and on the job, supervised by competent American personnel.

During the year, a Radio Managers Conference, held in Saipan, provided discussions on programming, production, news, political broadcasts, personnel, and other subjects pertinent to radio station management.

The nerve center and funnel for information to the stations is Broadcast Center at Headquarters. Machines duplicate programs for each station, and their technical and specialized problems are handled by the Center staff.

Motion Pictures. One or more motion picture theaters showing three

or more films a week operate in e district as private Micronesian en prises. The Department of Educati Community Development and of Administration components, as wel mission organizations, arrange spe showings of films at various times.

Dissemination of U.N. Informati As in past years, the Administrat continues to make widespread disseination of information on the Uni Nations and its activities.

The Universal Declaration Human Rights has been translated in the nine major vernaculars of Territory, and it has been distribut to public school libraries, commun libraries, district legislatures and mucipal councils, and other commun groups such as women's organizatio An English version of the Declaratialso has been distributed.

Among other U.N. informati materials distributed are: Declarati on Granting of Independence to Co nial Countries and Peoples; The UN-World Organization for Peace as Progress; The United Nations a Human Rights; Article on UN Truste ship Council; United Nations Declaration on the Elimination of all Form of Racial Discrimination; United Nations Work for Dependent People Apartheid in South Africa; the United Nations and Decolonization.

Limited copies of the 1967 U Visiting Mission Report, Offici Records of the 34th Session of th United Nations Trusteeship Counc and the Report of the Trusteeshi Council to the Security Council on the Trust Territory of the Pacific Islanc were received. About 300 copies of these documents were duplicated and distributed to Trust Territory and local officials.

Limited copies of the 1967 UN. Visiting Mission Report, Official Records of the 34th Session of the United Nations Trusteeship Council, and the Report of the Trusteeship Council to the Security Council on the Trust Territory of the Pacific Islands were received. About 300 copies of these documents were duplicated and distributed to Trust Territory and local officials.

Part VII-Social Advancement

Materials on the United Nations are distributed to schools, libraries, district legislatures, and municipal bodies. They are posted on municipality office bulletin boards and school bulletin boards. They are also distributed in major local stores. Posters, pamphlets, papers, and publications of the United Nations are prominently displayed in schools, local district and municipal

# Indigenous Religious Practices

Christianity has supplanted earlier stition, however, is still prevalent and a devout ('hristian may still cling firmly to beliefs in ghosts and evil spirits.

Both Protestant and Catholic missions operate in the Territory. In the Marshall Islands, one of the mission societies was established 105 years ago Elsewhere, missionary activity may go back as far as early Spanish exploration days.

The United Church Board for World Ministries and the Society of Jesus represent the predominant Protestant and Catholic mission **gr**oups; the Liebenzell Mission, Seventh Day Adventists, Jehovah's Witnesses, and Assembly of God are also active. The Bishop of the Catholic Vicariate of the Marshall and Caroline

Islands maintains headquarters at Truk. The Catholic missions of the Mariana Islands are within the Diocese of Agana, Guam. Headquarters of the United Church Board are on Ponape Island.

Much mission work centers on education, as discussed in detail in Part VIII.

New missionary organizations desiring to become established in the Territory must have the necessary means of support and accommodation and must meet other requirements as well.

## Adoption

According to the Trust Territory Code, any suitable person may adopt a minor child by court decree if the court is satisfied that the child's best interests will be served by such adoption. The court requires consent of the natural parents, as well as the child's consent if the child is more than 12 years of age. The courts also recognize and will confirm the validity of adoptions effected in accordance with local customs if legal opinion is sought. Adoption is common throughout the Territory, usually being in accordance with local customs rather than under provisions of the Code. Legally, the adopted child and parents also have all the rights and duties of the natural child and parents, including rights of inheritance when there is no recognized custom as to inheritance rights of adopted children.

# **Immigration**

Sections 667 to 671 of the Trust Territory Code set forth requirements for immigration. Persons who are neither legal residents nor citizens of the Territory must obtain specific

Fiscal Year 1968

authorization of the High Commissioner to enter the Territory.

Visitor permits are issued for a specified period of time in accordance with regulations laid down by the High Commissioner and may be revoked at his discretion.

Rules and regulations concerning immigration apply equally to nationals of all countries including the United States.

An immigration administrator, appointed by the High Commissioner, is vested with administrative authority for all laws and regulations pertaining to nationality, immigration, and emigration as delegated by the High Commissioner. The Attorney General is responsible for legal problems related to immigration.

Chapter 3

STATUS OF WOMEN

Women in the Territory are equal in law with men. Women have equal access to courts and equal rights to own property, control earnings, act as guardians, and engage in business. Spouses are not responsible for each other's debts, either in civil law or local custom. Women have equal rights with men to hold public office and to vote.

Polygamy is prohibited by law. Arranged marriages previously were common, but today young people generally choose their own marriage partners.

Traditional patterns in some areas may still relegate women to a sub-

ordinate social position, but the no implication of degradation in traditional pattern of behavior, much of this traditional patter volves division of labor between sexes. The matrilineal pattern descent found in most of the Terr has made the traditional position

Truk has two important role in providing community leadership. The Adminsupports

participation of women in community and public activities.

The Headquarters Community Development Division promotes women's interest programs and acts as coordinator for information on Territorial programs relating to women's interests, such as women's club activities, Girl Scout programs, and training courses. All districts of the Territory now have an active women's interest program, headed by a Micronesian women's interest officer on the Community Development staff. It has not been possible this past year to fill the women's interest adviser position at Headquarters.

A consultant, assigned to the Territory by the Girl Scouts of the United States of America for 2 years, completed her contract at the end of the reporting period. During her tenure she succeeded not only in increasing the number of girls participating in scouting, but aroused renewed interest among community leaders for the scouting movement.

During the year, a significant event in the Girl Scout program was the series of leadership seminars and workshops conducted in each of the district centers and also on Ebeye. Two professional trainers from the Philippines aided the staff scout consultant in conducting these programs. At the end of the reporting period, the Territory had 30 Girl Scout troops with a total membership of 662 girls. Preliminary inquiries were exchanged with Headquarters. Girl Scouts of the U.S.A. and East-West Center regarding a possible Girl Scout leadership training course to be conducted in Honolulu under joint sponsorship.

Micronesian women participated in the women's development program of

Fiscal Year 1968 Part VII-Social Advancement

the Institute for Technical Interchange, East-West Center, University of Hawaii. Training was received in business methods, teaching, nursing, advanced commercial sewing, hotel management, and music leadership.

Out of 351 Micronesian students now attending colleges or other institutions of higher learning, 77-or 21%-are women.

The South Pacific Commission and the Food and Agriculture Organization have sponsored jointly the fourth Women's Home Economic Training Course in Fiji. Three women trainees, two from Palau and one from Truk, completed training at this center during the year. Three Micronesian graduates also took part in a 3-week home economics refresher seminar, sponsored jointly in Honolulu by the East-West Center and the SPC.

Chapter 4

The 1967 Territory Health Census revealed 41,000 persons in the Territory's labor force-that is, all persons, except students and housewives, between ages 15 and 65. Only about 16,600 were reported to be remuneratively employed and about half of these were listed as subsistence-copra farmers, fishermen, handicraft producers or boatbuilders, who receive a small cash income. For example, the estimated annual income per copra producer is about \$285. Thus some 8,000-or about 20% of the total employable population-received wages on either a regular or part-time basis. This percentage of actual wage earners among total potential work

force varies among districts, rar from a high of 38% in the Ma Islands to a scant 13% in Truk. other percentages are: Palau, Marshall Islands, 19; Yap, 18; Ponape, 17.

At the end of fiscal year 1 5,373-more than half the reco 8,450 Micronesian wage earners—employed by the Trust Terr. Government, other agencies of U.S. Government, such as the Wer Bureau, Coast Guard and Post Of district and municipal government the Congress of Micronesia.

conditions and wages, and other employers in the Territory frequently use it as a model. No attempt, however, is made to prevent contractors or other local employers from paying more than the minimum wage set by this Pay Plan. Wages and working conditions of Government employment are examined periodically to assure that such employment does not hinder free competition in the local labor market.

Interdistrict travel for purposes of employment is not common since most employment for inhabitants of the Territory is available at their respective district centers. The largest movement of this nature has been from Palau to Saipan and Guam but it has caused no serious problems.

### **Working Conditions**

All labor is voluntary except for penal labor, which is used for municipal and district projects to benefit local communities.

Many of the conventions and recommendations of the International Labor Organization have been incorporated into the employment policies and practices of the Trust Territory Government.

No employment conditions in the Territory involve underground work. Nightwork occasionally is necessary to load and unload cargo ships. Other nightwork involves radio operators, constabulary employees, power plant watchstanders and hospital personnel; 10% additional compensation is paid for regularly scheduled nightwork. Nightwork is not performed in any other type of employment except during emergencies. The minimum requirement of professional capacity

for masters and officers o merchant ships is observed.

Applicants for Government receive a medical ation prior to employment and on completion of empithey are provided medical ations and are given free treat any diseases or injuries sustaident to their employment by Territory Government.

m was initiated to select and

systematically train young Micronesians who have high potential for administrative posts. By the end of fiscal year 1968, six Micronesians had successfully completed the program and were assigned to management positions in Resources and Development, Budget and Finance, and Personnel Administration at Headquarters and in the district centers. Seventeen interns are expected to complete training during fiscal 1969.

Efforts to improve the quality and scope of on-the-job training continue, with special emphasis on personnel policies, industrial safety, heavy equipment maintenance and usage, and other skilled and semi-skilled areas.

The Administration also gives employees the opportunity to train in their specialized fields at the East-West Center in Hawaii, through South Pacific Commission courses, and elsewhere. During FY 1968, nearly 150 employees attended refresher courses or specialized training courses in medical and para-medical fields, clerical skills, education, agriculture, administration, accounting, radio broadcasting, health, sanitation, land management, home economics, criminology, and in skilled trades such as automobile mechanics.

The Summer Student Employment Program for about 50 high school juniors and seniors began at Headquarters and in the districts in June 1968. Students were productive employees in office clerical, public works and supply areas. A 40-hour general orientation was followed by on-the-job instruction by the supervisors.

In all districts, Micronesians are in administrative and professional jobs and are increasing their knowledge and

scal Year 1968 Part VII-Social Advancem

experience in their fields. Micronesians who assume high-level administrative and professional duties are covered under the higher salary schedule established for professional and managerial employees. High-level appointments of Micronesians have included a District Administrator, a Special Assistant to the High Commissioner, a Deputy Assistant Commissioner for Resources and Development, and seven assistant district administrators.

Chapter 6

SUFFRAGE

A Territory-wide suffrage act for all levels of government has yet to be enacted. Voting qualifications are prescribed separately by municipal charters, district legislature charters, and Secretarial Order No. 2882, as amended. In general, electors must be Trust Territory citizens, 18 or older, and residents for specified lengths of time of the municipality or other election district where they vote. Discrimination in voting based on race, sex, language, or religion does not exist.

Both men and women are eligible to be chosen for elective office in the Trust Territory.

About 44,000 persons were eligible to vote in the 1966 Congress of Micronesia elections if they registered and met other requirements prescribed by law. Participation in that election varied widely among districts. For example, the percentage of eligible electors voting ranged from a reported high of 98% in the Mariana Islands District to a low of 42% in Truk. To make the people aware of their right

to vote, the Government has dissentinated information on registration voting procedures, dates of election at etc., through radio broadcasts and meetings with local officials. Political parties in the districts, as well as some candidates, have also expended considerable effort in encouraging them supporters to register and vote.

The High Commissioner issue orders to outline the conduct of the first elections to the Congress Micronesia in 1965. The Congres passed an act in 1966 providing fo election of its members, which wa signed as Public Law No. 2-16 an later incorporated into the Code of the Trust Territory as Chapter 3A. Under this law all eligible persons desiring to vote must first register. A person ma register by executing an affidavit i which he identifies his voting residend and swears that he meets the qualif cations prescribed by law. Candidate for the House of Representatives and the Senate may be nominated either by petition or political party. A elections of members of Congress and by secret ballot, and Public Law No 2-16 provides for supervision of poll ing places, complaints of irregularities appeals from decisions of election officials, recounts of ballots, and absentee voting. Responsibility for conducting the Congress elections i vested in the district administrator designated election are commissioners for their districts, and in boards of election of the 21 election districts.

appointment of a second Associate Justice-the former Deputy Attorney General of the Territory. Stationed in Koror, Palau District, his primary judicial responsibility is for the Palau and Yap Districts. The transfer of an Associate Justice to American Samoa left a vacancy which has been filled by the former Attorney General of Guam. The latter Associate Justice is stationed in Ponape with primary judicial responsibility for the Ponape and Truk Districts. In January 1968, the Chief Justice retired after 22 years service to the Trust Territory Judiciary. The Attorney General of the Trust Territory was appointed by the Secretary of the Interior as the new Chief Justice and assumed duties on February 1, 1968. The retiring and the transferring judges continued as Temporary Judges beyond the end of the fiscal year to complete work previously begun. A Peace Corps Volunteer who is a retired Judge of the Superior Court for Los Angeles was appointed as a Temporary Judge for 2 years. He is stationed in Saipan but, as with all justices, his service entails regular travel to all district centers and a number of the sub-district centers.

# Types of Courts

The Territory has three types of courts: the High Court, district courts, and community courts.

High Court. The High Court consists of the Chief Justice, two Associate Justices, and a Temporary Justice, and a panel of three temporary judges. At present they are all U.S. lawyers appointed by the Secretary of the Interior and employed under U.S. Civil Service laws for full-time judicial work. Currently the members of the panel of temporary judges are the Presiding Judge of the District Court of Guam and two of the senior judges of the Island Court of Guam.

Part V-Political Advancement scal Year 1968

The High Court is the highest judicial authority in the Territory. It has Appellate and Trial Divisions. The Appellate Division, for a particular case, regularly consists of three (although two form a quorum) of the High Court judges assigned by the Chief Justice. The concurrence of two judges is necessary to decide any appeal. A judge who hears a case in the Trial Division is disqualified to sit on that case in the Appellate Division. The Trial Division sits regularly, presided over by a single judge on a circuit-riding basis in the different districts. In murder cases, however, he must be assisted by two of the special judges for the district where the trial is to be held. These special judges are appointed by the High Commissioner and at present are all also district court judges. In hearing a murder case at a non-jury trial, the special judges cast equal votes with the presiding judge in deciding, by majority vote, questions of fact and sentence. In a jury trial, however, the special judges vote only on the question of sentence, with the presiding judge deciding all questions of law involved in the trial and the outcome of the case.

The Appellate Division of the High Court has jurisdiction to review, on appeal, the decisions of the Trial Division of the High Court in the following instances:

- (1) All cases tried originally in the High Court.
- (2) All cases decided by the High Court on appeal from a district court,

involving construction or validary law of the United States, or law or regulation of the Territary written enactment intenhave the force of law of any aboard, or body in the Territory.

(3) All cases decided by the Court on review of the recordistrict or community court of in which the High Court has ror modified the decision so as the substantial rights of the ap

The Appellate Division of t. Court may also, in its discretion certain cases, review on apprecisions directly from a discommunity court.

The Trial Division has jurisdiction in all cases, ci criminal, including probate, ac and maritime matters and the dication of title to land or any therein. It also has jurisdic review on appeal decisions district courts and to review record final decisions of the courts and community couwhich no appeal is made.

Three sittings of the A Division were held during the one each on Koror, Maju Guam. As far as practical arguments, if not waived, are the district from which the came.

record final decisions of the districtions of a Presiding Judge and two courts and community courts for more Associate Judges appointed by the High Commissioner for specified terms. The High Commissioner Three sittings of the Appella fixes the salary of the Presiding Judge and it may not be diminished during his term of office.

Fach district court has original the district from which the appelium diction in all civil cases where the amount or value of the property involved does not exceed \$1,000, except Sittings of the Trial Division we admiralty and maritime matters and the adjudication of title to land or any interest therein (other than the right to immediate possession), and in all criminal cases where the maximum punishment which may be imposed does not exceed a \$2,000 fine or impusonment for 5 years, or both. Each district court also has jurisdiction to review on appeal decisions of community courts in its district.

