Mr. William E. Siri
University of California
Donner Laboratory & Donner Pavilion
Berkeley 4, Calif.

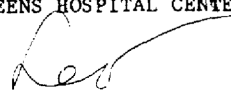

Dear Will:

Each of the samples of plasma which I sent you was preserved with a few grains of mercuric chloride. This was the only preservative agent that we had available to us and may be responsible for the paste-like appearance. I hope you can find someone who is enough of a chemist to dissolve this coagulum so that the samples can be counted. There should be more than 2 ml in each of these samples.

With kindest regards,

Sincerely yours,

THE LONG ISLAND JEWISH HOSPITAL
QUEENS HOSPITAL CENTER AFFILIATION

Leo M. Meyer, M.D.
Hematologist in Charge
