FOLDER FY 1979
GENERAL CORRESPONDENCE

Dear Bill:

Because we failed to complete all our sampling in the lagoons at Enewetak and Bikini during our last trip, we would like to use the time slot available in June to complete the lagoon work and forego the open ocean sampling. I've discussed all this with Harry Brown on the phone and indicated to him we would like two additional days as well. This seemed to be no problem.

Therefore, our present intentions are to have the three individuals named below fly to Honolulu on 12 June. They will require a vehicle and some reservations for that evening.

	Social Security No.	Affiliation
Victor E. Noshkin		LLL
Rodney J. Eagle		LLL
James S. Schweiger		LLL

The above named will depart Honolulu to Kwajalein on the June 13th MAC flight and should be ready to depart on the Likitanur on 14 June. We would like to return back to Enewetak and Bikini to finish our lagoon sediment sampling. The sequence of atolls is not important but I recommend going to Bikini first and Enewetak second. This will allow the vessel to pick up any equipment and some of our gear at Enewetak and return it directly to Kwajalein. The option is to store it on board during the trip between Enewetak and Bikini if this were the routes. We would plan to finish all the lagoon sampling so that the ship could make it back to Kwajalein on the 23rd or 24th of June. Rod, Jim and I would return to Honolulu on the 25th of June MAC flight. On board all we require is to have our small winch operational and freezer space for sediment samples. No more than 3 or 4 footlockers of gear will be required for the operation but we would like to bring all our empty water barrels back to Kwajalein from Enewetak.

PRIVACY ACT MATERIAL REMOVED

If this schedule does not create any problems, we anticipate that the appropriate MAC reservations, hotel reservations, etc. will be handled in your usual efficient manner.

I appreciate your cooperation in this matter.

Yours truly,

Victor E. Noshkin