District courts are regularly available for sittings as needed at each district center and at the following sub-centers where an Associate District Court Judge or Judges and an assistant clerk of courts are stationed: Rota, Mariana Islands; Lukunor, Mortlock Islands, Truk; Kusaie, Ponape; and Kwajalein Atoll, Marshall Ebeye, Islands. These courts also sit at other points in their respective districts when special need arises.

Community Courts. Each community court consists of a Presiding Judge and may include one or more Associate Judges, all appointed for specified terms by the district administrator of the district where the court is located.

Each community court has original jurisdiction in all civil cases where the amount claimed or value of the property involved does not exceed \$100, except admiralty and maritime matters and the adjudication of title to land or any interest therein (other than the right to immediate possession), and in all criminal cases where the maximum punishment which may be imposed does not exceed a \$100 fine or imprisonment for 6 months, or both.

## Tenure of Office

Only the Secretary of the Interior may remove the Chief Justice, the Associate Justices, and the panel of temporary judges qualified to sit in the Appellate Division of the High Court. Thus jurisdiction over these judges is removed from the legislative and executive branches of the Government to assure maximum independence of judicial authority. Only the Trial Division of the High Court can remove district and community court judges from office during their terms for cause after a hearing. Assessors are appointed and changed, if necessary. by the judge or judges holding a particular session. Appointment and removal of judicial officers other than judges and assessors is by the Chief Justice or at his direction. Their rate of compensation is fixed by the Chief Justice with the approval of the High Commissioner, as is that of assessors and all the lower court judges other than Presiding Judges of district courts.

#### Participation in Courts

Micronesians are employed as judges, officers, and employees of the courts to the maximum extent consistent with proper administration, as specified in Section 183 of the Trust Territory Code. At present, the judges

of all courts, except the High Cound the community court for Kwajalein Test Site, are Micronesias are all clerks of courts, assess and other employees of the confexcept for the administrative offithree court reporters, and a secre to the Chief Justice. Of the Micronesian judges, 23 are discourt judges, who also serve as specified by the High Court, and 106 community court judges. Micronesialso serve as the six district clerk courts, 12 assistant clerks of cound two probation officers.

#### Official Languages

Ordinarily, proceedings and recin cases in the High Court ar English, but pleadings in indige languages are frequently accel Proceedings in the Trial Division normally translated orally in court into the principal indige language of the area where the ceedings are being held. Further tlation is also provided for any acce who understands neither English such principal indigenous language.

In the district and comm courts, proceedings are ordinarithe principal indigenous language records are kept either in that lan or in English.

#### Procedure

The procedure followed in Territory courts in both civil criminal cases is, in general, a sin cation of that used in the U.S. dicourts sitting without jury.

The Congress of Micronesia Public Law No. 1-7, effective A 23, 1965, authorized the district lature of any district to adopsystem of trial by a jury of six page 1965.

> ecused, the High Court issued an pinion directing that similar safemards be made available to persons nder investigation for commission of rimes. These include:

> • Prior to any questioning, the person must be warned that he has a right to remain silent, that any statement he makes may be used as evidence against him, and that he has a right to the presence of counsel, either retained or appointed, during interrogation.

- That the services of the Public Defender, when in the vicinity, and of his local representative are available to represent a person under investigation and that such services are provided without cost to the person.
- That the police are required to obtain counsel for a person, when he so requests, and they may not interrogate until counsel is present.

After a criminal charge has been brought, the defendant is entitled to:

- Have, in advance of trial, a copy of the charge upon which he is to be tried
- Consult counsel before trial and have an attorney-at-law or other representative of his own choosing defend him at trial
- Apply to the court for further time to prepare his defense, which the court shall grant if satisfied that the defendant will otherwise be substantially prejudiced in his defense
- Bring with him to trial such material witnesses as he may desire or have them summoned by the court at his request
- Give evidence on his own behalf at his own request at trial, although he may not be compelled to do so
- Have proceedings interpreted for his benefit when he is unable to understand them otherwise, and
- Request appointment of an assessor in trials before the Trial Division of the High Court if one has not been appointed by the Trial Judge under provisions of Section 126 of the Code.

Part V-Political Advancement Fiscal Year 1968

Legislation prescribing the rights of the accused has been drafted for consideration by the Congress of Micronesia during its Fourth Regular Session.

There is an absolute right of appeal to the Trial Division of the High Court from decisions of any district court on questions of fact and of law. On questions of law, decisions of the Trial Division of the High Court may be appealed to the Appellate Division in cases falling within the jurisdiction of the Appellate Division as enumerated above. The Appellate Division may also, in its discretion, review on appeal directly from district or community court decisions involving the construction or validity of any law of the United States or of any written enactment of any official, board, or body in the Territory intended to have the force of law. Written notice of appeal must be filed within 30 days after announcement of the decision or within such longer time, not exceeding 120 days, as may be specified by the court in case of decisions of the Trial Division of the High Court which are made when a party is neither present nor represented.

The Trial Division of the High Court reviews on the record all final decisions of district courts and community courts in annulment, divorce, and adoption cases in which no appeal has been made, and it may, in its discretion, review on the record any other final decision of a district or community court in which no appeal has been taken. The court acting on an appeal or review has the power to affirm, modify, set aside, or reverse the judgment or order appealed from or reviewed and to remand the case with such directions for a new trial or entry of judgment as may be just. However, if the Government has

appealed in a criminal case, the con may not reverse any finding of guilty and its powers are limited to reversal of any determination of inv idity of the enactment involved.

Disputed facts are ascertain primarily from oral testimony witnesses and from exhibits. Wh deemed helpful to the conduct of t case, the court may also go to t scene of an incident having a beari on the case, giving both sides opportunity to reconstruct and attention to evidence. With the perm sion of the court written deposition may be used by the accused criminal cases or by either side in c cases. As a rule, pretrial conferent are held in civil cases by other distr courts and the Trial Division of High Court to determine the issues reach agreement on as many facts possible.

#### Fees

Clerks of courts charge and coll fees for filing in civil actions, copies of certified true records, transcripts of evidence and notes hearing, and for recording land the fers. Filing fees in civil actions ran fruit from 25¢ for filing of complain under the small claims procedure \$5 for filing of notice of appeal the Appellate Division of the Hobe Court. The fee for a copy of record certified to be a true copy 25¢ plus 10¢ for each 100 words the first 100. The fee for transcript Log. evidence or notes of hearing is 25 100 words for three copies. The for the recording of land transfer 50¢, except when the Trust Territor is the grantor, in which case there is charge.

# Legal Aid

A Public Defender and Counselor, with headquarters in the Mariana Islands District, is on the staff of the Trust Territory Government to serve as counsel for accused persons who desire his assistance. Primary responsibilities of representation are for those charged with crimes involving a possible sentence of imprisonment for more than 5 years. The Public Defender and Counselor has a local representative in each district who acts as counsel for the accused who desire assistance in cases less serious than those aided by the Public Defender himself. In four districts this local representative also has an assistant. The Public Defender and his district representative are available, so far as their primary duties will permit, to provide legal aid and assistance to all persons unable to secure adequate counsel without undue hardship.

#### **Penalties**

Penalties for principal crimes remain the same as set forth in Chapter 6 of the Trust Territory Code. These are based primarily on American precedents. Under Section 7 of the Code, all sections of the population are assured equal protection of the law. Only maximum penalties are prescribed by the Code, except for murder; district laws and municipal ordinances which authorize criminal penalties for their violation generally provide maximum penalties. Thus, the courts are permitted wide discretion in fitting the punishment to the circumstances of the particular case.

The Territory's Bill of Rights provides that no crime shall be punished by death, no excessive fines imposed, nor cruel or unusual punishments inflicted. Punishments most often prescribed are imprisonment for a stated time (all or part of which may be suspended on such conditions as the court deems proper), fines, or unpaid labor on public projects. Corporal punishment is not permitted.

The High Court may, in lieu of or in addition to other lawful punishment, direct that a person found guilty

Frical Year 1968

of a criminal offense establish his place of residence within a specified area and maintain it there for a period not exceeding the maximum period of imprisonment which may be imposed for the offense. None of the other courts may do this nor may any court impose deportation as a penalty for a crime. However, when any part of a sentence of imprisonment is suspended, the court granting the suspension may, and regularly does, impose conditions of suspension. These may include a residence requirement or departing from and remaining thereafter outside the Trust Territory during the suspension period. Deportation of non-citizens of the Territory rests in the discretion of the High Commissioner, and the committing of serious or repeated crime is naturally to be considered by him in the exercise of that discretion.

Chapter 9

**LEGAL SYSTEM** 

The basic body of laws applicable and having force and effect in the Trust Territory is found in Section 20 of the Trust Territory Code, as amended by Public Law No. 2-15 of 1966. These laws are: (a) the Trusteeship Agreement, (b) such laws of the United States as are by their own terms applicable to the Territory. including Executive Orders of the United States President and Orders of the Secretary of the Interior, (c) laws of the Trust Territory, (d) past District Orders promulgated by district administrators, and Emergency District Orders promulgated by district administrators, (e) acts of legislative bodies convened under charter granted by the Territorial Government when these

acts are approved by the administrators or otherwise con as law as may be provided by a or the laws and regulations a Trust Territory, (f) duly en Municipal Ordinances, (g) local c when not in conflict with approximations, and (h) common law.

Section 436 of the Trust Ter Code further requires that, in important sentences under Chapter 6 of the concerning crimes and criminal cedures, due recognition shall be to the customs of inhabitan accordance with the Truste Agreement. The penalty for an which is made a crime solely generally respected native custom not exceed a fine of \$100, months imprisonment, or (Section 434, Trust Territory C

Fiscal Year 1968

## SECTION 1: FINANCE OF THE TERRITORY

Chapter 1

PUBLIC FINANCE

The costs of Trust Territory operations are met by funds granted by the Congress of the United States and from local reimbursable revenue collections.

Trust Territory appropriation requests are subject to appropriation ceiling legislation the U.S. Congress has enacted.

In 1962, a major shift in the direction and scope of the Administering Authority's commitment in Micronesia led to increased appropriations from the U.S. Congress to facilitate a more rapid pace of development. Accordingly, the previous ceiling of \$7.5 million was raised to \$17.5 million. An accelerated program for emergency construction and staffing of school facilities was set in motion along with efforts to improve health standards and provide a general upgrading and integrated development of essential public services embracing transporta-

tion, communications, water and power resources.

Despite the impetus this program has created during the past 6 years, effective and realistic development required further increases in the ceiling to meet the needs of the people of Micronesia. In 1967, new ceiling legislation authorizing \$25 million for 1967, and \$35 million for 1968 and 1969, was signed into law.

Preparation of the annual Trust Territory Government budget begins well over a year in advance when district administrators and various department heads submit estimates to the Director of Budget and Finance. After screening and necessary modification, including review by the appropriate Commissioners, these estimates are presented to the High Commissioner. The Budget Officer and his staff, using the final recommendations approved by the High Commissioner, then draw up a preliminary budget plan for the coming fiscal year. In July this preliminary budget plan is presented to the Congress of Micronesia for its review and recommendations with respect to such portions as relate to funds to be appropriated by

Fiscal Year 1968

the Congress of the United States. The High Commissioner adopts such recommendations of the Congress as he may deem appropriate, but he also must transmit to the Secretary of the Interior all recommendations he does not adopt.

The Administering Authority controls and administers financial operations and construction as funded by the U.S. Congress. The Secretary of the Interior's Advisory Committee exercises review of Trust Territory proposed programs. Bureau of the Budget hearings are held and the budget for Trust Territory operations and capital improvement projects is included in the President's Budget submitted to the U.S. Congress each year.

Budgeting, funding, and expenditure take place at all three levels of government—territorial, district, and municipal. The legal authorization for local government financial operations is contained in the Trust Territory Code, Sections 46 to 48 and Chapter 18, Finance; Taxation.

District governments control and administer financial operations at the district level, with types of income and responsibility for operations defined separately from Trust Territory Government and municipal level income and responsibilities. Each district administrator is required by law to present annually to the district legislature a proposed budget based on revenues anticipated as a result of district and territorial tax laws. After considering the district administrator's proposals as well as proposals of individual members, the district legislature enacts a budget for the district in the form of one or more appropriations bills. Appropriations acts are submitted to the district administrator for

action. Upon approval, the approp tions acts become law, and expe itures are made in accordance w their provisions.

The district treasurer is responsi for receiving, maintaining, and dishing district government funds distinguished from Trust Territa Government funds. He is appointed the district legislature and serves unthe direction and supervision of district administrator. The distitreasurer is required by law to subtain annual report of all funds receives and disburses during eafiscal year.

Control of fiscal operations at 1 municipal level rests with the muni pal administration, the district adm istrator having certain powers supervision and approval. officials prepare the annual municipal budget and refer it to the municipal council for approval before it is trai mitted to the district administrator f ratification. Officials of the distri administration assist and advise in the original preparation of the buds where such assistance is required requested. The approved budg determines the extent of expenditur which may be made locally during the fiscal year from municipal revenue Tax and license fee schedules which provide tax income for the munic pality are similarly prepared ar approved. The treasurer, or in son instances the magistrate, is authorize to collect taxes and license fees an expend them according to approve schedules and budgets.

Revenues and expenditures of municipalities and district governments which prepared budgets for fiscal year 1967 appear in tables in Appendix IV. A comparative statement of revenues and expenditure also is given in Appendix IV.

Locate as follows: officials prepare the annual municipudget and refer it to the municip where such assistance is required determines the extent of expenditure scrap metal, and (c) general import which may be made locally during the taxes. For rates of these taxes, see Part fiscal year from municipal revenue VI, Section 4, Chapter 2. Tax and license fee schedules which provide tax income for the municipal pality are similarly prepared and to collect taxes and license fees and expend them according to approved schedules and budgets.

Revenues and expenditures d municipalities and district governs ments which prepared budgets for fiscal year 1967 appear in tables in Appendix IV. A comparative state ment of revenues and expenditures also is given in Appendix IV.

Part VI—Economic Advancement

During the year under review the erritory did not enter into any customs fiscal or drumstrative

> Chapter 2 TAXATION

Taxation authority vested in the receives and disburses during easterntonal, district, and local governments is delineated in Chapter 3, Sections 46 to 48 of the Trust Terrimunicipal level rests with the municipal seven administration of the Code municipal level rests with the municipal seven exercised by the three levels of govern-

Territorial. Exclusive control of council for approval before it is transimport, export, and income taxes mitted to the district administrator to including any so-called excise taxes ratification. Officials of the district which are actually collected on the administration assist and advise in the basis of imports. Present taxes are (a) original preparation of the budge an excise tax on the use, distribution, an excise tax on the use, distribution, or sale of motor vehicle fuel, (b) an requested. The approved budge export tax on copra, trochus shell, and

District. Liquor control, including the right to collect wholesale liquor license tees and to impose taxes on approved. The treasurer, or in some license tees and to impose taxes on instances the magistrate, is authorized alcoholic beverages, provided that neither of these shall be based on imports or volume or value of imports.

> Exclusive issuance of licenses for wholesale businesses other than banks, credit union and cooperatives, insurance, sale of securities and public utilities, including the exclusive right to collect fees for such licenses, provided these are not based on imports or the volume or value of imports.

The imposition and collection of sales taxes, and the authorizing of municipalities to impose and collect excise taxes on any item other than foodstuffs.

Municipal and Local. Licensing and collecting license fees of retail busiwithin the municipality, subject, however, to all applicable territorial or district laws.

The imposition and collection of head taxes, property taxes on any items other than foodstuffs, and such excise taxes as the district legislature may authorize; provided, however, that none of these shall be based on imports, or the value or volume of imports.

