63rd AEC Meeting 6-11-47

The Commission considered a memorandum from Mr. Derry dated June 10, 1947, "Scientific Re-Survey of Bikini" (AEC Doc. 47-56) re-

commending that the Commission approve and support a survey group for additional studies at Bikini. Mr. Derry outlined previous conversations with Admiral Parsons on this subject. The Commission considered in particular the desirability of authorizing and supporting the participation of Drs. Overstreet and Jacobson in the expedition. Dr. Warren pointed out that in his opinion it would be preferable that samples be collected at Bikini and returned to this country for analysis rather than to permit the participation of additional radio-chemists for the analysis of samples at Bikini. The matter was deferred for discussion with the Military Liaison Committee.
