RE: MEDICAL INFIRMARY - TARE

31 MARCH 1953

R

Attached are two copies of a memorandum from C. C. Custer and three (3) prints of sketch MIS-4, showing the proposed addition to the Infirmary at Tare.

The 16-foot wide addition proposed as indicated by Dr. Custer is not suitable because the length of the building would be increased to 36 feet and space is not available for such an extension.

Dr. Custer has also requested that a door be added to the surgery room.