For purposes of taxation, no distinction is made between domestic companies and foreign companies or organizations doing business in the Territory; all are equally subject to applicable taxing statutes and ordinances imposed by and in effect within each level of government. The Territory does not now have income taxes, dividend taxes, corporation profit taxes, or hut taxes, nor is there any Territory-wide capitation or poll tax. The head tax is the most nearly universal tax in Micronesia varying in amount from \$1 to \$10, averaging \$2 to \$3, and generally levied on males 18 years of age or older. In two districts, some municipal governments levy real property taxes. One other district levies cattle taxes.

Except for taxes the Territorial Government imposes, district and municipal taxes are imposed by district laws and municipal ordinances passed by the respective legislative bodies.

Fiscal Year 1968

Penalties for failure to furnish records or information to any of the taxing units of government for the purpose of computation, assessment, or collection of any tax or license fee are specified in Chapter 18 of the Trust Territory Code. A failure to pay taxes subjects the taxpayer to a civil suit brought by the taxing unit concerned pursuant to Section 1147(c) of the Trust Territory Code. While the Trust Territory Code does not specifically contain provisions concerning foreclosures of land to enforce or collect taxes, the taxing unit may avail itself of land foreclosure in an execution on a judgment. In cases of nonpayment of property tax under Section 1147(a) of the Trust Territory Code, the following provision also applies:

"Any taxes imposed or authorized ... upon property shall be a lien upon the property, and may be collected by levy upon it in the same manner as the levy of an execution."

Pursuant to the above section, land or interest therein may be foreclosed provided the land involved or interest therein is "owned solely by the judgment debtor, in his own right." The court, however, must first mine for itself before ordering to r transfer of such land that (a) so requires it, and (b) the juc debtor will have "sufficient remaining to support himsel those persons directly depende him according to recognized custom and the law of the Territory." (Section 288(c). Section 287 T.T. Code.)

Since the Territory does not an income tax, arrangements or concerning international double tion have not been necessary.

Under Sections 1116 to 11i the Trust Territory Code, any gro-association of persons may for corporation by submitting the posed articles of incorporation to High Commissioner, and if proposed articles meet the requents specified under these (sections, the High Commissioner grant a charter. Corporations companies which have been in porated in the Territory under tinent sections of the Code are line in Appendix VII.

Credit unions incorporated in Territory are listed in Appendix X

## SECTION 2: MONEY AND BANKIN

Since U.S. currency serves as legal tender, no laws or regulations governing currency and exchange have been needed other than U.S. laws governing banking. Residents have access to banking institutions in Guam, Hawaii, and the U.S. mainland as well as to branch banks within the Territory. Kwajalein in the Marshalls, Koror in Palau, and Kolonia in Ponape have

Bank of Hawaii branches. Tr District and Saipan in the Maria Islands District are served by Bank America branch banks. The bran banks make some loans to individu: and private business firms.

In 1956, a revolving fund was established from funds made availably the U.S. Congress for loans to

Part VI-Economic Advancemen

Bank of America and Bank of Hawaii operate branches in the Territory. Van Camp Sea Food Company employs 145 nonindigenous fishermen, who train Micronesians in live-bait tuna fishing. Two long-time Belgian businessmen reside in Ponape District.

#### Major Economic Developments

Development of natural resources for the economic and social betterment of the Micronesian citizenry is receiving increasing emphasis. Findings and recommendations of such source material as the Robert R. Nathan Associates' Economic Development Plan for Micronesia, completed in December 1966, are being used to devise new, practical plans for orderly, balanced economic and social development.

Under a 5-year contract, commercial jet service was inaugurated in Micronesia on May 16, 1968, by Air Micronesia, a corporation formed by Continental Airlines; United Micronesia Development Association, a

Trust Territory corporation; and Aloha Airlines, an inter-island air carrier in Hawaii. Air Micronesia provides jet service from the Trust Territory to Honolulu, Guam, and Okinawa. The airline replaces the previous service under which Pan American operated the Trust Territory fleet of two DC-4 aircraft and two SA-16 amphibious planes. A Boeing 727 jet and/or a DC-6B now fly to all districts except Ponape, where the SA-16 aircraft must be used until a new landing strip is completed. Continental Airlines has committed itself to a broad training program, leading to maximum employment of Micronesians in all phases of its operations.

With increasing movement of people and cargo to and through Micronesia, Continental has contracted to contribute substantially to development of tourism through sizable investment in tourist hotels, advertising, and promotion. Its contract stipulates an approximate expenditure of 6% of passenger revenues during the term of its contract for promotional activities, including an information campaign for the travel trade, media advertising, development of package tours, and colorful and interesting literature.

Increased numbers of travelers are conducive to hotel development. In December 1967 the Royal Taga, the first first-class hotel in the Territory, opened in Saipan. The three-story, \$800,000 structure will be expanded from 54 to 100 rooms. Within the next 3 years, Continental also plans to build an attractive and interesting Pacific-style hotel in each district. Construction probably will begin in Truk and Palau Districts during calendar year 1969.

Including the Royal Taga, about 189 rooms are available to travelers in

the 15 hotels throughout the Territory.

#### **Gross Territorial Product**

The estimated (imprecise) to dollar value of all goods and service available for consumption and inve ment in the Territory plus net ad tions to capital facilities for the ye 1965-1967 amounts to about \$38,300,000 a year or about \$430 per capita. About 47% of this to product, or real income, consists government-provided goods and se ices, about 35% results from le production of both subsistence locally marketed products; the rem ing 18% comes from goods impointo the private markets of economy. Chapter 2

POLICY AND PLANNING

## dministrative Organization

available to be distributed among toner's staff consists of several to support the people of Microne pecualists and technical advisers who ordinate programs in economic evelopment, administer Surchasing agreements and developbent loan funds; direct the marine esources development program; evelop, implement, and administer he entire land management program; sist in the development of local ooperatives, credit unions, trading ompanies, small business and other ommercial activities; administer the griculture and forestry development program; and advise on transportation matters. Other members of the High Commissioner's staff, such as the Attorney General, give advice and Does not include U.S. employ ssistance where necessary. Technical ssistance also is obtained from univerties, Government agencies, the South Pacific Commission, and the United Nations.

During the year, an Economic Dewith Chamber of Commerce organic relopment Division was established tions. The Saipan Chamber of Commerce organic relopment Division was established tions. The Saipan Chamber of Commerce and Development Division was established tions. ment Department and an experienced

economic development specialist was added to the staff.

In the districts, the Resources and Development program is carried out under the general supervision of the district administrator with technical direction by agriculturists and land management and economic advisers.

The Administering Authority of the Territory bases its economic development program on:

- Increasing food production through improvement of crop farming and encouraging use of local materials for house construction, furniture, and handicraft.
- transportation Developing communications systems to overcome community isolation, increase educational opportunity, promote higher standards of family and community life and provide an adequate and uninterrupted air-and-sea logistic support of the island communities.
- Encouraging development of tourism and the personnel and facilities needed for tourism.
- Maintaining a wage structure and conditions of employment consonant with the advancing social and economic conditions of the Trust Territory; this structure to be based on periodic economic surveys and cost-of-living studies.
- · Reserving to the inhabitants their land and resources by applying appropriate controls and constraints so that land use plans and patterns are designed to achieve optimum use of land resources.

Part VI-Economic Advancement Fiscal Year 1968

- Providing the basic physical and resource developments necessary for economic growth by expanding a Trust Territory-wide construction program which includes rehabilitating and building roads, airports, and harbor facilities; and improving and expanding water, electrical, sanitary, and other basic utilities.
- Encouraging Micronesians to establish their own business enterprises by providing them with necessary technical assistance and long-term loans. These enterprises include establishment of cooperatives, small home industries, expanded production of handicraft, search for markets, and instruction in modern methods of production.
- Providing for capital participation in economic enterprises which are otherwise beyond the financial capacity of local investors, by providing an economic climate which will allow business, commerce and industry a profit while providing productive employment opportunities for Micronesia's growing population. Enterprises which may require such participation include commercial transportation travel facilities, fisheries, large-scale tropical agricultural production, food processing, and other fabricating and manufacturing industries.

#### **Credit Facilities**

The Economic Development Loan Fund is one important device for stimulating the local economy. The Loan Fund is administered by a sevenmember Board of Directors, chaired by the Director of Economic Development.

A general rule established by the Board of Directors requires that loan

applicants attempt to secure cred directly from commercial banks in the area, and that only when such assist ance is not available may they submapplications to the Board for its consideration. Loans are made directly, in the form of a loan guarantee to commercial bank by the Territon Government, with the Board setting aside cash in reserve equivalent to 25 of the total loan guaranteed.

Loans may be made or guarante to:

- (a) A citizen or resident of t Trust Territory, or a group or assoc tion of Trust Territory citizens residents, whom the Board of Dirtors regards as a suitable borrower.
- (b) Corporations and cooperat societies authorized to conduct but ness in the Territory; citizens or redents of the Territory engaged agriculture, manufacturing, or comercial fishing; improvement of to ism; and improvement of real prope for industrial purposes which Board specifically determines to beneficial, desirable and necessary the economic development of Trust Territory and which meets or more of the following criteria:
- -Creates new employemnt;
- -Replaces imports, increases expor
- Reduces consumer prices;
- -Provides vitally needed facilities services.

During the year under revidirect loans totaling \$115,300 w made and \$164,200 worth of a tional loans were guaranteed v commercial banks. At year's \$23,000 in loans were pending and

- To stimulate agricultural production (for example, to establish poultry tarms, piggeries, vegetable farms, cattle ranches)
- To establish new enterprises (such as laundromat, boat yard, bakeries, tishing operations)
- To provide additional capital for expanding private businesses and cooperatives
- Lo finance construction new Commercial buildings, motels, hotels, and rental property)

To engage in transportation services (e.g., local transportation, warehouses, sea transportation, stevedoring).

Credit Unions and Cooperatives. Trust Territory credit unions and cooperatives continue to make notable progress. By the end of fiscal year 1968, 48 credit unions were operating in the Territory, an increase of seven over the previous period. Total assets of these self-help thrift and lending institutions aggregated \$879,778, an increase of 62% during calendar year 1967. By the end of the reporting period, total assets were estimated to be above \$1,000,000. At the end of calendar year 1967, 7,295 Micronesians were participating in credit unions and had saved \$764,485 for an average of \$105 per member. During calendar year 1967, credit unions made 4,059 loans to members amounting to \$1,208,846 or an average of \$298 per loan. In most cases, the credit union is the only source for such loans. Loans were made for such beneficial purposes as home building and improvement, buying furniture and household appliances, sending children away to school, and a number of other practical purposes.

By the end of fiscal year 1968, 14 Trust Territory credit unions had subscribed for the Loan Protection and Life Savings insurance provided by CUNA Mutual Insurance Society of Madison, Wisconsin. Under the loan protection coverage, the insurance company will repay the balance of a member's credit union loan if he dies or becomes totally and permanently disabled. Thus, the credit union will not lose, nor will it have to call upon the family of the deceased member to pay the obligation. The insurance company does not seek recovery of the amount it restitutes to the credit union.

**ŀ**i cal Year 1968

Life savings insurance provides similar benefits with respect to a member's savings. When a member dies, the insurance company will match the amount of his savings at the time of death. This is considered an incentive for members to save and to refrain from withdrawing their savings except for urgent needs.

Seventeen credit unions have subscribed to surety bond coverage, which protects them from embezzlement. Coverage is limited to \$1,000,000.

Cooperatives in the Territory also have increased their volume of business. By the end of fiscal year 1968, active cooperatives numbered 33, an increase of nine from the previous year. These cooperatives were buying copra and retailing trade goods, often in remote areas where there was no other trading company; catching and marketing fish; producing and marketing handicraft; constructing low-cost homes for members; and building and repairing boats.

Total sales and other revenues of Trust Territory cooperatives will exceed \$5,000,000 for fiscal year 1968. At the end of 1967, 7,499 Micronesians were members. Good operating results enabled cooperatives to show net savings of \$453,201 and to pay an estimated \$259,363 in patronage refunds.

Chapter 3

**INVESTMENTS** 

The Administering Authority recognizes that outside capital and expertise, particularly for large-scale,

sophisticated enterprises, are neede to carry out economic ventures in ti most efficient and profitable manne

The Director of Economic Develorment analyzes proposed outside inversent, obtains views of concern persons, and formulates a recomendation for the High Commission to license or charter any enterprinvolving non-Micronesians.

In reviewing a business vent application, the following crite among others, are considered:

- (a) the economic need for service or activity to be performed
- (b) the promoters' willingness joint Micronesian ownership of venture
- (c) the degree to which sucl operation effects a net increas exports or a net decrease in impor
- (d) the extent of participation Micronesian citizens at the outser in the future at the management and at lower levels, and the proving for Micronesian personnel training
- (e) the lack of capabi financial, technical, manageria otherwise—of Micronesians to or such a business now or within reasonable future.

Investment which meets the considerations, resulting in an i of capital and needed know-how increasing the productivity of inesian workers, is welcomed and tated.

capital and for large-scale, sophisticated enterprises, are need to carry out economic ventures in the

involving non-Micronesians.

In reviewing a business ventur application, the following criteria among others, are considered:

- (a) the economic need for the service or activity to be performed
- (b) the promoters' willingness for joint Micronesian ownership of the venture
- (c) the degree to which such a operation effects a net increase exports or a net decrease in imports
- (d) the extent of participation by Micronesian citizens at the outset and in the future at the management level and at lower levels, and the provision for Micronesian personnel training
- (e) the lack of capabilityfinancial, technical, managerial of otherwise-of Micronesians to operate such a business now or within the reasonable future.

Investment which meets the above considerations, resulting in an inflow of capital and needed know-how and increasing the productivity of Micro nesian workers, is welcomed and facilitated.

Part VI-Economic Advancement

The law prohibits ownership of most efficient and profitable manne land by persons who are not citizens of the Territory. The High Commissioner must approve land leases to The Director of Economic Develor non-Micronesians. Approval for appliment analyzes proposed outside investigations to lease land for commercial ment, obtains views of concerned purposes is considered formally after persons, and formulates a reconcerned the applicant has received formal mendation for the High Commissions. mendation for the High Commissioner approval from the High Commissioner to license or charter any enterpris for his business venture, including all associated relevant activities. Such approval or permission is manifested by license or Territorial corporate charter.

> Micronesians are limited in the skills necessary for their ready participation in economic development opportunities at present. Shortages exist in managerial, professional, and middle level skills, such as building and service trades. The demands of expanding activities will increase the shortages. Therefore, when circumstances require and when the economic venture is desirable, the Territorial Government will allow entrepreneurs to import skills to meet schedule and vocational requirements. The intent of the Government is to ensure that Territory citizens are involved to the maximum extent feasible in the job structure of the proposed economic activity. It is also the Government's intent that, when alien labor is imported, maximum effort be made to train Micronesians to replace them as soon as practicable.

The largest investments in the Territory are by Mobil Oil Micronesia, Inc., and Air Micronesia. Other large investors are Micronesian Line, Van Camp Sea Food Company, Micronesian Development Corporation, and Micronesian Hotel Corporation.

Fiscal Year 1968

Mobil Oil Micronesia, Inc. operates a petroleum supply, storage, and distribution system throughout the Territory. District managers are Micronesians.

Micronesian involvement in the ownership and operation of Air Micronesia is an important feature of this new service. The airline is owned 31% by Continental Airlines, 20% by Aloha Airline of Hawaii; and 49% by the United Micronesia Development Association, most of whose stock is owned by Micronesians.

Micronesian Line, a locally chartered firm, operates the Territory's three major logistic vessels and the M/V Majuro. Both government and private vessels serve islands from each district center.

The Van Camp Sea Food Corporation operates a live-bait tuna fishery and on-shore freezing, cold-storage, and auxiliary facilities to support this industry.

The Micronesian Hotel Corporation has leased a portion of beach area in Saipan, Mariana Islands District, for a luxury hotel, the Royal Taga. The lease agreement is for 20 years and may be extended.

Micronesian The Development Company, Inc. is developing a modern livestock industry on the island of Tinian, Mariana Islands District.

Other non-Micronesian investments include insurance companies, a charter boat enterprise, banks, a bottling company, and small service industries.

