Surveys, Bikini

December 1952

Los Alamos has begun to inquire as to the status of our Bikini surveys, with particular reference to tying Uncle into the Tare through Oboe survey and the atoll triangulation. It would help me if you could furnish approximate dates of the following:

1. The completion of the coral reef triangulation print, which will have the code number 100.
2. The completion of the base line.
3. The completion of the primary triangulation net.
4. The completion of the Uncle survey and its tie to Tare.
