

UNITED STATES
ATOMIC ENERGY COMMISSION
WASHINGTON, D.C. 20545

403319

December 2, 1968

Professor Jose M. Otero
President
Nuclear Energy Board
Calle de Serrano 121
Madrid, Spain

Dear Professor Otero:

The biomedical research program which was established in February 1966 as a cooperative activity between the Junta de Energia Nuclear and the U. S. Atomic Energy Commission continues to be of interest to the Commission.

You will recall that the program was extended through December 31, 1968 by your letter of September 15, 1967. We would be pleased to receive from you a current description of work planned for CY 1969 and an evaluation of funding requirements in general accord with principles previously established. This information is needed in order for our Division of Biology and Medicine to take appropriate program action.

We propose that USAEC funds would be authorized through the U. S. Embassy in Madrid in the same manner as has been used in the past.

We look forward to an early response and to continuation of this useful cooperation.

Sincerely,

/s/

Myron B. Kratzer, Assistant General
Manager for International Activities