#### ECONOMIC EQUALITY

PRIVATE INDEBTEDNESS

Under Article 8 of the Trusteeship Agreement, the Administering Authority, subject to requirements of security and obligations to promote the advancement of inhabitants, accords to nationals, companies, and associations of each nation treatment in the Territory no less favorable than that accorded to nationals, companies, and associations of any other national except the Administering Authority.

Usury, as commonly known, is generally a problem. There instances, however, of interest rates private loans between individuals high as 10% a month. Credit unio by making it easy for members borrow money for useful purposes reasonable interest rate, have reduthis problem considerably.

# SECTION 4: ECONOMIC RESOURCES, ACTIVITIES, AND SERVICE

Chapter 1

GENERAL

The Administration has by law restricted ownership of land to citizens of the Territory. The restriction, however, does not divest or impair the right, title, or interest of noncitizens or their heirs or devisees, in lands in the Territory held by such persons prior to December 8, 1941. Under some circumstances lands may be leased by noncitizens of the Territory for investment purposes if the projected use of the land promises direct economic benefits to the people of the Territory.

Legislative provisions have made for plant and animal quarant to prevent import and spread of ha ful pests throughout the Territ Controls on clearing land by burn have been established. Harvesting trochus may be restricted to a see May through December, at the dis tion of the district administrator. trochus shell less than three inche diameter at the base is to be ta Replanting of trochus beds is aut ized. - private loans between individuals (10) Customary rights are recoghigh as 10% a month. Credit union nized to owners of abutting land to by making it easy for members claim ownership of all materials de-borrow money for useful purposes apposited on the shore or beach, except reasonable interest rate, have reductor stranded or wrecked vessels, as well this problem appoints. 5 tishing rights in waters not more than I feet deep over reefs.
  - (c) The owner of abutting land may till in, erect, and otherwise control the use of material in areas below the high water mark.

The above exceptions are in force provided they do not conflict with the Inherent rights of the Government as the owner of all marine areas below the high water mark.

Export

During the year, the principal commodities marketed by Territory producers were copra, scrap metal, and handieraft.

Copra, marketed by a Trust Territory incorporated company which is 60 owned by Micronesians and under contract to the Copra Stabilization Board, is the only commodity on which buying prices are controlled.

Established in 1952, the Copra Stabilization Board is authorized by the High Commissioner to:

(a) Buy, collect, market, and export all copra produced or processed within the Territory

Trical Year 1968

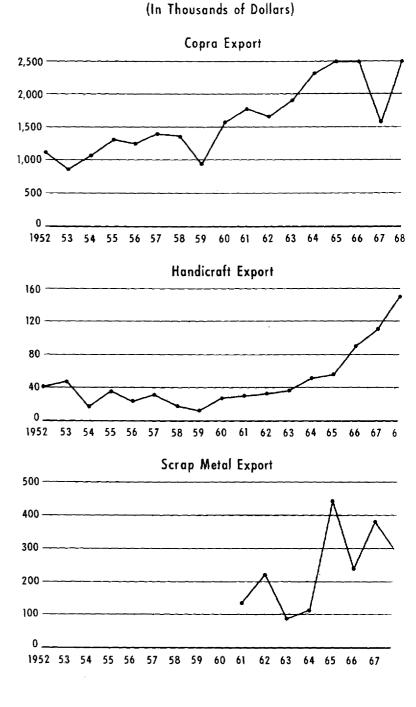

- (b) Fix all prices to be paid to producers or sellers within the Territory
- (c) Appoint and employ such agent or agents as may be necessary to perform any and all authorized functions
- (d) Collect and receive all monies derived from such copra sales
- (e) Administer and invest the funds derived from such copra sales
- (f) Disburse monies from these funds as required to stabilize copra prices
- (g) Perform all transactions necessary or proper in connection with or incidental to the purchase, marketing, or sale of copra.

The membership of the Copra Stabilization Board includes one representative from each district.

The United Micronesia Development Association in 1966 received the Territory's contract to collect the copra throughout the Territory, to negotiate export sales, and to ship the copra and collect the proceeds from sales, on a fixed percentage fee plus an overhead charge allowed for every ton of copra sold. The contractor collects the broker's commission of 2% of the gross sales price for each copra shipment made at final point of sale. All other costs to the contractor in carrying out the contract provisions, except for certain listed, reimbursable expenses, are the responsibility of the contractor who is paid \$2.40 per short ton of copra on an out-turn weight basis.

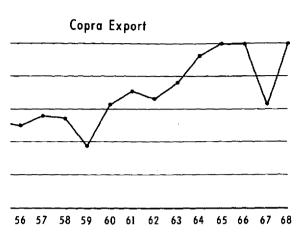

The Copra Stabilization Board administers the Copra Stabilization

Fund which stabilizes copra prices to producers, thus alleviating the uncertainty and insecurity of world market fluctuations.

Copra remains the Territory's largest export item with 12,880 short tons valued at \$2,504,740 exported this year. This represents a 442-ton increase from 1967 and a dollar increase of about \$820,000 due to the rising price of copra on the world market. The price per short ton of copra was maintained at \$102.50 during the year, enabling the Copra Stabilization Fund to rise from a low of \$383,000 to its present \$508,566.

Regardless of the extent to which the world price of copra may fluctuate, copra is and, as far as can be determined, will continue to be a major source of income to a large portion of Trust Territory citizens for some time to come. In line with this reasoning, a program to upgrade the copra production base through coconut grove rehabilitation continues in an effort to safeguard this very important source of income and subsistence to out-island inhabitants.

Among other items of export, scrap metal valued at \$288,465 was exported in 1968, a decrease of \$93,083 from last year. The Mariana Islands District, the largest exporter of scrap metal last year, decreased from \$232,573 in 1967 to \$35,000 in 1968. This is mainly due to the diminishing supply of scrap metal around Saipan and partially to the effects of Typhoon Jean which halted export for the last quarter. Saipan's decrease was largely made up by Palau, which increased its export of scrap metal by \$161,804 to \$241,960 in 1968.

Export of handicraft increased from \$104,836 in 1967 to \$148,800

in 1968. The handicraft industr tinues to expand as demand for ity Micronesian crafts products Increasing numbers of touris Micronesia insure that the dema handicrafts will remain high for time. The greatest problem is m that demand.

The principal private commercial \$18,125. This may have been caused organizations in the Territory are

> The only commercial organizations in the Territory which have a monopolistic position in regard to a resource are the Copra Stabilization Board and Mobil Oil Micronesia.

#### **Protection and Conservation** of Resources

The following safeguards protect Territory citizens from outside exploitation:

- (a) The High Commissioner permits outside participation in the development of resources subject to controls necessary to protect Micronesian interests.
- (b) Only Territory citizens may hold title to land.

The Administering Authority encourages maximum possible ownership and participation by indigenous inhabitants in economic development of the Territory.

Education and training for conservation of natural resources is a continuing function of the Administering Authority carried out mainly through

Fiscal Year 1968

its agricultural extension service. Legislative provisions for the conservation of natural resources have been discussed above.

Chapter 2

COMMERCE AND TRADE

The present pattern of merchandising (including food stores, general merchandise, bars and restaurants) in each Trust Territory district is characterized by one to three relatively large enterprises operating as "General Import - Wholesaler - Retailer" (IWR) and a host of small enterprises, in effect economic satellites of the IWR's. Many of the small, often tiny, retailers operate on a shoe string, buying in broken lots of perhaps two or three items at a time from the large IWR. Hence the latter in their forward planning, in their importing of merchandise, in maintaining adequate inventories, do so not only for themselves, but for a large number of smaller establishments.

No methods of price control exist in the Territory except in the case of copra, nor of allocating supplies of foodstuffs, piece goods and other essential commodities.

The Territorial Government levies export and import taxes.

There is a 10% copra and trochus shell export tax as well as the following taxes on the export of scrap metal: Non-ferrous, 25% ad valorem; ferrous, 5% ad valorem; lead and covered cable, 10% ad valorem.

#### Import Taxes

Import taxes are levied on all the following products imported into the Territory for resale:

- (1) Cigarettes-7¢ every 20 cigarettes.
- (2) Tobacco, other than cigarettes −50% ad valorem.
- (3) Perfumery, cosmetics and toiletries, including cologne and other toilet waters, articles of perfumery, whether in sachets or otherwise, and all preparations used as applications to the hair or skin, lipsticks, pomades, powders and other toilet preparations not having medicinal properties—25% ad valorem.
- (4) Soft drinks and non-alcoholic beverages-2¢ each 12 fluid ounces or fractional part thereof.
- (5) Beer and malt beverages—3¢ per can or bottle of 12 fluid ounces or fractional part thereof.
- (6) Distilled alcoholic beverages—\$6.00 per wine gallon.
  - (7) Wine-\$1.50 per wine gallon.
- (8) Foodstuffs for human consumption-1% ad valorem.
- (9) All other imported products, except those specified above and gasoline and diesel fuel—3% ad valorem.

An excise tax is levied on the use, distribution, or sale within the Territory of all gasoline and diesel fuel at the rate of 5¢ per gallon so used, distributed or sold.

Chapter 3

LAND AND AGRICULTURE

#### Land Tenure

Customary land tenure and utilize tion practices differ greatly through out the Territory, not only fro district to district, but even in son instances among island groups within district. These traditional practic have undergone considerable modified tion as a result of the influence from the various administrations. Neverth less, the Economic Development Plan for Micronesia, completed by Robe R. Nathan Associates, Inc., in December 1 ber 1966, makes a keen observation "Still, today, the many tradition tenure arrangements which continu to persist often create obstacles agricultural development. The system of undefined ownership by extende families and clans, with use rights b many, discourages investment in lan improvement. Land reform is the on ultimate solution, but the careful planning and equitable implements tion of a well-conceived land reform will take much expert effort and man years to achieve."

The Administration, aware of the complexity of traditional land tenur systems, is making conscious efforts turge the people to seek solution within the established judicial process and the administrative framework. The policy of the Government is to encourage, where possible, ways and means to promote understanding the need for a single consistent system of land holdings in the Territory.

These traditional practices have undergone considerable modifica distribution are tion as a result of the influence from the various administrations. Nevertheless, the Economic Development Plan for Micronesia, completed by Robert R. Nathan Associates, Inc., in December 1966, makes a keen observation: "Still, today, the many traditional tenure arrangements which continue agricultural development. The system of undefined ownership by extended families and clans, with use rights by many, discourages investment in land improvement. Land reform is the only ultimate solution, but the careful planning and equitable implementation of a well-conceived land reform will take much expert effort and many years to achieve."

The Administration, aware of the complexity of traditional land tenure systems, is making conscious efforts to urge the people to seek solutions within the established judicial process and the administrative framework. The policy of the Government is to encourage, where possible, ways and means to promote understanding of the need for a single consistent system of land holdings in the Territory.

Since publication of a handbook on customary land tenure patterns and

Part VI-Economic Advancement

and law studies in 1958, no subsefuent study of land tenure systems has een made, due to limited budget brovisions in the Division of Land Management. Until customary land aws of the Territory are codified, the bresent handbook, along with suplementary studies and court opinions nd decisions, must serve as a basic Customary land tenure and utiliza guide for the Administration in resolving land problems. Many variations in

> Existing land ownership and land summarized Appendix VIII.

In ancient Palau, land was divided into public domain (chutem bwai) and clan lands (chutem kebliil). The uninhabitable interior of Babelthuap Island was public domain, as were the rock islands, mangrove swamps, seas to persist often create obstacles to and reefs of Koror, Peleliu, Angaur and the various traditional villages of Babelthuap. In most cases the village council, the klobak, controlled the public domain but in some areas the district council or a group of villages within a district collectively controlled the public domain. Clan lands comprised most of the private lands of aboriginal Palau. These included lands having utility value-home sites, taro paddies, woodlots and palm forestsand, except in the case of the taro swamps, were assigned to male lineage heads who in turn assigned parcels to male lineage members. Taro paddies were assigned to female lineage heads who, assigned paddy land to its member women and women married into the lineage.

> In Yap, the traditional unit of land is and has been for centuries the lubinaw, or estate, which consists of all land belonging to a single extended household and which may include one

or more house platforms, taro pits, tracts of sea inside the reef, stone fish weirs, coconut palms, yam gardens, grassy uplands, and timber lots.

In precontact time the Mariana Islands were divided into districts, each ruled by a local chief who nominally controlled the lands within it. The rights to areas within the district were assigned to kinship groups. The land tenure system began to break down when the Spanish administration gave Chamorro families rights to certain lands on the islands. In the latter part of the 1800's, when the Chamorros resettled in Saipan, individual ownership was established and each family cultivated its own fields. Present-day land tenure patterns among the Mariana Islands resemble the western system more than do the patterns in any other district of the Trust Territory. The sale of land is an accepted practice.

In the Truk District, especially on the atolls, land is more precious than anywhere else in the Territory due to the high population density. Land is identified with food. For example, a Trukese will say, "That is my food," when pointing to his parcel of land. The land may be owned individually or by lineage groups. Major types of land recognized by the local inhabitants are dry land, fresh water swamp, and the shallow area covered by sea water. Improvements or planting of tree crops, such as breadfruit trees, in any of these areas may be owned separately from the land itself. The size of individual pieces of property may be quite small, seldom more than a few acres, although a person usually has some, but not necessarily sole, interest in a half dozen or more plots.

In precontact time all the land area of the Ponape Islands belonged to the

Fiscal Year 1968

Nanmwarki (king) of each municipality. The common people used the land to grow food only with the consent of the Nanmwarki and his nobles. The "first fruits" of the season always went to the Nanmwarki. To some extent this is still the practice, even though in 1912 the German government gave the common people actual deed-holding title to land they had been working. Today, individual ownership of land predominates on Ponape Island and to a certain extent on Kusaie. In practice, however, some elements of family enterprise directed toward subsistence of all concerned are retained. The Ponapeans live on scattered farmsteads rather than in villages as do other inhabitants of the Trust Territory. On these farmsteads such crops as yams, taro, breadfruit, coconut and bananas are grown for subsistence or sale in local markets.

Land is of paramount importance to the Marshallese people; their agricultural economy is based on copra production, and much of their food comes directly from their land The system provides for all members of the Marshallese society, each of whom obtains land rights at birth. The Marshallese generally exhibit an attitude of security, undoubtedly due in large part to their land tenure system involving three levels of society-the commoners, the headmen, and the nobility. Despite three foreign powers having administered their islands, they still retain possession of most of their land and show every inclination to continue to do so in the future. In general, land is not for sale in the Marshalls.

#### **Quality of Soil**

The lush vegetation on the islands is deceiving as an indication of the fertility of the soil. The high rainfall leaches

the soil, making it deficient in a basic nutrients-nitrogen, phosp potassium, and the minor elen The soil usually is made up of do posed volcanic or coral rocks and quantities of humus. On the st slopes of the high islands the soil has often been removed through sion; the valleys and alluvial toward the coast contain so moderate fertility. Most vol islands have swamp areas where ta grown as a staple food. Some of alluvial plains and gentle slopes the coast now are being used for production-coconut palms, bi fruit, bananas, cacao, yams, dry taro, sweet potatoes, and vegeta Mangrove forests on the tidal flats rain forests in the interior pro timber for building homes and o structures. The surfaces of coral a and single coral islands which build on submerged mountain peaks normally only a few feet above level. The soils are quite porconsisting of sand, shells, and co fragments with very little orga matter. They are well suited to growth of the coconut palm, but not conducive to ordinary forms cultivated agriculture. Many co islands and atolls have manmade t pits of varying sizes where gr: leaves, and debris have been placed produce organic matter for taro cu vation. The balance of the atoll land generally used to produce cocor palms, breadfruit, pandanus, arro root, cucurbits and bananas.

In some districts extensive land n yet under cultivation or developme but suitable for crops or livestor production exists. The exact acreage unknown.

The balance of the atoll land is generally used to produce coconut palms, breadfruit, pandanus, arrowroot, cucurbits and bananas.

In some districts extensive land not yet under cultivation or development but suitable for crops or livestock production exists. The exact acreage is unknown.

