JUN 8 1953

Dr. Karl Wilbur  
Division of Biology and Medicine  
Atomic Energy Commission  
Washington 25, D. C.

Dear Dr. Wilbur:

The Biology and Hydrobiology Advisory Committees to the Office of Naval Research are meeting in Hawaii during the period 17 - 21 February 1953 to evaluate research proposals and to visit biological research facilities at the University of Hawaii. As you know, efforts are also being made to provide an opportunity for the panel members to study potentially permanent biological laboratory facilities at Kniwetok immediately following the committee meetings.

I am sure that the chairmen of the advisory committees join me in cordially inviting you to meet with the members of the panels during the meetings in Honolulu.

With kindest regards -

Sincerely yours,
