March 31, 1959

Dear Bill:

I want to thank you again for your very great help in connection with the Argus release which I hope pleased you in its final form.

Harvey Brooks called me to say that Pierce at Harvard had positive indication of the event on last August 30th along with the exact time, using the technique described in the report you read at the last FSAC meeting.

Please look us up when you are in town.

Cordially,