## Acquisition and Transfer of Title

Public Law No. 2-1, enacted in 1966, provides for establishment of

Part VI-Economic Advancement

Prior to 1962, Pacific Islands alluvial plains and gentle slopes near Central School was the only public the coast now are being used for crop high school in the Territory. With the production—coconut palms, bread establishment of public high schools in fruit, bananas, cacao, yams, dry land establishment of public high schools in fruit, bananas, cacao, yams, dry land establishment of public high schools in fruit, bananas, cacao, yams, dry land establishment of public high schools in fruit, bananas, cacao, yams, dry land establishment of public high schools in fruit taro, sweet potatoes, and vegetables all districts. Common Managore forests on the tidal flats were afforded the opportunity Mangrove forests on the tidal flats and to apply for further schooling in their rain forests in the interior provide home districts. Not all elementary timber for building homes and other school graduates can as yet be accommodated in these local public high schools: 68% were during the period, however, and expansion of the public high schools continues with consequent increased enrollments. Additionally, many graduates of mission elementary schools go on to one of the II mission high schools. Still others elect to enter private or public high schools on Guam.

## **Education Policy**

The objectives of the high schools are to:

- Develop further skills in language arts and fundamental mathematics
- Promote better health through education in personal and community hygiene and sanitation
- Impart more knowledge and better understanding of the physical environment through teaching such subjects as geography and science, and of the human environment through teaching about economic and social organization, government and law

Fiscal Year 1968

- Impart knowledge and understanding of the rest of the world and its people
- Develop an understanding of individual and group duties and of civic responsibilities within the immediate society and to the world at large
- Stimulate self-expression in the arts and crafts, including indigenous forms
- Train in vocational skills such as agriculture, carpentry, mechanics, care of tools, and simple technical and commercial skills necessary for economic progress
- Improve homemaking skills, such as food preparation, nutrition, child care, care of the sick, home improvement, and making of clothes.

In the high schools, student government organizations form an important part of school activities. These organizations are patterned after similar school groups in the United States and provide a means for teaching democratic methods. In most cases these student governments are active in fund-raising, social activities, advising the administration, and participating to some degree in disciplinary action.

#### Curriculum

Students in all curricula may take some electives beyond the required courses. Electives offered during the past several years have included speech, journalism. music, a foreign language (a third language), industrial arts, and homemaking.

The social studies program of the high school stresses direct reference to local, district, and territorial governments. For class projects, students consider problems faced by local officials and district representatives in the conduct of political affairs. Classes or attend representatives of classes

sessions of the district legislatures. Students participate in speech and essay contests and at least half of the high schools have had interscholastic debates on propositions of current importance to the Trust Territory.

Instruction at the high school level is in English. Classrooms and libraries receive multiple copies of some of the latest literature designed to encourage and improve reading skills.

The Administration recognizes the value of vocational education as an essential part of the education of young people in high school. A vocational school exists in Palau as part of the public high school and in other districts classes are taught in carpentry, boatbuilding, and other skills students will need for living in their own communities. Girls learn food preparation, sewing, weaving, home nursing, infant and child care, and other homemaking courses. Agriculture receives emphasis where suitable land is available.

Chapter 4

## INSTITUTIONS OF HIGHER EDUCATION

Two specialized schools, the Micronesian Teacher Education Center and the School of Nursing, offer programs for post-high school students. The Agricultural Division's Farm Institute in Ponape, which offered practical training in agriculture, was terminated during the year, mainly because of lack of funds to expand and improve the school.

Although the Territory has no college or institution of higher education offering courses for college credit,

extension courses under auspice the University of Guam were officuring the summer of 1968 in Touring the summer of 1968 in Touring the Selection of Saipan.

A program of higher education provided outside the Territory through the Government's scholarship program and through partial subsidies, inding transportation grants, to pring scholarship holders or spongo students.

During 1968, the amount of mofor scholarships continued at the of over \$500,000 a year. Of the Government scholars studying out the Territory, 56 were in medical paramedical fields. In addition to Government scholars, 118 of Micronesian students attended colloutside the Territory. Of these, were supported by district legislat scholarships, 37 by religious organitions, nine by the East-West Centard 60 by other means or self-intive.

Funds for 1969 will, at a minimal sustain and possibly increase number of students who will begin continue their education at school outside the Territory for 1968-1969 school year. This include 61 students in medical paramedical fields.

The number of students enrolled higher education increased from in 1966, to 292 in 1967, and 35 1968. Of these students, 159 venrolled in the University of Guam in Hawaii, 21 in the Philippines, 118 in mainland United States foreign areas.

extension courses under auspices thips to bona fide Territory students the University of Guam were offerending the University of Guam during the summer of 1968 in Transfer private sponsorship. Under this rogram, registration costs and tuition ees for eligible students are paid by he Government. This year about 64 tudents took advantage of this aid.

Chapter 5

OTHER SCHOOLS

A nursery/kindergarten project was started in 1967 for 90 children on Ebeye, Marshall Islands District, for a period of 6 months. This project was made possible through Title I of the Elementary and Secondary Education

The Catholic mission on Saipan, Mariana Islands District, has been operating a nursery/kindergarten since 1951. During the period of review, 294 children age 3-5 were enrolled.

The availability of U.S. Office of Economic Opportunity (OEO) funds resulted in "Operation Head Start" summer programs for the first time in 1967 in target areas located in Truk, Ponape, the Mariana Islands, and Yap districts. In 1968, Family Head Start programs expanded to include, in addition to the above sites, the Marshall Islands and Palau districts.

Family Head Start is a large cooperative endeavor actively involving such components in the districts as the OEO Community Action Agencies, Education, Peace Corps, Public Health, mission schools, women's clubs, parents, and community. It is a program tailor-made for Micronesia in

that it acknowledges the central role of parents and the familiar community as the ultimate "teacher" and as the vehicle whereby any youngster is propelled forward to the fullest limit of his mental and physical potential.

Children between 4 and 9 who had never before entered school attended classes held in public as well as private schools and were taught by public and private school teachers, Peace Corps Volunteers, and, in some districts, by recent high school graduates. Teacher aides were hired, and parents volunteered and assisted as possible. About 1,125 children were enrolled in 1967 and 2,562 in 1968.

Prior to the opening of classes, orientation and training sessions were conducted; parents and community helpers assisted in constructing waterseal latrines, cook-houses, and playground facilities where needed. Classes for children ran for 6 weeks, from 3 to 4 hours daily. In-service and adult education classes in sanitation, health, nutrition, cooking, and education were held in afternoons for teachers, aides. and parents. Public Health not only programmed extensive screening, physical and dental examinations, but also follow-up treatments and preventive and educational classes. In districts where electricity and generators were available, effective use was made of audio-visual media. These Public Health teams by taking their services to the many isolated centers; were able to reach many children and parents who might otherwise have been left out.

As the need for planning and training for future Head Start programs became evident, a year-round Head Start Center was established on Truk as a pilot project in 1967-68 through grant-in-aid funds from

Fiscal Year 1968

Community Development Division. A Peace Corps Volunteer served as coordinator and head teacher. Members of this community constructed a native-style classroom, a cook-house, and water-seal latrine. Twenty preschoolers attended morning classes lasting 5 hours daily, and an average of 20 to 25 adults attended the afternoon classes in health, sanitation, dental hygiene, nutrition, cooking sewing, and basic adult education.

#### Vocational Schools

A new Micronesian Occupational Center in Koror, Palau District, is to open in September 1969. Micronesian tradesmen, now being selected, will be sent to Hawaii for vocational teacher training during the 1968-1969 school year and return as part of the staff when the school opens. Occupational entry-level programs in sheetmetal work, welding, automobile repair, diesel engines, electrical maintenance and repair, air-conditioning and refrigeration, construction carpentry, masonry, small appliance repair, and building maintenance will be offered. Training in food service for cooks, bakers, waitresses, and food service managers is also being established, as are programs in business machines, stenographic work, and advanced bookkeeping. From 250 to 300 students are expected to enroll the first year.

. Chapter 6
TEACHERS

One of the most vital responsibilities of the Education Department continues to be the upgrading of the present Micronesian teacher corps.

Besides the large number of scholar. ships provided to teachers and: potential teachers each year, in-service, training and workshops conducted by supervisors of teacher education and short-time institutes and workshop conducted by the University of Guan, and the East-West Center all play ar important role in the teacher training program. The Administration's goal to provide each teacher with the equiv alent of at least 4 years training beyond high school in teaching techniques and in subject matter. The objective is further advanced through summer training sessions normally held yearly in each district, through organized intensive programs of in service training in the field, through specialized training in the Micronesian Teacher Education Center (MTEC) in Ponage, and through scholarships for advanced study in colleges outside the Territory.

This year MTEC completed its sixt year. This teacher training institute combines high school work with specialized training in teacher education and is especially oriented toward upgrading teachers who have not previously completed high school work. Enrollment is also open, how ever, to those who have completed high school but lack preparation for teaching. During the past 6 years it has enrolled 45 students a year. In September 1968 enrollment will be in creased to 90 students. Employed teachers continue on salary while attending MTEC. Pre-service teacher to be admitted next year will be provided with stipends, board, room and books, and will pay no fee.

The Administration pays all public school teachers' salaries. Micronesian teachers are certified at several levels depending on training and experience and base salaries range from \$977 to

#### Chapter 7

#### ADULT AND COMMUNITY **FDUCATION**

More than 560 Micronesian men summer training sessions normally and women received formal classroom held yearly in each district, through instruction during fiscal year 1968 organized intensive programs of in under auspices of the Community service training in the field, through Development Division. This figure specialized training in the Micronesian does not include village demonstration Teacher Education Center (MTEC) in projects in health and domestic sci-Ponape, and through scholarships for ence, night school courses at the high advanced study in colleges outside the schools, or the estimated 25 skills training courses privately sponsored by local Community Action Agencies.

> Community Development offerings for out-of-school adults have varied according to the choice of people in each district and the availability of local teachers with special skills. The program has depended heavily on volunteer teachers; only 15 of the 27 teachers employed received remunera-

> The number of formal course subjects was 14 and teaching hours totaled 1,182. English received the largest number of teaching hours (282), followed by typing (164), bookkeeping (122), industrial shop (104), and sewing (102), Course offerings of less than 100 hours were algebra, cooking, oral Japanese, legal education, mathematics, office practice, outboard mechanics, sanitation, and weaving.

> Local interest is indicated in enrollment: English (146 enrollees), sewing

(116), typing (54), outboard motor mechanics (48), and bookkeeping (37). All others had an average attendance of less than 30 students.

Radio broadcasting is used as an adult and community education medium. Interview programs, group discussions, and formal adult literacy programs are broadcast to an increasing number of listeners. During the year, some 940 hours of adult education programs were developed and broadcast on local radio stations by the Community Development Division. In addition, 332 educational films were circulated and seven publications printed and distributed.

#### Chapter 8

CULTURE AND RESEARCH

#### Research

Research in all fields in the Territory is carried out primarily by special projects sponsored by outside agencies and by scientists affiliated with educational institutions. The Trust Territory Public Affairs Department or other department concerned coordinates visits to the Territory of scientists desiring to conduct field study for research projects. The Administration also cooperates with other governmental and private research organizations. One example is the continued research contact with the Pacific Science Board of the National Academy of Sciences, National Research Council. The Administration also utilizes the South Pacific Commission specialists and technical advisers working under the Commission's auspices.

Fiscal Year 1968

The following subjects of research involved field study during the year by scientists from outside institutions (affiliation of researcher in parentheses):

- Developmental changes and modernization in Truk (University of Washington)
- Persistence and change in medical beliefs and illness behavior in Truk (Stanford University)
- Cultural change in Mokil, Ponape (University of Hawaii)
- Social, political and economic change in Yap since 1947 (State University College at Brockport, New York)
- Folklore in the Marshalls (University of Hawaii)
- Social systems in Nukuoro, Ponape (University of Chicago)
- Patterns of food consumption on Namu, Marshall Islands (University of Hawaii)
- Japanese social science studies in Micronesia during the Japanese mandate period (California State College at Hayward)
- Archaeology study in Palau (California State College at Long Beach)
- Development of legislative process in Micronesia (University of Hawaii)
- Lizards and skins ecology in Palau (Harvard University)
- Marine organisms (sponges) for use in drugs, in Palau (Columbia University)
- Potential commercial value of algae (University of Hawaii)
- Rice production feasibility (Honolulu)
- Crocodiles in Palau (Japan)
- Leprosy, particularly in Ponape District (University of Hawaii)

In the summer of 1967, an interesting experimental field training program was conducted by the University of Hawaii for its graduate students in anthropology. Four University graduate students and four Marshalless employees of the Trust Territory Government together learned field techniques and community research methods in the Marshalls. The result of the program were the subject of "The Laura Report: A Field Report of Training and Research in Majuro Atoll, Marshall Islands," issued by the University of Hawaii. A similar program was held in Truk in the summer of 1968.

The Stanford Research Institute working under contract to the True Territory Administration, completed an educational research project in the Territory. The final report, *Planning for Education and Manpower in Micronesia*, was published in December 1967.

An agricultural economist from the University of Hawaii conducted orientation study for possible establishment of a 2-year agriculture field research program in coconut, vegetable crop, and livestock production in the Territory.

Plans are continuing for establishment of a marine biological researd laboratory in Palau. For details, & Part VI, Section 4, Chapter 5.

#### Libraries

School libraries and library service for the public are discussed in Pa VIII, Chapter 1.

The library of the Congress Micronesia and the collections in toffices of the High Commission contain important professional a technical works used for reference a research on Micronesia. On a less scale, the offices of district administ tors and departmental libraries in

The result of the program were the subject of "The Laura Report: A Field Report of Training and Research in Majuro Atoli Marshall Islands," issued by the University of Hawaii. A similar program was held in Truk in the summer of 1968.

The Stanford Research Institute, working under contract to the Trust Territory Administration, completed an educational research project in the Territory. The final report, Planning for Education and Manpower in Micronesia, was published in December 1967.

An agricultural economist from the University of Hawaii conducted an orientation study for possible establishment of a 2-year agriculture field research program in coconut, vegetable crop, and livestock production in the Territory.

Plans are continuing for establishment of a marine biological research laboratory in Palau. For details, see Part VI, Section 4, Chapter 5.

#### Libraries

School libraries and library services for the public are discussed in Part VIII, Chapter 1.

The library of the Congress of Micronesia and the collections in the offices of the High Commissioner contain important professional and technical works used for reference and research on Micronesia. On a lesser scale, the offices of district administrators and departmental libraries in the

Part VIII-Educational Advancement

districts offer professional collections which are available for appropriate use. Beginning on Saipan, these collections are being indexed in a union catalog under a program funded by Title III of the Library Services and Construction Act.

## Indigenous Art and Culture

Except in Palau District, no specific organization exists for the purpose of fostering and preserving indigenous art and culture. The Palau Museum Association is actively building a collection of ancient Palauan artifacts. The Palau Congress annually appropriates money to aid development of the museum.

In other districts, Peace Corps Volunteers, youth and women's organizations, and social scientists have contributed in various ways to encouraging preservation of traditional art and handicraft, music, dance, and folklore. Volunteers have been especially active in encouraging production of local handicraft, and, in at least one district, have opened a shop for the sale of traditional handicraft items. Other privately operated shops on Guam, Kwajalein, Palau, and Saipan encourage local craftsmen to copy and improve traditional crafts and designs.

Traditional music in Micronesia has almost disappeared except in Yap and the outer islands of the Carolines, and is limited today almost entirely to chants sung on various occasions. The most common traditional musical instruments are the nose flute and drums; only a few individuals can still play these old musical instruments. Harmonicas, guitars, and Western band instruments are the rule today. Vocal and instrumental music, both religious and secular, are common on most islands and reflect the Spanish, German, Japanese, and American

cultures with which Micronesians have come in contact.

Traditional dance is encouraged in community programs and elders and older students frequently teach younger people. In a few areas, as in Yap District, dancing persists in its traditional form.

