Dear Arts

together this week, since I have to go back to los alamos between abots. Therefore, I thought I would ask a few questions by letter and perhaps you would write something on It appears that it will be inconvenient for us to get or this took, since I have to go back to los Alexos between these subjects to se.

like very such to see sketches of these areas if you have them, and more particularly, urge that the plans be put in a state such that Campbell can give them to Hell in the very near future. TELET PL **THEFT STATE** THEFT

J. OASH (SPECIPY):

that are definitely being done with some statements about their present condition in the sense of construction requirements and completeness of experimental planning? status of the general experimental program of TV 12. In particular, could you give me as well as you know it a listing of the experiments I am also concerned with your present impression of the is you know, there is a meeting on oryogenics in Los Alamos the 27th of May. I do not know whether you and Duane plan to attend this meeting. If you do, perhaps you could plan to come either a day early or stay over a day late so that we could discuss in more detail some of these problems.

We should both consider whether this increased size constitutes a hazard to the experimental set-ups on Inimum and **Henti**a

We are proceeding with respect to the ball of fire photographs en the plan we discussed some time ago. Felt is arranging with BMC a disposition of cameras and towers to cover all of the shote. However, I feel that some time before the samera plan is pronounced final (approximately 15 July) you people should get together with Felt and make sure that you feel that the proposed plan is adequate.

I would still hope that we can get together to discuss these problems in some detail in the next week or two.

Sincerely,

William E. Orle
