SUBJECT: Radiation Monitoring During Operation HARDTACK

Joint Task Force SEVEN has requested Weather Bureau cooperation in a radiation monitoring project beginning about April 1, 1958. Equipment to be used consists of a Radiation Survey Meter and an Automatic Monitor.

The cooperation required will be to record instrumental readings in a log book twice daily. No equipment maintenance will be required, since replacement units will be furnished periodically.

Complete instructions will be furnished you when the equipment is shipped.

You are requested to cooperate in this program. If the routine station workload is too great, please advise us immediately so that other arrangements can be made.