#### **Historic Sites and Relics**

In 1965, a two-man team from the U.S. National Park Service visited the Territory to help formulate a territorial parks program. Partly as a result of the team's recommendations, the Third Regular Session of the Congress of Micronesia took a major step in this direction by enacting Public Law No. 3-34, which establishes an Historic Sites Commission to advise on matters relating to territorial parks and to the restoration, reconstruction, conservation, preservation, and general administration of historic and archaeologic sites, buildings, and properties in the Trust Territory. The Commission, not to exceed 11 members, is to be appointed by the High Commissioner. The Commission's goals are to restore and preserve significant historic sites, buildings, and objects for public use.

Related to this work was the creation, pursuant to House Resolution 34 of the Third Regular Session, of a Special Nan Madol Committee to investigate the legal status of the Territory's best-preserved ancient ruins in Ponape District. The Special Committee will report its findings to the Congress of Micronesia.

#### **Publications and Printing**

The Trust Territory Print Shop, formerly designated "Publications Office," was established in March 1966.

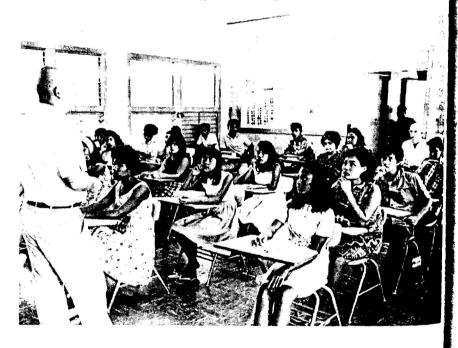

Fiscal Year 1968

The printing plant facility includes three small offset duplicators, a letterpress, and one larger (12x18) offset press. The shop also contains a copying machine (Xerox-11x14) leased to the Trust Territory. In addition, the facility contains a platemaker, paper cutter, electric punch and plastic bindery equipment, as well as a collator and jogging equipment, a small folding machine, a process camera, a photo-direct camera processor, and a darkroom. Five electric typewriters are used for typesetting and a strip-printer is used for

headlines. Two line-up tables are available for art and layout work and two light tables for preparing offset negatives for platemaking.

The print shop is equipped to handle about 95% of the Territory's printing requirements. Informational materials on education, agriculture, and other subjects; government forms; and cultural and research papers and booklets are printed. Work is done in English and in the major local languages: Chamorro, Yapese. Palauan, Trukese, Ponapean, Kusaiean and Marshallese.

In addition to academic subjects, high school students listen to talks on government careers and on government organization and functions.

independence by more fully associating them in directing their own affairs and by continuing its efforts to increase their understanding of the various possibilities open to them in the process of self-determination.

The Council welcomed the measures taken jointly by the Congress of Micronesia and the Administering Authority toward attainment of these ends, namely, the creation of the Future Political Status Commission of the Congress of Micronesia and, following the petition made last year by the Congress of Micronesia, the initiatives already taken by the President of the United States and the U.S. Congress toward establishment of a U.S. status commission to investigate conditions and factors affecting Micronesia's political future and to recommend a date for a plebiscite.

The Council urged the Administering Authority to pursue vigorously its efforts, in close cooperation with the Congress of Micronesia, to prepare the people of the Territory to exercise their right to determine their own future.

Congress of Micronesia. The Council expressed pleasure that the Congress of Micronesia has maintained its interest in the political progress of the Territory and has continued to play an active role in that field.

The Trusteeship Council was gratified to note the important role being played by the Congress of Micronesia as exemplified by the increased legislative output at its Third Regular Session when, out of 173 bills introduced, 41\* were adopted by the

\*The figures provided by the High Commissioner were inaccurate. Seven more bills were adopted and signed into law, bringing the totals to 48 and 41 respectively.

Congress, 34\* of which were signed into law.

The Council, anxious that the Congress play an increasing role in the Government of the Territory, recalled its previous recommendations concern ing the need for longer and/or more frequent sessions of the Congress Considering that, from the date of the forthcoming elections, senior administrative officers will be required to choose between legislative and admin istrative careers, the Council recalled its recommendations to provide full time payment for members of the Congress. The Council noted with satisfaction the statement by the Representative Special that Administration is actively considering possible solutions to these problems

The Council reaffirmed its previous conclusions that, as the effective voice and instrument of Micronesian wisher the Congress must have full and clearly defined legislative powers and the means to exercise these powers. With regard to finance, the Council noted two developments: (a) participation of two representatives selected by the Congress of Micronesia in budget presentations to the United State Congress, and (b) the undertaking by the Administration, in preparation for and anticipation of the Fourth Regular Session of the Congress of Micronesia, to have a preliminary budget plan ready for submission on the opening day of the Congress, or possibly at an earlier date, thus enabling the Congress' committees to give the budget thorough consideration.

Nevertheless, the Council continued by noting that over 95% of the Trust Territory's central budget is provided by grants appropriated by the Courgress of the United States, over which the Congress of Micronesia has no The Council expressed the hope that the proposed significant increase in the Economic Development Loan Fund will be realized. It recommended that the Administering Authority continue its efforts to insure the economic viability of the Territory.

Public Finance. The Council noted with satisfaction the continuing increase in the funds being made available by the Administering Authority and expressed the hope that they can be authorized for a period of several years thus permitting maximum flexibility in the economic development plans for the Territory. The Council welcomed the decision to appoint a revenue officer to review the existing system of tax collection and increase its efficiency. The Council reiterated its recommendation that the Congress of Micronesia consider adoption of a suitable system of direct taxation applicable to all residents of the Territory. The Council also recommended that to increase the funds available for appropriation by the Congress of Micronesia, the administrative costs of the Congress be defrayed by funds appropriated by the Congress of the United States.

Agriculture and Livestock. The Trusteeship Council reaffirmed its view that agriculture should be accorded a high priority in the development programs. The Council therefore welcomed efforts of the Administering Authority to diversify agricultural production, with emphasis on products which can be exported. The Council, however, noted the decrease in the export of copra reflected in statistics contained in the Administering Authority's report and urged the Administering Authority to take all possible steps to remedy the situation.

Fisheries. The Trusteeship Council, reaffirming its earlier recommenda-

tions concerning the potential importance of the fishing industry in the Territory, was pleased to note the following developments in this field:
(a) measures taken by the Administering Authority to expand and improve the fishing industry and to increase Micronesian interest and participation in it. (b) the survey being carried out in Truk as a result of indications of commercial interest in fishing and canning operations there, and (c) introduction of legislation in the U.S. Congress for a lowering of U.S. importantiffs on Micronesian canned fish.

Mic

and

of

th

11..

The Trusteeship Council expressed hope that plans for establishment of a marine biological research station in Palau will be implemented.

Industry. The Trusteeship Council welcomed measures taken in cooperation with Air Micronesia to expand the tourist industry in the Territory and in particular the decision to build a chain of hotels and train Micronesia personnel to staff them.

Transport and Communication The Trusteeship Council welcomed the significant progress achieved in air transportation in the Territory and the important participation of local in terests in Air Micronesia. The Cound also noted that despite improvement in sea communications, the situation still difficult in certain areas and therefore, urged the Administering Authority to take the necessary step to bring shipping services to a level which will meet the needs of the Territory's growing economy. The Council also urged the Administering Authority to continue efforts improve the road network in the Ten tory.

tions concerning the potential in

The Trusteeship Council expressed hope that plans for establishment of a marine biological research station in Palau will be implemented.

Industry. The Trusteeship Council welcomed measures taken in cooperation with Air Micronesia to expand the tourist industry in the Territory and in particular the decision to build a chain of hotels and train Micronesian personnel to staff them.

Transport and Communications, The Trusteeship Council welcomed the significant progress achieved in air transportation in the Territory and the important participation of local interests in Air Micronesia. The Council also noted that despite improvements in sea communications, the situation is still difficult in certain areas and, therefore, urged the Administering Authority to take the necessary steps to bring shipping services to a level which will meet the needs of the Territory's growing economy. The Council also urged the Administering Authority to continue efforts to improve the road network in the Territory.

## Social Advancement

il. The Trusteeship Council welcomed the passing of a Social Security Act for

-U.N. Resolutions and Recommendations

Micronesians, covering both private and public employees.

The Trusteeship Council commended the progress made in the field of public health. It noted in particular that the Department of Public Health has been reorganized, the Director accorded cabinet status, a hospital administrator appointed, and that plans for a comprehensive long-term health program are being worked out in conjunction with the University of Hawaii. The Council noted, however, the continuing acute shortage of medical personnel in the Territory and urged the Administering Authority to pursue its efforts to eliminate this deficiency.

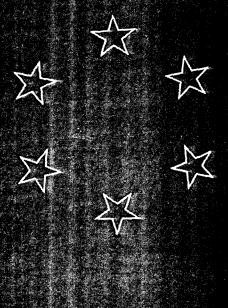

The Council noted the urgent need for improvements in low-cost housing assistance and expressed hope that measures such as the plan for creation of a low-cost housing loan fund will receive the close attention of the Administering Authority.

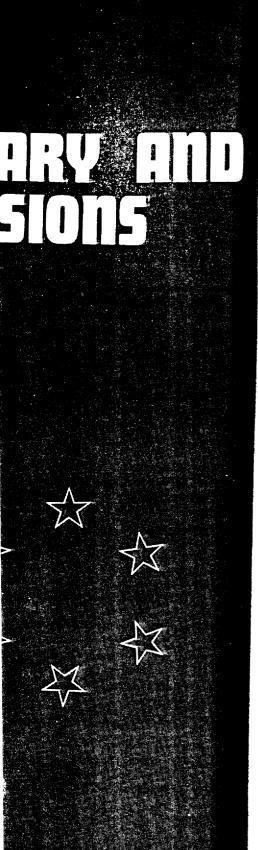

#### Educational Advancement

The Trusteeship Council, mindful of its previous observations that a great task still faces the Administration in implementing its declared objectives in education, took note of the progress achieved in the past year. In particular, the Council noted with pleasure that its recommendation concerning an increase in vocational training has been borne out by the Stanford Research Institute report and that the Administering Authority is already taking steps to implement this by such measures as creating a new vocational school in Palau.

The Council noted the recommendation of the Stanford Research Institute for creation of a college preparatory school. While the Council welcomed establishment of such a school as a significant contribution to Micronesian higher education, it hoped this would be only a first step toward establishment of a junior college in the Territory, as previously recommended by the Council.

Fiscal Year 1968

During the year, the Administering Authority, in furthering the basic objectives of the United States Trusteeship Agreement, has made progress in political, economic, and social fields.

#### Political Advancement

Micronesia's steady development of a capacity for political maturity was reflected by actions of the Third Regular Session of the Congress of Micronesia. Out of 173 bills introduced, only 48 survived the legislative scrutiny of the Congress and 41 were signed into law. A Social Security System and improved administration of tax laws were among significant items of legislation.

Amendment No. 3 to Secretarial Order No. 2882 refined the authority and organization of the 3-year-old Congress.

In accordance with a Senate joint resolution, the Congress of Micronesia in October 1967 established a Future Political Status Commission to study the range of alternatives open to Micronesians in choosing their future political status.

A Personnel Board, established by earlier law of the Congress, began functioning, giving Micronesians a greater voice in the Administration's personnel management policy.

Several organizational changes should improve the executive branch. These include reactivation of, and assigning a Micronesian to, the position of Special Assistant to the High Commissioner; dividing the Department of Community Services into separate departments of Public Health and Education; establishing a Planning Programming Budgeting Systems Office for long-range planning, and the addition of a physical planning coordinator.

The judiciary was strengthened by adding a second Associate Justice and appointing a Temporary Justice.

#### **Economic Advancement**

To place increasing emphasis on orderly, balanced economic advancement, the Administration added an Economic Development Division to the Department of Resources and Development. Findings and recommendations of such source material as the 1966 Nathan Report are used in devising new means to develop the economy.

The beginning of a tourist industry and improved air transportation have resulted from the inauguration of Air Micronesia's air service in the Territory. Jet service within Micronesia and direct to Okinawa and Honolulu began in May 1968. To accommodate the infant but growing tourist industry,

Fiscal Year 1968

Air Micronesia's agreement calls for building a hotel in each district.

Besides Air Micronesia, new air service from Tokyo to Guam and the opening of a 54-room first-class hotel have already attracted to Saipan increasing numbers of tourists from Japan, Okinawa and Guam.

Maritime transport of cargo has improved somewhat with the addition of a fourth major logistic vessel, the M/V Majuro, to the fleet serving the Territory. The newly acquired M/V James M. Cook is the first of several administrative vessels planned to handle educational, medical, and community services needs of outislands and thus to free field trip vessels to serve direct logistic needs of the islands.

Maritime transportation still is not satisfactory, but negotiations with several shipping lines were underway at year's end for a new, 10-year contract for maritime service.

The overtaxed communications system among districts is now undergoing a major overhaul with the assistance of the Federal Aviation Administration.

Credit facilities for Micronesians continue to improve as seven new credit unions opened this year. By year's end, the 48 credit unions, often the only source for certain types of loans, increased their total assets by 62% to \$880,000 from the previous year. Cooperatives also increased in number and volume of business.

The large revenue from copra export was mainly responsible for the overall increase of about 30% in exports; imports also increased by nearly 30%.

The work of Peace Corps V unteers has contributed to econor development, such as in fisher development and in agriculture, wh Volunteers gave added impetus to coconut replanting program.

Experiments in rice and pepp growing in Ponape have progress smoothly with increased plantings a production. The Administratio agricultural stations have emphasiz demonstration farming and production of plant material and breeding sto for distribution to farmers.

#### Social Advancement

Education continues to improve the accelerated pace begun in 196 Enrollment reached new highs aga this year in both elementary and hig schools. Construction of new school and classrooms continued. Englishinstruction in the schools has in proved and accelerated with implementation of a 5-year, territory-with program for Teaching English as Second Language (TESL). Peace Congivolunteers, American contract and Micronesian teachers received intensitationing in the TESL program.

A second year of study was adde to Micronesian Teacher Educatio Center and admission standards wer raised. Enrollment will be doubled i the fall of 1968.

Vocational education is receiving new emphasis and plans are we underway for a new occupational school in Palau. Vocational education and basic English literacy have been stressed in continuing adult education programs.

The number of Micronesians pursuing higher education abroad continues to increase; this year 351

Part XI-Summary and Conclusions

The work of Peace Corps Volunteers has contributed to economic development, such as in fisheries development and in agriculture, where Volunteers gave added impetus to the coconut replanting program.

Experiments in rice and pepper growing in Ponape have progressed smoothly with increased plantings and production. The Administration's agricultural stations have emphasized demonstration farming and production of plant material and breeding stock for distribution to farmers.

Education continues to improve at the accelerated pace begun in 1962. Enrollment reached new highs again this year in both elementary and high schools. Construction of new schools and classrooms continued. English instruction in the schools has improved and accelerated with implementation of a 5-year, territory-wide program for Teaching English as a Second Language (TESL). Peace Corps Volunteers, American contract and Micronesian teachers received intensive training in the TESL program.

A second year of study was added to Micronesian Teacher Education Center and admission standards were raised. Enrollment will be doubled in the fall of 1968.

Vocational education is receiving new emphasis and plans are well underway for a new occupational school in Palau. Vocational education and basic English literacy have been stressed in continuing adult education programs.

The number of Micronesians pursuing higher education abroad continues to increase; this year 351

Part XI-Summary and Conclusions

were enrolled in schools on the U.S. mainland, Hawaii, Guam, the Philippines, and South Pacific areas.

Summer Head Start programs for pre-school children were introduced to all districts by the summer of 1968.

Library books and facilities increased in number and quality through the Territory's participation in two U.S. federal acts and more library personnel received training in Guam and Hawaii.

Micronesian communities are developing self-reliance and gaining needed facilities through the community development program. Grants-in-aid for community projects more than doubled during the year. The inclusion of the Territory in Economic Opportunity Act programs gives communities and individuals a new voice in their own development and provides skills training, remedial education, and work experience for various segments of the population.

