TO: ESTIMATING FILES JOB: NO. 884
FROM: C. L. EAST RE: CONVERSATION WITH PAUL W. SPAIN
DATE: FEBRUARY 9, 1953

R

I contacted Mr. Paul W. Spain this morning concerning jobsite's request in their Engineering Message 0075 to move building 406, Site Elmer, 50' farther south than was indicated on Drawing 2116-EE-1, which was approved by PG-3-1133, dated January 14, 1953, Change Order No. 3736. Jobsite requested this change to provide adequate parking area for heavy equipment used on the dock.

Mr. Spain advised that he had no objection to this suggestion for the location of building 406. However, he requested that the stabilization of this area and the classification yard fence should be processed by the jobsite as a separate change order and not be installed as a part of Engineering Change Order No. 3736.

Mr. Spain stated that he is leaving this morning for Washington, D. C., where he will remain for the balance of this week. He plans that both he and Mr. Fred Hühner will be in our Los Angeles office during the week of February 16. This latter information was passed on to Mr. Bowen's office immediately by phone.
