Los Alamos Scientific Laboratory
P. O. Box 1663
Los Alamos, New Mexico

PREUSS/lw

Dear Herb:

It has been a privilege to work with you in the Atomic Energy Commission's Proving Ground Group during the 1948 atomic weapon test program. The title of your official position, Classification and Review Officer, is inadequate in describing the many contributions you made to the success of the test program.

Your enthusiasm, energy, devotion to duty, and high personal integrity have been outstanding. The efficient functioning of the classification system, for which you personally were responsible, played a major part in the success of the test program and will facilitate the dissemination of important scientific findings.

You are particularly deserving to be commended for the outstanding service you rendered in organizing documentary photographic operations. You have done a great service in presenting the Commission's viewpoint in the preparation of the photographic record of the 1948 weapon test program.

Your ability to analyze complicated problems and to insist on sound solutions in spite of many handicaps reflects credit upon your personal ability and on the Los Alamos Laboratory.

It has been a privilege to serve with you in this operation, and I look forward to our continued association.

Sincerely yours,