Addition of new medical personnel and added emphasis on training Micro-

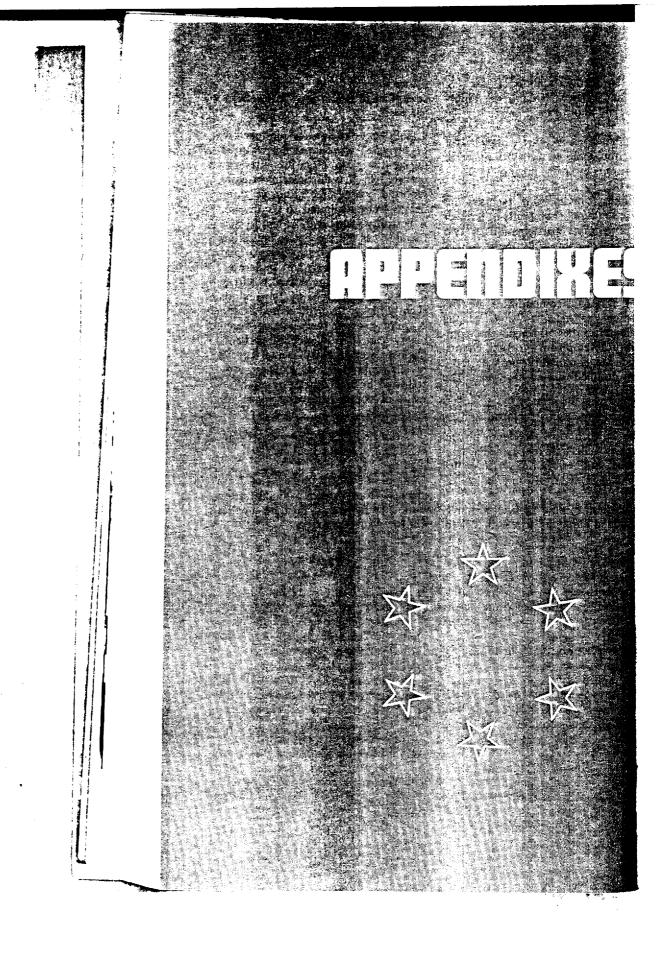

nesian public health personnel have strengthened health services to Micronesians.

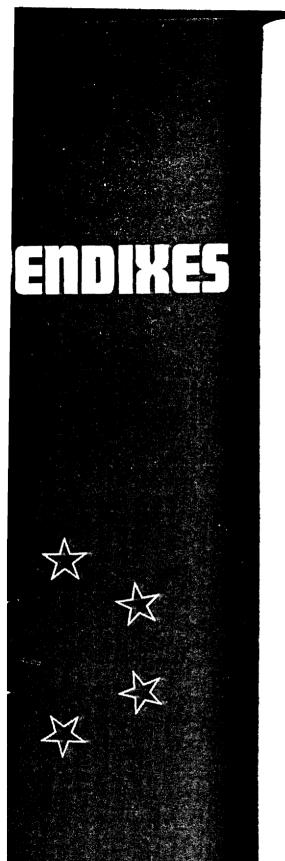

Influenza-like diseases continued to be the most prevalent illness reported during the year. Hepatitis outbreaks occurred in five districts; most cases reported were mild although three deaths were attributed to the disease. A Territory-wide survey of leprosy and filariasis has given a better indication of the extent of these diseases, and treatment programs are underway. Early results of a tuberculosis survey indicate a prevalence of tuberculosis slightly higher than the United States. A pilot program emphasizing domiciliary care for tuberculosis patients has been well accepted. Dental surveys of elementary school children were followed in each district by establishment of comprehensive programs for treatment.

A limited family planning program is meeting gradual acceptance.

Approval of the purchase of drugs directly from Veterans Administration depots should result in more supplies for the available money.

Fiscal Year 1968

APPENDIX

# TREATIES AND OTHER INTERNATIONAL AGREEMENTS

UNITED STATES TREATIES AND OTHER INTERNATIONAL AGREEMENTS WHICH HAVE APPLICATION TO THE TRUST TERRITORY<sup>1</sup>
As of June 30, 1968

#### BILATERAL

Botswana. Consular convention (between the United States and the United Kingdom). Signed at Washington June 6, 1951. Continued in force as between the United States and Botswana by exchange of notes at Gaberones, September 30, 1966.

Burma. Air transport agreement. Signed at Rangoon, September 28, 1949.

China. Mutual defense treaty. Signed at Washington, December 2, 1954.

Costa Rica. Consular convention. Signed at San Jose, January 12, 1948.

Ghana. Consular convention and protocol of signature (between the United States and the United Kingdom). Signed at Washington, June 6, 1951. Continued in force as between the United States and Ghana by exchange of notes at Accra, September 4 and December 21, 1957.

Indonesia. Air transport agreement. Signed at Djakarta, January 15, 1968.

<sup>1</sup>There has been no general determination concerning the application to the Trust Territory of the Pacific Islands of treaties and other agreements concluded prior to U.S. administration of that Territory. Certain of those treaties and other agreements are included in this list because of specific determinations regarding them.

Ireland. Consular convention. Signed at Dublin, May 1, 1950 and supplementary protocol signed at Dublin, March 3, 1952.

Japan. Civil air transport agreement. Signed at Tokyo, August 11, 1952, as amended December 28, 1965. Agreed Minute to the treaty of mutual cooperation and security. Initialed at Washington, January 19, 1960. Consular convention. Signed at Tokyo, March 22, 1963.

Korea. Mutual defense treaty. Signed at Washington, October 1, 1953. Air transport agreement. Signed at Washington, April 24, 1957. Consular convention. Signed at Seoul, January 8, 1963.

Lesotho. Consular convention (between the United States and the United Kingdom). Signed at Washington, June 6, 1951. Continued in force as between the United States and Lesotho by exchange of notes at Maseru, October 4, 1966, and October 5 and 26, 1967.

New Zealand. Air transport agreement. Signed at Wellington, June 24, 1964.

Philippines. Mutual defense treaty. Signed at Washington, August 30, 1951.

South Africa. Treaty relating to the reciprocal extradition of criminals.

MAR AME BLOCK

Fiscal Year 1968

Signed at Washington, December 18, 1947.

Sweden. Extradition convention. Signed at Washington, October 24, 1961.

Tanzania. Consular convention and protocol of signature (between the United States and the United Kingdom). Signed at Washington, June 6, 1951. Continued in force as between the United States and Tanzania by exchange of notes at Dar es Salaam, November 30 and December 6, 1965.

United Kingdom. Consular convention and protocol of signature. Signed at Washington, June 6, 1951.

#### **MULTILATERAL**

Convention relating to the suppression of the abuse of opium and other drugs, as amended by the protocol of December 11, 1946. Signed at The Hague, January 23, 1912.<sup>2</sup>

Convention for limiting the manufacture and regulating the distribution of narcotic drugs, as amended by the protocol of December 11, 1946. Concluded at Geneva, July 13, 1931.<sup>2</sup>

Protocol bringing under international control drugs outside the scope of the convention of July 13, 1931, for limiting the manufacture and regulating the distribution of narcotic drugs, as amended by the protocol signed on December 11, 1946. Done at Paris, November 19, 1948.

Protocol for limiting and regulating the cultivation of the poppy plant, the production of, international and wholesale trade in, and use of opium. Done at New York, June 23, 1953.<sup>2</sup>

Single convention on narcotic drugs, 1961, with additions to schedules. Done at New York, March 30, 1961.

Convention for the unification of certain rules relating to international transportation by air, and additional protocol. Concluded at Warsaw, October 12, 1929.

Convention on international civil aviation. Signed at Chicago, December 7, 1944.

APPENDI:

#### SECRETARIAL ORDERS

# UNITED STATES DEPARTMENT OF THE INTERIOR Office of the Secretary Washington, D.C. 20240

June 29, 1967

ORDER NO. 2882, Amendment No. 3

Subject: Legislative authority for the Congress of Micronesia, Trust Territory of the Pacific Islands.

WHEREAS, on September 28, 1964, the Secretary of the Interior promulgated Secretarial Order No. 2882 creating the Congress of Micronesia and granting legislative authority thereto; and

WHEREAS, Section 24 of the said Order 2882 provides that the Congress may recommend amendments to the Secretary of the Interior by a two-third majority vote of the membership of each House; and

WHEREAS, the Congress of Micronesia adopted Senate Joint Resolution No. 43 requesting that Order No. 2882 be amended so as to require the passage of bills by the majority votes of all members of each House; and

WHEREAS, provision needs to be made for the conduct of biennial elections in the event a natural disaster or other Act of God should prevent ballotting on the appointed day; and

WHEREAS, a further clarification of the appropriation power of the Congress appears to be desirable;

NOW, THEREFORE, Secretarial Order No. 2882 is amended in the following particulars, the amendments to become effective immediately:

1. Section 17(b) of the said Order No. 2882 is hereby amended to read as follows:

"Section 17(b) Reading of bills – Passages. A bill in order to become a law shall pass two readings in each House, on separate days, the final passage of which in each House shall be by a majority vote of all the members of each House, which vote shall be entered upon the journal."

2. Section 9 of said Order No. 2882 is hereby amended to read as follows:

Fiscal Year 1968

147

Appendix A

<sup>&</sup>lt;sup>4</sup>The 1959 regulations replace the regulations annexed to the Buenos Aires telecommunication convention of 1952 which, in turn, replaced the regulations annexed to the Atlantic City convention of 1947 as between contracting parties. The earlier regulations remain in force as between contracting parties which have not become parties to the later conventions.

<sup>&</sup>lt;sup>5</sup>The 1965 telecommunication convention replaces the convention of December 21, 1959 as between contracting parties. The latter convention replaced, in turn, the convention of December 22, 1952, which replaced the convention of 1947, all of which remain in force as between contracting parties which have not become parties to the later conventions.

"Section 9. General elections. General elections shall be held biennially in each even-numbered year on the first Tuesday following the first Monday in November: Provided, That in the event of a natural disaster or other Act of God, the effect of which precludes holding the election on the foregoing date, the High Commissioner, with the approval of the Secretary of the Interior, may proclaim a later election date in the affected election district or districts. All elections shall be held in accordance with such procedures as this order and the laws of the Trust Territory may prescribe. Legislators shall be chosen by secret ballot of the qualified electors of their respective district."

3. Section 5 of the said Order No. 2882 is hereby amended to read as follows:

"Section 5. Budget. Money bills enacted by the Congress of Micronesia shall not provide for the appropriation of funds in excess of such amounts as are available from revenues raised pursuant to the tax laws and other revenue laws of the Trust Territory: Provided, That income derived from the provision of air and sea transportation services, reimbursements from public works sales and services; and income from the operation of water, power, sewerage and communications services shall be applied against the costs of providing those services and shall not be considered to be revenues within the meaning of this Order. Prior to his final submission to the Secretary of the Interior of requests for Federal funds necessary for the support of governmental functions in the Trust Territory, the High Commissioner shall prepare a preliminary budget plan. He shall submit such plan to the Congress of Micronesia in joint session for its review and recommendations with respect to such portions as relate to expenditures of funds proposed to be appropriated by the Congress of the United States. With respect to such portions of the preliminary budget plan, the High Commissioner shall adopt such recommendations of the Congress as he may deem appropriate, but he shall transmit to the Secretary of the Interior all recommendations he has not adopted."

> (Signed) Stewart L. Udall Secretary of the Interior

> > November 15, 1967

ORDER NO. 2902

Subject: Authority Reserved to the Secretary of the Interior or his Delegate-Trust Territory

WHEREAS, pursuant to Articles 6 and 8 of the Trusteeship Agreement between the United States and the Security Council of the United Nations, the United States is obligated to improve and regulate the means of transportation to, from and within the Trust Territory; and

148

Appendix B

ral elections shall be held biennially in uesday following the first Monday in a natural disaster or other Act of God, ne election on the foregoing date, the of the Secretary of the Interior, may ected election district or districts. All 1 such procedures as this order and the e. Legislators shall be chosen by secret pective district."

o. 2882 is hereby amended to read as

enacted by the Congress of Micronesia f funds in excess of such amounts as are o the tax laws and other revenue laws of me derived from the provision of air and nts from public works sales and services; r, power, sewerage and communications of providing those services and shall not meaning of this Order. Prior to his final Interior of requests for Federal funds ital functions in the Trust Territory, the ninary budget plan. He shall submit such in joint session for its review and h portions as relate to expenditures of the Congress of the United States. (Signed) Stewart L. Udall Secretary of the Interior

November 15, 1967

Secretary of the Interior or his Dele-

s 6 and 8 of the Trusteeship Agreement curity Council of the United Nations, the and regulate the means of transportation : and

Appendix B

WHEREAS, the Congress of the United States has authorized the expenditures of appropriations available for the administration of the Trust Territory for the purchase, charter, maintenance, and operating of aircraft and surface vessels for official and for commercial transportation purposes found by the Secretary of the Interior to be necessary, 43 U.S.C. (1964 Ed.) 1687;

NOW, THEREFORE, effective upon the date of publication of this Order, the following powers and authorities are hereby reserved to the Secretary of the Interior or his delegate and hereafter may only be exercised by the Secretary or his specifically thereunto authorized delegate:

- 1. The power and authority, on behalf of the Trust Territory of the Pacific Islands, to enter into contracts for the purchase, charter, maintenance, or operation of aircraft and surface vessels and for services associated therewith, and to grant franchises for such operations and services for both official and commercial transportation purposes found by the Secretary or his delegate to be useful, beneficial and necessary.
- 2. The High Commissioner of the Trust Territory of the Pacific Islands is designated as the authorized delegate to exercise the power and authority reserved hereunder.

(Signed) Kenneth Holum Acting Secretary of the Interior

December 22, 1967

ORDER NO. 2902, Amendment No. 1

Subject: Authority Reserved to the Secretary of the Interior or his Delegate – Trust Territory

WHEREAS, by Secretarial Order No. 2902, published November 22, 1967, 32 F.R. 16058, there was reserved to the Secretary of the Interior or his delegate the power and authority, on behalf of the Trust Territory of the Pacific Islands, to enter into contracts for the purchase, charter, maintenance, or operation of aircraft and surface vessels and for services associated therewith, and to grant franchises for such operations and services for both official and commercial transportation purposes found by the Secretary or his delegate to be useful, beneficial and necessary; and

WHEREAS, only the High Commissioner of the Trust Territory of the Pacific Islands was designated as the authorized delegate to exercise the power and authority reserved therein;

Fiscal Year 1968

NOW, THEREFORE, effective upon the signing of this Order, paragraph No. 2 of Secretarial Order No. 2902, is amended by adding a new authorized delegate as follows:

2. The Director, Office of Territories, or the High Commissioner of the Trust Territory of the Pacific Islands are designated as the authorized delegates to exercise the power and authority reserved hereunder.

(Signed) Stewart L. Udall Secretary of the Interior

# UNITED NATIONS DAY PROCLAMATION

## TRUST TERRITORY OF THE PACIFIC ISLANDS Office of the High Commissioner Saipan, Mariana Islands 96950

#### UNITED NATIONS DAY PROCLAMATION

WHEREAS, the Government of the Trust Territory of the Pacific Islands desires that United Nations Day, October 24, be honored in a fitting manner, and

WHEREAS, it is also desired that all Micronesian government employees have suitable time to plan and participate in such celebrations and ceremonies;

NOW THEREFORE, I. W. R. Norwood, High Commissioner of the Trust Territory of the Pacific Islands, do proclaim that Tuesday, the 24th day of October, 1967, shall be declared an official holiday for all Micronesian employees of the Trust Territory Government.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed my official seal this 18th day of September, 1967.

(SEAL)

(Signed) W. R. Norwood High Commissioner Trust Territory of the Pacific Islands

# STATISTICAL ORGANIZATION

HE STATISTICS in this report were collected at district level and reported to the Trust Territory Headquarters Statistical Center. All statistical information is compiled by the statistical analyst at Headquarters.

The Public Health Department medical records statistician collects disease and vital statistics and is responsible for their compilation.

A Territory-wide census was conducted in 1958 in collaboration with the U.S. Bureau of the Census. This census report was published by the High Commissioner's office in June 1959.

