June 11, 1954

Honorable Orme Lewis
Assistant Secretary
of the Interior
Department of the Interior
Washington 25, D. C.

Dear Mr. Lewis:

The enclosure forwarded with your letter of May 13, 1954 enumerates correctly, insofar as the Atomic Energy Commission is able to ascertain, the measures which are currently being undertaken by the Commander in Chief, Pacific for the resettlement of the natives evacuated from Rongelap and Utirik. The Commander in Chief, Pacific has indicated that he would implement, with assistance from the Atomic Energy Commission, such measures as are required in resettling the Marshallese. This position has been concurred in by the Chief of Naval Operations.

With primary responsibility for this matter residing in the Commander in Chief, Pacific, it is apparent that the Atomic Energy Commission is not in a position to assure that all details outlined in Mr. Midkiff's letter will be executed. However, since the Commander in Chief, Pacific has requested that he be given responsibility for these matters with the exception of the continued medical care of these Marshall Island residents, and the Chief of Naval Operations has concurred, there can be little doubt of his willingness to fulfill the obligations entailed in the resettlement of the natives.

Insofar as continued medical checks are concerned, the Atomic Energy Commission has accepted this responsibility. Dr. Bugher, our Director of the Division of Biology and Medicine, has discussed with the High Commissioner of the Trust Territory of the Pacific Islands possible means of implementing this Commission responsibility. In addition, the Commission will insure

that periodic surveys of Rongelap are undertaken to determine the earliest possible date when the natives may be returned to their original homes.

As ever, the Atomic Energy Commission stands ready to assist in any manner in which it is able, to secure a satisfactory solution to any problems which may arise in resettling the Marshallese evacuated from Rongelap and Utirik.

Sincerely yours,

/s/

Dear Mr. Lewis:

The enclosure forwarded with your letter of May 13, 1954, enumerates correctly, insofar as the Atomic Energy Commission is able to ascertain, the measures which are currently being undertaken by the Commander in Chief, Pacific for the re-settlement of the natives evacuated from Rongelap and Utirik. The Commander in Chief, Pacific has indicated that he would implement, with assistance from the Atomic Energy Commission, such measures as are required in resettling the Marshallese. This position has been concurred in by the Chief of Naval Operations.

With primary responsibility for this matter residing in the Commander in Chief, Pacific, it is apparent that the Atomic Energy Commission is not in a position to assure that all details outlined in Mr. Midkiff's letter will be executed. However, since the Commander in Chief, Pacific has requested that he be given responsibility for these matters with the exception of the continued medical care of these Marshall Island residents, and the Chief of Naval Operations has concurred, there can be little doubt of his willingness to fulfill the obligations entailed in the resettlement of the natives.

Insofar as continued medical checks are concerned, the Atomic Energy Commission has accepted this responsibility. Dr. Hughes, our Director of the Division of Biology and Medicine, has discussed with the High Commissioner of the Trust Territory of the Pacific Islands possible means of implementing this Commission responsibility. In addition, the Commission will insure
