OCB 337 Minutes. MAY 11 1958

Agenda Item 6 -- Other Business

a. Noted that the Atomic Energy Commission will have a Board at a future meeting on the H.R. 100 for the Crew Incentive Program scheduled for August.

b. Discussed the possibility of a poster exhibit on the media, possibly through voluntary subscribers, and perhaps a similar exhibit on the idea of a "freedom of information act".

c. Discussed current concern over genetic effects of atomic testing, which has a bearing on the European Geneva Conference on other U.S. interests. Agreed to defer action to deal with this matter until the return of Admiral Strauss unless the H. R. 100 changes of circumstances should demand earlier action. Will be studied and we agree to participate in it.