A Territory-wide head count was conducted last year in connection with a public health survey.

Much of the data necessarily comes from municipal officials. Although it is

checked against previous reports, some sources of error cannot be controlled.

Birth and death statistics are taken from registered birth and death certificates. Registration is compulsory for births, deaths, and fetal deaths, but not for marriages and divorces in all parts of the Territory or for all sections of the population. However, birth and death registration is not complete. Distances and lack of frequent communication between some islands and the district administrative centers impede reporting and registration. Efforts to extend coverage and improve reporting by closer supervision and education continue.

The Trust Territory furnishes statistics to the South Pacific Commission. Communicable diseases are reported monthly to the World Health Organization and the South Pacific Commission. Statistics are sent to other United Nations specialized agencies on request.

Fiscal Year 1968

Fiscal Year 1968

# D. LITERACY

The Trust Territory Census of 1958 included a question on literacy in English and Japanese; the results are given below (persons able to speak or read more than one language are reported under each category). Only estimates on literacy in the vernacular are available and these range to as high as 90% in certain areas such as Saipan.

Linguistic ability of the population born in the Trust Territory, by age group, for the Trust Territory of the Pacific Islands, 1958

Money and Banking

#### COMMERCE AND TRADE

#### A. BALANCE OF PAYMENTS

No foreign exchange balances are maintained.

#### B. VALUE OF EXTERNAL TRADE

(1) There are no reexports. The estimated value of imports and exports for the last 5 years is as follows:

| Year | Imports      | Exports     |
|------|--------------|-------------|
| 1964 | \$ 5,685,585 | \$2,644,105 |
| 1965 | 7, 090, 916  | 3, 152, 459 |
| 1966 | 8, 916, 617  | 3, 008, 159 |
| 1967 | 9,819,480    | 2,321,671°  |
| 1968 | 13, 572, 052 | 3, 025, 571 |

<sup>&</sup>lt;sup>a</sup> Decrease due to drop in revenue from copra export.

(2) Total value of imports and exports each Trust Territory district, July 1967 – June 1968

| District  | Imports  | Exports  |
|---|--|--|
| Mariana Islands<br>Marshall Islands<br>Palau<br>Ponape<br>Truk<br>Yap | \$ 4, 561, 400<br>2, 805, 121<br>2, 134, 482<br>1, 398, 815<br>1, 889, 310<br>782, 924 | \$ 128, 899<br>1, 251, 907<br>422, 396<br>544, 095<br>539, 060<br>139, 214 |
| Total   | \$13,572,052   | \$3,025,571  |

## NATIONAL INCOME AND RELATED DATA

Information on national income was given in Part VI, Economic Advancement, Section 3, Chapter 1. As noted in that chapter, since so much of the income of the people of the Territory is computed on a subsistence basis, statistics tend to be somewhat meaningless. "National income," computed from wages and copra and other exports, represents only a portion of the true income of the Territory. Export statistics, wage statistics, government revenue and expenditures, Territory and local, are given in other tables in this section.

<sup>&</sup>lt;sup>a</sup>Includes Trust Territory Headquarters and Congress of Micronesia.

#### D. COMPULSORY LABOR

No compulsory labor law is enacted.

#### E. WAGE RATES

Wage rates in general follow the Trust Territory Micronesian Title and Pay Plan.

#### F. WORK DAY, WORK WEEK

The 8-hour day, 40-hour week is the standard pattern of wage work.

## G. LABOR AND MEDICAL INSPECTIONS

There was no labor or medical inspection as such.

#### H. INDUSTRIAL ACCIDENTS

#### (a) Number of industrial accidents that occurred during the year

| Industrial accidents | Indigenous<br>personnel | Nonindigenous<br>personnel |
|----------------------|-------------------------|----------------------------|
| Fatal                | 4                       |                            |

- (b) Illness or death due to occupational disease ......
- (c) Number of persons receiving compensation for:
  - 1. Partial disability..... 2. Total disability .....
  - 3. Death due to industrial accidents or occupational disease ...

#### I. OFFENSES AGAINST LABOR LAWS

No employee or employer was charged with affense against labor laws.

Fiscal Year 1968

<sup>&</sup>lt;sup>b</sup>Nonindigenous employees of the Administration are not included. Nonindigenous employment includes employees of other U.S. Government agencies, American managers of trading companies and other business firms, Belgian permanent residents engaged in business, teachers in missions, temporary Filipino employees of Mobil Micronesia and construction companies, and private wholesalers.

#### J. COLLECTIVE AGREEMENTS

There were no collective agreements in force.

#### K. INDUSTRIAL DISPUTES

There were no industrial disputes.

#### L. UNEMPLOYMENT

Unemployment is not a problem in the Trust Territory since outside the district centers the economy is largely subsistence.

#### M. EMIGRATION FOR EMPLOYMENT

Nineteen Micronesians migrated to the United States during the year for the probable purpose of seeking employment.

## N. EMPLOYEES RECRUITED FROM OUTSIDE TERRITORY

For number of employees recruited from outside the Territory, see B and C above "Nonindigenous workers in the Trust Territory," and Statistical Appendix II which lists all employees of the Trust Territory Government.

#### SOCIAL SECURITY AND WELFARE SERVICES

Social Security provisions are discussed in Part V., chapter 5 and Part VII, chapter 5.

Since 1962, the Territory has been entitled to disaster relief under the U.S. Federal Disaster Act. In 1963, \$1,300,000 was allocated to the Marianas by the Office of Emergency Planning to perform necessary rehabilitation work to damage caused by a typhoon in April. Over \$390,000 was allocated in 1964 to provide assistance to Peleliu and Angaur Islands of Palau District hit by a typhoon in November. In October 1965 a typhoon hit Pagan and Agrihan in the Northern Marianas. Some building materials, food and emergency supplies were sent to the stricken areas by the Mariana Islands District Administration.

In 1967 the Territory received an allocation of \$2,150,000 from the Office of Emergency Planning for rehabilitation work on Koror and Babelthuap islands in the Palau District, which were devastated by Typhoon Sally in March. The U.S. Congress has also provided a supplementary appropriation of \$1.7 million for the reconstruction of schools, public buildings and housing in the town of Koror.

Government funds in the amount of \$300,000 were reprogrammed for reconstruction of Rota Hospital and other essential public facilities, which were destroyed by Typhoon Gilda.

Section VII, chapter 5, details funds allocated for rehabilitation following Typhoon Jean, which struck the Truk and Mariana Islands districts in April 1968.

#### A. EXPENDITURES ON HEALTH, MEDICAL, AND SANITATION SERVICES

| Type of Expenditure                | Amount 1968  |
|------------------------------------|--------------|
| Administration                     | \$ 473, 471  |
| Construction                       | 324, 803     |
| Hospitals and Out-islands services | 2,354,442    |
| Dental services                    | 156, 401     |
| Sanitation                         | 128, 410     |
| Total                              | 3, 437, 527° |

<sup>&</sup>lt;sup>a</sup> Included in this amount are \$1,333,228 salaries for medical and health personnel, \$116,298 for health and medical equipment, and \$470,777 for medical supplies.

#### B. ESTABLISHMENTS FOR IN-PATIENT CARE

| (a) | General hospitals Field hospitals Total Total Total number of admissions by service (exclusive of newborn) in Trust Territory district hospitals for the year ended June 30, 1968 | 6<br>3°<br>9          |
|-----|---|-----------------------|
|     | Medicine 15 years and over Under 15 years (pediatrics)  | 4,662<br>3,238<br>751 |
|     | Obstetrics. Tuberculosis Leprosy  | 2, 138<br>88<br>18    |
|     | All services, total   | 10, 895               |

<sup>&</sup>lt;sup>a</sup> Rota field hospital was destroyed by a typhoon in the fall of 1967. Services were given in temporary quarters during the rest of the fiscal year.

- (b) There are no maternity homes in the Trust Territory. There were 50 beds for obstetrical cases in the general and field hospitals as of June 1968.
- (c) There are no infectious disease hospitals in the Trust Territory. Facilities for isolating patients are provided in each district hospital.
- (d) There is no leprosarium in the Trust Territory. Facilities for isolating patients are made available at the district hospitals for care of active cases.
- (e) There are no mental hospitals in the Trust Territory. Facilities for care of patients with mental illness are provided in each hospital.
- (f) There is a rehabilitation center in the Marshall Islands District hospital at Majuro where physical therapy is given to patients with residual effects of poliomyelitis and to patients with other conditions where such treatment is indicated.
- (g) There are no private or mission hospitals in the Territory.

Fiscal Year 1968

### C. SERVICE UNITS FOR OUTPATIENT CARE

- (a) There is a general outpatient clinic in each hospital.
- (b) Tuberculosis control and leprosy control are under the supervision of the district hospitals. Weekly chest clinics are held in all hospitals, and leprosy control clinics are held weekly in five and monthly in one district. A diabetes mellitus clinic is held weekly in three district hospitals, a hypertension clinic in one, eye clinics in two, and family planning clinics in three districts.
- (c) There are 8 dental clinics in the Territory. Facilities are provided in one other location, served on a part-time basis.
- (d) There are no mobile health units in the Territory.
- (e) The only other units for outpatient care are dispensaries and health aide posts under Government administration. One health aide is stationed at each, except for four in Palau, two in Ponape and one in Yap which are staffed by graduate nurses. Following are the number of dispensaries and health aide posts in each administrative district:

| Mariana Islands  | 5    |
|------------------|------|
| Marshall Islands | 44   |
| Palau            | - 11 |
| Ропаре           | 12   |
| Truk             | 53   |
| Yap              | 14   |
| Total            | 139  |

#### D. SERVICE UNITS FOR MATERNAL AND CHILD HEALTH

- (a) During the year ended June 30, 1968, antepartum clinics were held twice a week in two districts and once a week in the other four. Some postpartum examinations were given at the hospital clinics.
- (b) The number of cases and attendances at maternity clinics and well-baby conferences in Trust Territory Districts are shown in the table below. Well-baby conferences are held weekly in five districts and monthly in one. There were head start health programs in all districts and an organized program in one public school. In case of illness children are referred to a district or field hospital out-patient clinic or to a dispensary for treatment.

## Number of cases and attendances at maternity clinics and well-baby conferences at Trust Territory district hospitals, July 1967 through June 1968

| Division III      | Maternit | y Clinic    | Well-baby Conference |             |  |

| 769)   | 27     | 0.3              |
| Other diseases of early infancy (770-776)                  | 26     | 0.3              |
| All other specified causes                                 | 221    | 2.5              |
| Symptoms, senility and ill-defined causes (780-795)        | 247    | 2.8              |
| Injuries, all types (E800-E983)                            | 818    | 9.3              |
| All causes, total  | 8,767  | 100              |

Note: Numbers in parentheses are from the International Classification of Diseases, Adapted (for use in Hospitals) (U.S. PHS, 1962)

Discharges are not unduplicated counts of persons because one patient may have several hospital admissions during the year.

This table does not include 1,458 normal defiveries or 157 admissions for special conditions and examinations without sickness.

#### H. IMMUNIZATIONS

Reported number of persons who received the full course for immunization against certain communicable diseases, revaccinations, and boosters for selected immunizations July 1967-June 1968

| lmmunizing agent              | Total    |
|-------------------------------|----------|
| Smallpox:                     |          |
| Primary                       | 1,994    |
| Revaccination                 | 4,469    |
| Poliomyelitis (trivalent-OPV) | 4,277    |
| Typhoid:                      |          |
| Initial series                | 1,780    |
| Boosters                      | 15, 121° |
| Whooping cough (pertussis):   | }        |
| Initial series                | 786      |
| Boosters                      | 628      |
| Diphtheria:                   | ł        |
| Initial series                | 1,167    |
| Boosters                      | 2,705    |
| Tetanus:                      |          |
| Initial series                | 1, 167   |
| Boosters                      | 14, 337° |

 $<sup>^{\</sup>rm o}$  About 70 % of the typhoid and 81 % of the tetanus boosters were given after typhoons in Yap and Mariana Islands.

Note: Cholera, typhus and influenza vaccines are given to special groups or when required for travel but these are not included in the general vaccination program of the Trust Territory.

Fiscal Year 1968

#### I. PROTECTED WATER SUPPLY AND EXCRETA DISPOSAL

Protected water supply and excreta disposal systems are mainly limited to housing areas for government employees, to hospitals, and to a few government and mission schools. Two islands have protected water supplies for the first time this year, Ebeye in the Marshalls and Tinian in the Marianas. Ebeye also has an excreta disposal system.

Estimated population, including nonindigenous persons, served by protected water supply and excreta disposal systems.

|                                  | Estimated                      | population   |  |

HOUSING

Housing ordinarily is not furnished Micronesian district employees of the Administration. This is because government housing is limited and most government employees reside in or near the district center. Districts such as Truk and the Marshall Islands have special problems since many administration employees come from outlying islands. Housing is furnished, when needed, to senior executive or professional employees in the districts. Inter-district personnel when assigned to other than their home districts are furnished housing. (See also Part VII, Chapter 11.)

#### B. ESTIMATED NUMBER OF CHILDREN OF SCHOOL AGE

Since population records are kept by age groups, it is difficult to provide number of children by single years of age. It is estimated, however, that there are approximately 27,452 children from 5 years through 14 years of age in the Territory. Of these, according to 1968 school records, some 24,195 children are attending school. In the Palau, Mariana Islands, and Ponape Districts, there is close to 100% enrollment of school-age children. In the Truk, Yap and Marshall Islands Districts, it is recognized that a certain proportion of children of school age in the isolated outer island areas are not in school.

# D. AVERAGE ATTENDANCE RATES DURING SCHOOL YEAR 1967-1968

Not all schools reported on attendance rates during the year under review. This is particularly true for the schools away from the district centers. Attendance rates tend to vary from district to district; in Palau and the Mariana Islands and in schools in district centers, attendance often exceeds 90%. This percent, however, drops considerably in an overall average when the outer islands and remote schools are considered.

#### E. SCHOOL DROPOUTS

264

The dropout rate in the public high schools for school year 1967-1968 was 11.5%. No information is available from the elementary schools.

Education

ndance rates during the year rue for the schools away from es tend to vary from district Islands and in schools in dis-90%. Education

Number of indigenous teachers with and without Trust Territory certification in each Trust Territory district for the year ending June 30, 1968 (Continued)

NOTE: Public Elementary and Secondary Indigenous Teachers
Certification standards, as well as salary scale, for Trust Territory public school teachers have been designed and established by the Trust Territory Government in three different levels; junior teacher, senior teacher, and master teacher. Requirements for qualification for each category are based upon the standard of formal education, number of 8-week teacher-training summer sessions, and number of years teaching on the job under the supervision of teacher supervisors. In the Twentieth Annual Report to the United Nations we reported a portion of our junior teachers as certified teachers. In this report all junior teachers are reported as non-certified teachers.

Public Elementary and Secondary Napiddianeous Teachers <u>Public Elementary and Secondary Nonindigenous Teachers</u>
Fully credentialed United States teachers.

Peace Corps Volunteers
90% are United States college graduates who received teacher-training for 10 weeks before entering the public schools as teachers.

#### K. ADULT EDUCATION

There are no separate, formal adult education institutions in the Trust Territory. The type of adult education program carried on uses existing high school facilities and includes credit and noncredit high school classes, informal group learning, educational broadcasting, and village film showings.

Enrollment figures show a decrease over 1967 since adult educational activities are being reprogrammed to the greater use of mass media and a lesser concentration in classroom enrollment. In addition, vocational training for adults is being absorbed by the Department of Education.

| District and type of instruction  | Age range   |                           | Enrollment               |                                  |

 $<sup>^{\</sup>it a}$  Estimated.

NOTE: Quantities of books do not fully reflect library activities, especially in schools. Three districts, for example, have extensive holdings of audio-visual materials, including besides film and film-strips, study prints, transparencies for overhead projectors, etc. Nor do these figures reflect an influx of materials for public library patrons which was arriving in 1968 but will not be entered until the 1969 remark. until the 1969 report.
